THE ADVISORS' INNER CIRCLE FUND III**

March 1, 2017

Investment Adviser:

FIERA CAPITAL INC.

This Statement of Additional Information (“SAI”) is not a prospectus. This SAI is intended to provide additional information regarding the activities and operations of The Advisors’ Inner Circle Fund III (the “Trust”) and the Fiera Capital Diversified Alternatives Fund (the “Fund”). This SAI is incorporated by reference into and should be read in conjunction with the Fund’s prospectus dated March 1, 2017, as it may be amended from time to time (the “Prospectus”). Capitalized terms not defined herein are defined in the Prospectus. The Fund’s financial statements, including notes thereto, and the report of KPMG LLP for the fiscal year ended October 31, 2016 are contained in the 2016 Annual Report to Shareholders and are incorporated by reference into and are deemed to be part of this SAI. A copy of the Fund’s 2016 Annual Report to Shareholders accompanies the delivery of this SAI. Shareholders may obtain copies of the Prospectus or Annual Report free of charge by writing to the Fund at Fiera Capital Diversified Alternatives Fund, P.O. Box 219009, Kansas City, MO 64121-9009 (Express Mail Address: Fiera Capital Diversified Alternatives Fund, c/o DST Systems, Inc., 430 W 7th Street, Kansas City, MO 64105) or calling the Fund at 1-844-755-3863.

THE TRUST

General. The Fund is a separate series of the Trust. The Trust is an open-end investment management company established under Delaware law as a Delaware statutory trust under a Declaration of Trust dated December 4, 2013 (the “Declaration of Trust”). The Declaration of Trust permits the Trust to offer separate series (“funds”) of shares of beneficial interest (“shares”). The Trust reserves the right to create and issue shares of additional funds. Each fund is a separate mutual fund, and each share of each fund represents an equal proportionate interest in that fund. All consideration received by the Trust for shares of any fund, and all assets of such fund, belong solely to that fund and would be subject to any liabilities related thereto. Each fund of the Trust pays its (i) operating expenses, including fees of its service providers, expenses of preparing prospectuses, proxy solicitation material and reports to shareholders, costs of custodial services and registering its shares under federal and state securities laws, pricing and insurance expenses, brokerage costs, interest charges, taxes and organization expenses and (ii) pro rata share of the fund’s other expenses, including audit and legal expenses. Expenses attributable to a specific fund shall be payable solely out of the assets of that fund. Expenses not attributable to a specific fund are allocated across all of the funds on the basis of relative net assets. The other funds of the Trust are described in one or more separate statements of additional information.

Description of Multiple Classes of Shares. The Trust is authorized to offer shares of the Fund in Investor Class shares and Institutional Class shares. The different classes provide for variations in distribution and shareholder servicing fees and minimum investment requirements. Minimum investment requirements and investor eligibility are described in the Prospectus. The Trust reserves the right to create and issue additional classes of shares. For more information on distribution and shareholder servicing expenses, see the “Payments to Financial Intermediaries” section in this SAI.

Voting Rights. Each shareholder of record is entitled to one vote for each share held on the record date for the meeting. The Fund will vote separately on matters relating solely to it. As a Delaware statutory trust, the Trust is not required, and does not intend, to hold annual meetings of shareholders. Approval of shareholders will be sought, however, for certain changes in the operation of the Trust and for the election of members of the Board of Trustees (each, a “Trustee” and collectively, the “Trustees” or the “Board”) under certain circumstances. Under the Declaration of Trust, the Trustees have the power to liquidate the Fund without shareholder approval. While the Trustees have no present intention of exercising this power, they may do so if the Fund fails to reach a viable size within a reasonable amount of time or for such other reasons as may be determined by the Board.

In addition, a Trustee may be removed by the remaining Trustees or by shareholders at a special meeting called upon written request of shareholders owning at least 10% of the outstanding shares of the Trust. In the event that such a meeting is requested, the Trust will provide appropriate assistance and information to the shareholders requesting the meeting.

Any series of the Trust may reorganize or merge with one or more other series of the Trust or of another investment company. Any such reorganization or merger shall be pursuant to the terms and conditions specified in an agreement and plan of reorganization authorized and approved by the Trustees and entered into by the relevant series in connection therewith. In addition, such reorganization or merger may be authorized by vote of a majority of the Trustees then in office and, to the extent permitted by applicable law and the Declaration of Trust, without the approval of shareholders of any series.

DESCRIPTION OF PERMITTED INVESTMENTS

The Fund’s investment objective and principal investment strategies are described in the Prospectus. The Fund is classified as a “diversified” investment company under the Investment Company Act of 1940, as amended (the

“1940 Act”). The following information supplements, and should be read in conjunction with, the Prospectus. The following are descriptions of the permitted investments and investment practices of the Fund and the associated risk factors. The Fund may invest in any of the following instruments or engage in any of the following investment practices unless such investment or activity is inconsistent with or is not permitted by the Fund’s stated investment policies, including those stated below.

American Depositary Receipts (“ADRs”). ADRs, as well as other “hybrid” forms of ADRs, including European Depositary Receipts (“EDRs”) and Global Depositary Receipts (“GDRs”), are certificates evidencing ownership of shares of a foreign issuer. Depositary receipts are securities that evidence ownership interests in a security or a pool of securities that have been deposited with a “depository” and may be sponsored or unsponsored. These certificates are issued by depository banks and generally trade on an established market in the United States or elsewhere. The underlying shares are held in trust by a custodian bank or similar financial institution in the issuer’s home country. The depository bank may not have physical custody of the underlying securities at all times and may charge fees for various services, including forwarding dividends and interest and corporate actions. ADRs are alternatives to directly purchasing the underlying foreign securities in their national markets and currencies. However, ADRs continue to be subject to many of the risks associated with investing directly in foreign securities.

For ADRs, the depository is typically a U.S. financial institution and the underlying securities are issued by a foreign issuer. For other depositary receipts, the depository may be a foreign or a U.S. entity, and the underlying securities may have a foreign or a U.S. issuer. Depositary receipts will not necessarily be denominated in the same currency as their underlying securities. Generally, ADRs are issued in registered form, denominated in U.S. dollars, and designed for use in the U.S. securities markets. Other depositary receipts, such as GDRs and EDRs, may be issued in bearer form and denominated in other currencies, and are generally designed for use in securities markets outside the U.S. While the two types of depositary receipt facilities (unsponsored or sponsored) are similar, there are differences regarding a holder’s rights and obligations and the practices of market participants. A depository may establish an unsponsored facility without participation by (or acquiescence of) the underlying issuer; typically, however, the depository requests a letter of non-objection from the underlying issuer prior to establishing the facility. Holders of unsponsored depositary receipts generally bear all the costs of the facility. The depository usually charges fees upon deposit and withdrawal of the underlying securities, the conversion of dividends into U.S. dollars or other currency, the disposition of non-cash distributions, and the performance of other services. The depository of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the underlying issuer or to pass through voting rights to depositary receipt holders with respect to the underlying securities.

Sponsored depositary receipt facilities are created in generally the same manner as unsponsored facilities, except that sponsored depositary receipts are established jointly by a depository and the underlying issuer through a deposit agreement. The deposit agreement sets out the rights and responsibilities of the underlying issuer, the depository, and the depositary receipt holders. With sponsored facilities, the underlying issuer typically bears some of the costs of the depositary receipts (such as dividend payment fees of the depository), although most sponsored depositary receipts agree to distribute notices of shareholders meetings, voting instructions, and other shareholder communications and information to the depositary receipt holders at the underlying issuer’s request. The depository of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through, to the holders of the receipts, voting rights with respect to the deposited securities.

For purposes of the Fund’s investment policies, investments in depositary receipts will be deemed to be investments in the underlying securities. Thus, a depositary receipt representing ownership of common stock will

be treated as common stock. Depositary receipts do not eliminate all of the risks associated with directly investing in the securities of foreign issuers.

Investments in the securities of foreign issuers may subject the Fund to investment risks that differ in some respects from those related to investments in securities of U.S. issuers. Such risks include future adverse political and economic developments, possible imposition of withholding taxes on income, possible seizure, nationalization or expropriation of foreign deposits, possible establishment of exchange controls or taxation at the source or greater fluctuation in value due to changes in exchange rates. Foreign issuers of securities often engage in business practices different from those of domestic issuers of similar securities, and there may be less information publicly available about foreign issuers. In addition, foreign issuers are, generally speaking, subject to less government supervision and regulation and different accounting treatment than are those in the United States.

Equity Securities. Equity securities represent ownership interests in a company or partnership and consist of common stocks, preferred stocks, warrants and rights to acquire common stock, securities convertible into common stock, and investments in master limited partnerships (“MLPs”). Investments in equity securities in general are subject to market risks that may cause their prices to fluctuate over time. Fluctuations in the value of equity securities in which the Fund invests will cause the net asset value (“NAV”) of the Fund to fluctuate. The Fund purchases equity securities traded on global securities exchanges or the over-the-counter market. Equity securities are described in more detail below:

- **Common Stock.** Common stock represents an equity or ownership interest in an issuer. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds and preferred stock take precedence over the claims of those who own common stock.
- **Preferred Stock.** Preferred stock represents an equity or ownership interest in an issuer that pays dividends at a specified rate and that has precedence over common stock in the payment of dividends. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds take precedence over the claims of those who own preferred and common stock.
- **Alternative Entity Securities.** Alternative entity securities are the securities of entities that are formed as limited partnerships, limited liability companies, business trusts or other non-corporate entities that are similar to common or preferred stock of corporations.
- **Exchange-Traded Funds (“ETFs”).** An ETF is a fund whose shares are bought and sold on a securities exchange as if it were a single security. An ETF holds a portfolio of securities designed to track a particular market segment or index. Some examples of ETFs are SPDRs[®], DIAMONDSSM, NASDAQ 100 Index Tracking StockSM (“QQQsSM”), and iShares[®]. The Fund could purchase an ETF to temporarily gain exposure to a portion of the U.S. or foreign market while awaiting an opportunity to purchase securities directly. Similarly, the Fund may establish a short position in an ETF to gain inverse exposure to a portion of the U.S. or foreign markets. The risks of owning an ETF generally reflect the risks of owning the securities comprising the index which an index ETF is designed to track or the other holdings of an active or index ETF, although lack of liquidity in an ETF could result in it being more volatile than the tracked index or underlying holdings and ETFs have management fees that increase their costs versus the costs of owning the underlying holdings directly. See also “Securities of Other Investment Companies” below.
- **Warrants.** Warrants are instruments that entitle the holder to buy an equity security at a specific price for a specific period of time. Changes in the value of a warrant do not necessarily correspond to changes in the value of its underlying security. The price of a warrant may be more volatile than the price of its underlying

security, and a warrant may offer greater potential for capital appreciation as well as capital loss. Warrants do not entitle a holder to dividends or voting rights with respect to the underlying security and do not represent any rights in the assets of the issuing company. A warrant ceases to have value if it is not exercised prior to its expiration date. These factors can make warrants more speculative than other types of investments.

- **Convertible Securities.** Convertible securities are bonds, debentures, notes, preferred stocks or other securities that may be converted or exchanged (by the holder or by the issuer) into shares of the underlying common stock (or cash or securities of equivalent value) at a stated exchange ratio. A convertible security may also be called for redemption or conversion by the issuer after a particular date and under certain circumstances (including a specified price) established upon issue. If a convertible security held by the Fund is called for redemption or conversion, the Fund could be required to tender it for redemption, convert it into the underlying common stock, or sell it to a third party.

Convertible securities generally have less potential for gain or loss than common stocks. Convertible securities generally provide yields higher than the underlying common stocks, but generally lower than comparable non-convertible securities. Because of this higher yield, convertible securities generally sell at a price above their “conversion value,” which is the current market value of the stock to be received upon conversion. The difference between this conversion value and the price of convertible securities will vary over time depending on changes in the value of the underlying common stocks and interest rates. When the underlying common stocks decline in value, convertible securities will tend not to decline to the same extent because of the interest or dividend payments and the repayment of principal at maturity for certain types of convertible securities. However, securities that are convertible other than at the option of the holder generally do not limit the potential for loss to the same extent as securities convertible at the option of the holder. When the underlying common stocks rise in value, the value of convertible securities may also be expected to increase. At the same time, however, the difference between the market value of convertible securities and their conversion value will narrow, which means that the value of convertible securities will generally not increase to the same extent as the value of the underlying common stocks. Because convertible securities may also be interest-rate sensitive, their value may increase as interest rates fall and decrease as interest rates rise. Convertible securities are also subject to credit risk, and are often lower-quality securities.

General Risks of Investing in Stocks. While investing in stocks allows investors to participate in the benefits of owning a company, such investors must accept the risks of ownership. Unlike bondholders, who have preference to a company’s earnings and cash flow, preferred stockholders, followed by common stockholders in order of priority, are entitled only to the residual amount after a company meets its other obligations. For this reason, the value of a company’s stock will usually react more strongly to actual or perceived changes in the company’s financial condition or prospects than its debt obligations. Stockholders of a company that fares poorly can lose money.

Stock markets tend to move in cycles with short or extended periods of rising and falling stock prices. The value of a company’s stock may fall because of:

- Factors that directly relate to that company, such as decisions made by its management or lower demand for the company’s products or services;
- Factors affecting an entire industry, such as increases in production costs; and
- Changes in general financial market conditions that are relatively unrelated to the company or its industry, such as changes in interest rates, currency exchange rates or inflation rates.

Because preferred stock is generally junior to debt securities and other obligations of the issuer, deterioration in the credit quality of the issuer will cause greater changes in the value of a preferred stock than in a more senior debt security with similar stated yield characteristics.

Real Estate Investment Trusts (“REITs”). A REIT is a corporation or business trust (that would otherwise be taxed as a corporation) which meets the definitional requirements of the Internal Revenue Code of 1986, as amended (the “Code”). The Code permits a qualifying REIT to deduct from taxable income the dividends paid, thereby effectively eliminating corporate level federal income tax and making the REIT a pass-through vehicle for federal income tax purposes. To meet the definitional requirements of the Code, a REIT must, among other things: invest substantially all of its assets in interests in real estate (including mortgages and other REITs), cash and government securities; derive most of its income from rents from real property or interest on loans secured by mortgages on real property; and distribute annually 90% or more of its otherwise taxable income to shareholders.

REITs are sometimes informally characterized as Equity REITs and Mortgage REITs. An Equity REIT invests primarily in the fee ownership or leasehold ownership of land and buildings; a Mortgage REIT invests primarily in mortgages on real property, which may secure construction, development or long-term loans.

REITs may be affected by changes in underlying real estate values, which may have an exaggerated effect to the extent that REITs in which the Fund invests may concentrate investments in particular geographic regions or property types. Certain REITs have relatively small market capitalization, which may tend to increase the volatility of the market price of securities issued by such REITs. Additionally, rising interest rates may cause investors in REITs to demand a higher annual yield from future distributions, which may in turn decrease market prices for equity securities issued by REITs. Rising interest rates also generally increase the costs of obtaining financing, which could cause the value of the Fund’s investments to decline. During periods of declining interest rates, certain Mortgage REITs may hold mortgages that the mortgagors elect to prepay, which prepayment may diminish the yield on securities issued by such Mortgage REITs. Equity and Mortgage REITs are also subject to heavy cash flow dependency defaults by borrowers and self-liquidation. In addition, Mortgage REITs may be affected by the ability of borrowers to repay when due the debt extended by the REIT and Equity REITs may be affected by the ability of tenants to pay rent. The above factors may adversely affect a borrower’s or a lessee’s ability to meet its obligations to the REIT. In the event of default by a borrower or lessee, the REIT may experience delays in enforcing its rights as a mortgagee or lessor and may incur substantial costs associated with protecting its investments.

Furthermore, REITs are dependent upon specialized management skills, have limited diversification and are, therefore, subject to risks inherent in operating and financing a limited number of projects. By investing in REITs indirectly through the Fund, a shareholder will bear not only his proportionate share of the expenses of the Fund, but also, indirectly, similar expenses of the REITs. REITs depend generally on their ability to generate cash flow to make distributions to shareholders. In addition, REITs could possibly fail to qualify for tax free pass-through of income under the Code or to maintain their exemptions from registration under the 1940 Act.

Real Estate Companies’ Securities. The Funds may be subject to the risks associated with the direct ownership of real estate. For example, real estate values may fluctuate as a result of general and local economic conditions, overbuilding and increased competition, increases in property taxes and operating expenses, demographic trends and variations in rental income, changes in zoning laws, casualty or condemnation losses, regulatory limitations on rents, changes in neighborhood values, related party risks, changes in how appealing properties are to tenants, changes in interest rates and other real estate capital market influences.

Micro, Small and Medium Capitalization Issuers. Investing in equity securities of micro, small and medium capitalization companies often involves greater risk than is customarily associated with investments in larger

capitalization companies. This increased risk may be due to the greater business risks of smaller size, limited markets and financial resources, narrow product lines and frequent lack of depth of management. The securities of micro and smaller companies are often traded in the over-the-counter market and even if listed on a national securities exchange may not be traded in volumes typical for that exchange. Consequently, the securities of micro and smaller companies are less likely to be liquid, may have limited market stability, and may be subject to more abrupt or erratic market movements than securities of larger, more established growth companies or the market averages in general.

Initial Public Offerings (“IPOs”). The Fund may invest a portion of its assets in securities of companies offering shares in IPOs. IPOs may have a magnified performance impact on a fund with a small asset base. The Fund may hold IPO shares for a very short period of time, which may increase the turnover of the Fund’s portfolio and may lead to increased expenses for the Fund, such as commissions and transaction costs. By selling IPO shares, the Fund may realize taxable gains it will subsequently distribute to shareholders. In addition, the market for IPO shares can be speculative and/or inactive for extended periods of time. The limited number of shares available for trading in some IPOs may make it more difficult for the Fund to buy or sell significant amounts of shares without an unfavorable impact on prevailing prices. Holders of IPO shares can be affected by substantial dilution in the value of their shares, by sales of additional shares and by concentration of control in existing management and principal shareholders.

The Fund’s investment in IPO shares may include the securities of unseasoned companies (companies with less than three years of continuous operations), which presents risks considerably greater than common stocks of more established companies. These companies may have limited operating histories and their prospects for profitability may be uncertain. These companies may be involved in new and evolving businesses and, compared to their better-established, larger cap peers, may be more vulnerable to competition and changes in technology, markets and economic conditions. They may be more dependent on key managers and third parties and may have limited product lines.

Master Limited Partnerships. MLPs are limited partnerships or limited liability companies, whose partnership units or limited liability interests are listed and traded on a U.S. securities exchange, and are treated as publicly traded partnerships for federal income tax purposes. To qualify to be treated as a partnership for tax purposes, an MLP must receive at least 90% of its income from qualifying sources as set forth in Section 7704(d) of the Code. These qualifying sources include activities such as the exploration, development, mining, production, processing, refining, transportation, storage and marketing of mineral or natural resources. To the extent that an MLP’s interests are concentrated in a particular industry or sector, such as the energy sector, the MLP will be negatively impacted by economic events adversely impacting that industry or sector. MLPs that are formed as limited partnerships generally have two classes of owners, the general partner and limited partners, while MLPs that are formed as limited liability companies generally have two analogous classes of owners, the managing member and the members. For purposes of this section, references to general partners also apply to managing members and references to limited partners also apply to members.

The general partner is typically owned by a major energy company, an investment fund, the direct management of the MLP or is an entity owned by one or more of such parties. The general partner may be structured as a private or publicly traded corporation or other entity. The general partner typically controls the operations and management of the MLP through an equity interest of as much as 2% in the MLP plus, in many cases, ownership of common units and subordinated units. A holder of general partner interests can be liable under certain circumstances for amounts greater than the amount of the holder’s investment in the general partner interest. General partner interests are not publicly traded and generally cannot be converted into common units. The general partner interest can be redeemed by the MLP if the MLP unitholders choose to remove the general partner, typically with a supermajority vote by limited partner unitholders.

Limited partners own the remainder of the MLP through ownership of common units and have a limited role in the MLP's operations and management. Common units are listed and traded on U.S. securities exchanges, with their value fluctuating predominantly based on prevailing market conditions and the success of the MLP. Unlike owners of common stock of a corporation, owners of common units have limited voting rights and have no ability annually to elect directors. In the event of liquidation, common units have preference over subordinated units, but not over debt or preferred units, to the remaining assets of the MLP.

MLPs are typically structured such that common units and general partner interests have first priority to receive quarterly cash distributions up to an established minimum amount ("minimum quarterly distributions" or "MQD"). Common and general partner interests also accrue arrearages in distributions to the extent the MQD is not paid. Once common and general partner interests have been paid, subordinated units receive distributions of up to the MQD; however, subordinated units do not accrue arrearages. Distributable cash in excess of the MQD paid to both common and subordinated units is distributed to both common and subordinated units generally on a pro rata basis. The general partner is also eligible to receive incentive distributions if the general partner operates the business in a manner which results in distributions paid per common unit surpassing specified target levels. As the general partner increases cash distributions to the limited partners, the general partner receives an increasingly higher percentage of the incremental cash distributions. A common arrangement provides that the general partner can reach a tier where it receives 50% of every incremental dollar paid to common and subordinated unit holders. These incentive distributions encourage the general partner to streamline costs, increase capital expenditures and acquire assets in order to increase the partnership's cash flow and raise the quarterly cash distribution in order to reach higher tiers. Such results benefit all security holders of the MLP.

Foreign Securities. Foreign securities include equity securities of foreign entities, obligations of foreign branches of U.S. banks and of foreign banks, including, without limitation, European Certificates of Deposit, European Time Deposits, European Bankers' Acceptances, Canadian Time Deposits, Europaper and Yankee Certificates of Deposit, and investments in Canadian Commercial Paper and foreign securities. These instruments have investment risks that differ in some respects from those related to investments in obligations of U.S. domestic issuers. Such risks include future adverse political and economic developments, the possible imposition of withholding taxes on interest or other income, possible seizure, nationalization, or expropriation of foreign deposits, the possible establishment of exchange controls or taxation at the source, greater fluctuations in value due to changes in exchange rates, or the adoption of other foreign governmental restrictions which might adversely affect the payment of principal and interest on such obligations. Such investments may also entail higher custodial fees and sales commissions than domestic investments. Foreign issuers of securities or obligations are often subject to accounting treatment and engage in business practices different from those respecting domestic issuers of similar securities or obligations. Foreign branches of U.S. banks and foreign banks may be subject to less stringent reserve requirements than those applicable to domestic branches of U.S. banks.

Emerging Markets. An "emerging market" country is generally a country that the International Bank for Reconstruction and Development (World Bank) and the International Finance Corporation would consider to be an emerging or developing country. Typically, emerging markets are in countries that are in the process of industrialization, with lower gross national products ("GNPs") than more developed countries. There are currently over 130 countries that the international financial community generally considers to be emerging or developing countries, approximately 40 of which currently have stock markets. These countries generally include every nation in the world except the United States, Canada, Japan, Australia, New Zealand and most nations located in Western Europe.

Investment Funds. Some emerging countries currently prohibit direct foreign investment in the securities of their companies. Certain emerging countries, however, permit indirect foreign investment in the securities of companies listed and traded on their stock exchanges through investment funds that they have specifically

authorized. Investments in these investment funds are subject to the provisions of the 1940 Act. If the Fund invests in such investment funds, shareholders will bear not only their proportionate share of the expenses (including operating expenses and the fees of Fiera Capital Inc. (the “Adviser”)), but also will indirectly bear similar expenses of the underlying investment funds. In addition, these investment funds may trade at a premium over their NAV.

Risks of Foreign Securities:

Foreign securities, foreign currencies, and securities issued by U.S. entities with substantial foreign operations may involve significant risks in addition to the risks inherent in U.S. investments.

Political and Economic Factors. Local political, economic, regulatory, or social instability, military action or unrest, or adverse diplomatic developments may affect the value of foreign investments. Listed below are some of the more important political and economic factors that could negatively affect an investment in foreign securities:

- The economies of foreign countries may differ from the economy of the United States in such areas as growth of GNP, rate of inflation, capital reinvestment, resource self-sufficiency, budget deficits and national debt;
- Foreign governments sometimes participate to a significant degree, through ownership interests or regulation, in their respective economies. Actions by these governments could significantly influence the market prices of securities and payment of dividends;
- The economies of many foreign countries are dependent on international trade and their trading partners and they could be severely affected if their trading partners were to enact protective trade barriers and economic conditions;
- The internal policies of a particular foreign country may be less stable than in the United States. Other countries face significant external political risks, such as possible claims of sovereignty by other countries or tense and sometimes hostile border clashes; and
- A foreign government may act adversely to the interests of U.S. investors, including expropriation or nationalization of assets, confiscatory taxation and other restrictions on U.S. investment. A country may restrict or control foreign investments in its securities markets. These restrictions could limit the Fund’s ability to invest in a particular country or make it very expensive for the Fund to invest in that country. Some countries require prior governmental approval, limit the types or amount of securities or companies in which a foreigner can invest or may restrict the ability of foreign investors to repatriate their investment income and capital gains.

In June 2016, the United Kingdom (the “UK”) voted in a referendum to leave the European Union (“EU”). Although the precise timeframe for “Brexit” is uncertain, it is currently expected that the UK will seek to withdraw from the EU by invoking article 50 of the Lisbon Treaty with an anticipated completion date within two years from notifying the European Council of the UK’s intention to withdraw. It is unclear how withdrawal negotiations will be conducted and what the potential consequences may be. In addition, it is possible that measures could be taken to revote on the issue of Brexit, or that portions of the UK could seek to separate and remain a part of the EU. As a result of the political divisions within the UK and between the UK and the EU that the referendum vote has highlighted and the uncertain consequences of a Brexit, the UK and European economies and the broader global economy could be significantly impacted, which may result in increased volatility and illiquidity, and potentially lower economic growth on markets in the UK, Europe and globally that could potentially have an adverse effect on the value of the Fund’s investments.

Information and Supervision. There is generally less publicly available information about foreign companies than companies based in the United States. For example, there are often no reports and ratings published about

foreign companies comparable to the ones written about U.S. companies. Foreign companies are typically not subject to uniform accounting, auditing and financial reporting standards, practices and requirements comparable to those applicable to U.S. companies. The lack of comparable information makes investment decisions concerning foreign companies more difficult and less reliable than those concerning domestic companies.

Stock Exchange and Market Risk. The Fund's investment managers anticipate that in most cases an exchange or over-the-counter market located outside of the United States will be the best available market for foreign securities. Foreign stock markets, while growing in volume and sophistication, are generally not as developed as the markets in the United States. Foreign stock markets tend to differ from those in the United States in a number of ways.

Foreign stock markets:

- Are generally more volatile than, and not as developed or efficient as, those in the United States;
- Have substantially less volume;
- Trade securities that tend to be less liquid and experience rapid and erratic price movements;
- Have generally higher commissions and are subject to set minimum rates, as opposed to negotiated rates;
- Employ trading, settlement and custodial practices less developed than those in U.S. markets; and
- May have different settlement practices, which may cause delays and increase the potential for failed settlements.

Foreign markets may offer less protection to shareholders than U.S. markets because:

- Foreign accounting, auditing, and financial reporting requirements may render a foreign corporate balance sheet more difficult to understand and interpret than one subject to U.S. law and standards;
- Adequate public information on foreign issuers may not be available, and it may be difficult to secure dividends and information regarding corporate actions on a timely basis;
- In general, there is less overall governmental supervision and regulation of securities exchanges, brokers, and listed companies than in the United States;
- Over-the-counter markets tend to be less regulated than stock exchange markets and, in certain countries, may be totally unregulated;
- Economic or political concerns may influence regulatory enforcement and may make it difficult for shareholders to enforce their legal rights; and
- Restrictions on transferring securities within the United States or to U.S. persons may make a particular security less liquid than foreign securities of the same class that are not subject to such restrictions.

Foreign Currency Risk. While the Fund denominates its NAV in U.S. dollars, the securities of foreign companies are frequently denominated in foreign currencies. Thus, a change in the value of a foreign currency against the U.S. dollar will result in a corresponding change in value of securities denominated in that currency. Some of the factors that may impair the investments denominated in a foreign currency are:

- It may be expensive to convert foreign currencies into U.S. dollars and vice versa;
- Complex political and economic factors may significantly affect the values of various currencies, including the U.S. dollar, and their exchange rates;
- Government intervention may increase risks involved in purchasing or selling foreign currency options, forward contracts and futures contracts, since exchange rates may not be free to fluctuate in response to other market forces;

- There may be no systematic reporting of last sale information for foreign currencies or regulatory requirement that quotations available through dealers or other market sources be firm or revised on a timely basis;
- Available quotation information is generally representative of very large round-lot transactions in the inter-bank market and thus may not reflect exchange rates for smaller odd-lot transactions (less than \$1 million) where rates may be less favorable; and
- The inter-bank market in foreign currencies is a global, around-the-clock market. To the extent that a market is closed while the markets for the underlying currencies remain open, certain markets may not always reflect significant price and rate movements.

Taxes. Certain foreign governments levy withholding taxes on dividend and interest income. Although in some countries it is possible for the Fund to recover a portion of these taxes, the portion that cannot be recovered will reduce the income the Fund receives from its investments.

Emerging Markets. Investing in emerging markets may magnify the risks of foreign investing. Security prices in emerging markets can be significantly more volatile than those in more developed markets, reflecting the greater uncertainties of investing in less established markets and economies. In particular, countries with emerging markets may:

- Have relatively unstable governments;
- Present greater risks of nationalization of businesses, restrictions on foreign ownership and prohibitions on the repatriation of assets;
- Offer less protection of property rights than more developed countries; and
- Have economies that are based on only a few industries, may be highly vulnerable to changes in local or global trade conditions, and may suffer from extreme and volatile debt burdens or inflation rates.

Local securities markets may trade a small number of securities and may be unable to respond effectively to increases in trading volume, potentially making prompt liquidation of holdings difficult or impossible at times.

Money Market Securities. Money market securities include short-term U.S. government securities; custodial receipts evidencing separately traded interest and principal components of securities issued by the U.S. Treasury; commercial paper rated in the highest short-term rating category by a nationally recognized statistical ratings organization (“NRSRO”), such as Standard & Poor’s Rating Services (“S&P”) or Moody’s Investor Services, Inc. (“Moody’s”), or determined by the investment managers to be of comparable quality at the time of purchase; short-term bank obligations (certificates of deposit, time deposits and bankers’ acceptances) of U.S. commercial banks with assets of at least \$1 billion as of the end of their most recent fiscal year; and repurchase agreements involving such securities. Each of these money market securities are described below. For a description of ratings, see “Appendix A – Description of Ratings” to this SAI.

U.S. Government Securities. The Fund may invest in U.S. government securities. Securities issued or guaranteed by the U.S. government or its agencies or instrumentalities include U.S. Treasury securities, which are backed by the full faith and credit of the U.S. Treasury and which differ only in their interest rates, maturities, and times of issuance. U.S. Treasury bills have initial maturities of one-year or less; U.S. Treasury notes have initial maturities of one to ten years; and U.S. Treasury bonds generally have initial maturities of greater than ten years. U.S. Treasury notes and bonds typically pay coupon interest semi-annually and repay the principal at maturity. Certain U.S. government securities are issued or guaranteed by agencies or instrumentalities of the U.S. government including, but not limited to, obligations of U.S. government agencies or instrumentalities such as the Federal National Mortgage Association (“Fannie Mae”), the Government National Mortgage Association (“Ginnie Mae”), the Small Business Administration, the Federal Farm Credit Administration, the Federal Home

Loan Banks, Banks for Cooperatives (including the Central Bank for Cooperatives), the Federal Land Banks, the Federal Intermediate Credit Banks, the Tennessee Valley Authority, the Export-Import Bank of the United States, the Commodity Credit Corporation, the Federal Financing Bank, the Student Loan Marketing Association, the National Credit Union Administration and the Federal Agricultural Mortgage Corporation (“Farmer Mac”).

Some obligations issued or guaranteed by U.S. government agencies and instrumentalities, including, for example, Ginnie Mae pass-through certificates, are supported by the full faith and credit of the U.S. Treasury. Other obligations issued by or guaranteed by federal agencies, such as those securities issued by Fannie Mae, are supported by the discretionary authority of the U.S. government to purchase certain obligations of the federal agency. Additionally, some obligations are issued by or guaranteed by federal agencies, such as those of the Federal Home Loan Banks, which are supported by the right of the issuer to borrow from the U.S. Treasury. While the U.S. government provides financial support to such U.S. government-sponsored federal agencies, no assurance can be given that the U.S. government will always do so, since the U.S. government is not so obligated by law. Guarantees of principal by U.S. government agencies or instrumentalities may be a guarantee of payment at the maturity of the obligation so that in the event of a default prior to maturity there might not be a market and thus no means of realizing on the obligation prior to maturity. Guarantees as to the timely payment of principal and interest do not extend to the value or yield of these securities nor to the value of the Fund’s shares.

On September 7, 2008, the U.S. Treasury announced a federal takeover of Fannie Mae and the Federal Home Loan Mortgage Corporation (“Freddie Mac”), placing the two federal instrumentalities in conservatorship. Under the takeover, the U.S. Treasury agreed to acquire \$1 billion of senior preferred stock of each instrumentality and obtained warrants for the purchase of common stock of each instrumentality (the “Senior Preferred Stock Purchase Agreement” or “Agreement”). Under the Agreement, the U.S. Treasury pledged to provide up to \$200 billion per instrumentality as needed, including the contribution of cash capital to the instrumentalities in the event their liabilities exceed their assets. This was intended to ensure that the instrumentalities maintain a positive net worth and meet their financial obligations, preventing mandatory triggering of receivership. On December 24, 2009, the U.S. Treasury announced that it was amending the Agreement to allow the \$200 billion cap on the U.S. Treasury’s funding commitment to increase as necessary to accommodate any cumulative reduction in net worth through the end of 2012. The unlimited support the U.S. Treasury extended to the two companies expired at the beginning of 2013 – Fannie Mae’s support is now capped at \$125 billion and Freddie Mac has a limit of \$149 billion.

On August 17, 2012, the U.S. Treasury announced that it was again amending the Agreement to terminate the requirement that Fannie Mae and Freddie Mac each pay a 10% annual dividend. Instead, the companies will transfer to the U.S. Treasury on a quarterly basis all profits earned during a quarter that exceed a capital reserve amount of \$3 billion. It is believed that the new amendment puts Fannie Mae and Freddie Mac in a better position to service their debt because the companies no longer have to borrow from the U.S. Treasury to make fixed dividend payments. As part of the new terms, Fannie Mae and Freddie Mac also will be required to reduce their investment portfolios at an annual rate of 15% instead of the previous 10%, which puts each of them on track to cut their portfolios to a targeted \$250 billion in 2018.

Fannie Mae and Freddie Mac are the subject of several continuing class action lawsuits and investigations by federal regulators over certain accounting, disclosure or corporate governance matters, which (along with any resulting financial restatements) may adversely affect the guaranteeing entities. Importantly, the future of the entities is in serious question as the U.S. government reportedly is considering multiple options, ranging from nationalization, privatization, consolidation, or abolishment of the entities.

- **U.S. Treasury Obligations.** U.S. Treasury obligations consist of direct obligations of the U.S. Treasury, including Treasury bills, notes and bonds, and separately traded interest and principal component parts of

such obligations, including those transferable through the Federal book-entry system known as Separate Trading of Registered Interest and Principal of Securities (“STRIPS”). The STRIPS program lets investors hold and trade the individual interest and principal components of eligible Treasury notes and bonds as separate securities. Under the STRIPS program, the principal and interest components are separately issued by the U.S. Treasury at the request of depository financial institutions, which then trade the component parts separately.

Commercial Paper. Commercial paper is the term used to designate unsecured short-term promissory notes issued by corporations and other entities. Maturities on these issues vary from a few to 270 days.

Investment Grade Fixed Income Securities. Fixed income securities are considered investment grade if they are rated in one of the four highest rating categories by an NRSRO, or, if not rated, are determined to be of comparable quality by the investment managers. See “Appendix A – Description of Ratings” for a description of the bond rating categories of several NRSROs. Ratings of each NRSRO represent its opinion of the safety of principal and interest payments (and not the market risk) of bonds and other fixed income securities it undertakes to rate at the time of issuance. Ratings are not absolute standards of quality and may not reflect changes in an issuer’s creditworthiness. Fixed income securities rated BBB- or Baa3 lack outstanding investment characteristics, and have speculative characteristics as well. Securities rated Baa3 by Moody’s or BBB- by S&P or higher are considered by those rating agencies to be “investment grade” securities, although Moody’s considers securities rated in the Baa category to have speculative characteristics. While issuers of bonds rated BBB by S&P are considered to have adequate capacity to meet their financial commitments, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and principal for debt in this category than debt in higher rated categories. In the event a security owned by the Fund is downgraded below investment grade, the investment managers will review the situation and take appropriate action with regard to the security, including the actions discussed below.

Debt Securities. Corporations and governments use debt securities to borrow money from investors. Most debt securities promise a variable or fixed rate of return and repayment of the amount borrowed at maturity. Some debt securities, such as zero coupon bonds, do not pay current interest and are purchased at a discount from their face value.

Types of Debt Securities:

- **Corporate Bonds.** Corporations issue bonds and notes to raise money for working capital or for capital expenditures such as plant construction, equipment purchases and expansion. In return for the money loaned to the corporation by investors, the corporation promises to pay investors interest, and repay the principal amount of the bond or note.
- **Mortgage-Backed Securities.** Mortgage-backed securities are interests in pools of mortgage loans that various governmental, government-related and private organizations assemble as securities for sale to investors. Unlike most debt securities, which pay interest periodically and repay principal at maturity or on specified call dates, mortgage-backed securities make monthly payments that consist of both interest and principal payments. In effect, these payments are a “pass-through” of the monthly payments made by the individual borrowers on their mortgage loans, net of any fees paid to the issuer or guarantor of such securities. Since homeowners usually have the option of paying either part or all of the loan balance before maturity, the effective maturity of a mortgage-backed security is often shorter than is stated.

Governmental entities, private insurers and mortgage poolers may insure or guarantee the timely payment of interest and principal of these pools through various forms of insurance or guarantees, including

individual loan, title, pool and hazard insurance and letters of credit. The investment managers will consider such insurance and guarantees and the creditworthiness of the issuers thereof in determining whether a mortgage-related security meets its investment quality standards. It is possible that the private insurers or guarantors will not meet their obligations under the insurance policies or guarantee arrangements.

Although the market for such securities is becoming increasingly liquid, securities issued by certain private organizations may not be readily marketable.

Commercial Banks, Savings and Loan Institutions, Private Mortgage Insurance Companies, Mortgage Bankers and other Secondary Market Issuers. Commercial banks, savings and loan institutions, private mortgage insurance companies, mortgage bankers and other secondary market issuers also create pass-through pools of conventional mortgage loans. In addition to guaranteeing the mortgage-related security, such issuers may service and/or have originated the underlying mortgage loans. Pools created by these issuers generally offer a higher rate of interest than pools created by Ginnie Mae, Fannie Mae and Freddie Mac because they are not guaranteed by a government agency.

Risks of Mortgage-Backed Securities. Yield characteristics of mortgage-backed securities differ from those of traditional debt securities in a variety of ways. The most significant differences of mortgage-backed securities are: 1) payments of interest and principal are more frequent (usually monthly) and 2) falling interest rates generally cause individual borrowers to pay off their mortgage earlier than expected, which results in prepayments of principal on the securities, thus forcing the Fund to reinvest the money at a lower interest rate. In addition to risks associated with changes in interest rates, a variety of economic, geographic, social and other factors, such as the sale of the underlying property, refinancing or foreclosure, can cause investors to repay the loans underlying a mortgage-backed security sooner than expected. When prepayment occurs, the Fund may have to reinvest its principal at a rate of interest that is lower than the rate on existing mortgage-backed securities.

Other Asset-Backed Securities. These securities are interests in pools of a broad range of assets other than mortgages, such as automobile loans, computer leases and credit card receivables. Like mortgage-backed securities, these securities are pass-through. In general, the collateral supporting these securities is of shorter maturity than mortgage loans and is less likely to experience substantial prepayments with interest rate fluctuations, but may still be subject to prepayment risk.

Asset-backed securities present certain risks that are not presented by mortgage-backed securities. Primarily, these securities may not have the benefit of any security interest in the related assets, which raises the possibility that recoveries on repossessed collateral may not be available to support payments on these securities. For example, credit card receivables are generally unsecured and the debtors are entitled to the protection of a number of state and federal consumer credit laws, many of which allow debtors to reduce their balances by offsetting certain amounts owed on the credit cards. Most issuers of asset-backed securities backed by automobile receivables permit the servicers of such receivables to retain possession of the underlying obligations. If the servicer were to sell these obligations to another party, there is a risk that the purchaser would acquire an interest superior to that of the holders of the related asset-backed securities. Due to the quantity of vehicles involved and requirements under state laws, asset-backed securities backed by automobile receivables may not have a proper security interest in all of the obligations backing such receivables.

To lessen the effect of failures by obligors on underlying assets to make payments, the entity administering the pool of assets may agree to ensure the receipt of payments on the underlying pool occurs in a timely fashion ("liquidity protection"). In addition, asset-backed securities may obtain insurance, such as guarantees, policies or letters of credit obtained by the issuer or sponsor from third parties, for some or all of the assets in the pool

(“credit support”). Delinquency or loss more than that anticipated or failure of the credit support could adversely affect the return on an investment in such a security.

The Fund may also invest in residual interests in asset-backed securities, which consist of the excess cash flow remaining after making required payments on the securities and paying related administrative expenses. The amount of residual cash flow resulting from a particular issue of asset-backed securities depends in part on the characteristics of the underlying assets, the coupon rates on the securities, prevailing interest rates, the amount of administrative expenses and the actual prepayment experience on the underlying assets.

Senior Loans and Bank Loans. Senior loans and bank loans typically are arranged through private negotiations between a borrower and several financial institutions or a group of lenders which are represented by one or more lenders acting as agent. The agent is often a commercial bank that originates the loan and invites other parties to join the lending syndicate. The agent will be primarily responsible for negotiating the loan agreement and will have responsibility for the documentation and ongoing administration of the loan on behalf of the lenders after completion of the loan transaction. The Fund can invest in a senior loan or bank loan either as a direct lender or through an assignment or participation.

When the Fund acts as a direct lender, it will have a direct contractual relationship with the borrower and may participate in structuring the loan, may enforce compliance by the borrower with the terms of the loan agreement and may have voting, consent and set-off rights under the loan agreement.

Loan assignments are investments in all or a portion of certain senior loans or bank loans purchased from the lenders or from other third parties. The purchaser of an assignment typically will acquire direct rights against the borrower under the loan. While the purchaser of an assignment typically succeeds to all the rights and obligations of the assigning lender under the loan agreement, because assignments are arranged through private negotiations between potential assignees and assignors, or other third parties whose interests are being assigned, the rights and obligations acquired by the Fund may differ from and be more limited than those held by the assigning lender.

A holder of a loan participation typically has only a contractual right with the seller of the participation and not with the borrower or any other entities interpositioned between the seller of the participation and the borrower. As such, the purchaser of a loan participation assumes the credit risk of the seller of the participation, and any intermediary entities between the seller and the borrower, in addition to the credit risk of the borrower. When the Fund holds a loan participation, it will have the right to receive payments of principal, interest and fees to which it may be entitled only from the seller of the participation and only upon receipt of the seller of such payments from the borrower or from any intermediary parties between the seller and the borrower. Additionally, the Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement, will have no voting, consent or set-off rights under the loan agreement and may not directly benefit from the collateral supporting the loan although lenders that sell participations generally are required to distribute liquidation proceeds received by them pro rata among the holders of such participations. In the event of the bankruptcy or insolvency of the borrower, a loan participation may be subject to certain defenses that can be asserted by the borrower as a result of improper conduct by the seller or intermediary. If the borrower fails to pay principal and interest when due, the Fund may be subject to greater delays, expenses and risks than those that would have been involved if the Fund had purchased a direct obligation of such borrower.

Direct loans, assignments and loan participations may be considered liquid, as determined by the investment managers based on criteria approved by the Board.

The Fund may have difficulty disposing of senior loans or bank loans because, in certain cases, the market for such instruments is not highly liquid. The lack of a highly liquid secondary market may have an adverse impact on the value of such instruments and on the Fund’s ability to dispose of the loan in response to a specific

economic event, such as deterioration in the creditworthiness of the borrower. Furthermore, transactions in many loans settle on a delayed basis, and the Fund may not receive the proceeds from the sale of a loan for a substantial period of time after the sale. As a result, those proceeds will not be available to make additional investments or to meet the Fund's redemption obligations. To the extent that extended settlement creates short-term liquidity needs, the Fund may satisfy these needs by holding additional cash or selling other investments (potentially at an inopportune time, which could result in losses to the Fund).

Senior loans or bank loans may not be considered "securities," and purchasers, such as the Fund, therefore may not be entitled to rely on the anti-fraud protections of the federal securities laws.

The investment managers may from time to time have the opportunity to receive material, non-public information ("Confidential Information") about the borrower, including financial information and related documentation regarding the borrower that is not publicly available. Pursuant to applicable policies and procedures, the investment managers may (but are not required to) seek to avoid receipt of Confidential Information from the borrower so as to avoid possible restrictions on their ability to purchase and sell investments on behalf of the Fund and other clients to which such Confidential Information relates (e.g., publicly traded securities issued by the borrower). In such circumstances, the Fund (and other clients of the investment managers) may be disadvantaged in comparison to other investors, including with respect to the price the Fund pays or receives when it buys or sells a senior loan or bank loan. Further, the investment managers' abilities to assess the desirability of proposed consents, waivers or amendments with respect to certain senior loans or bank loans may be compromised if they are not privy to available Confidential Information. The investment managers may also determine to receive such Confidential Information in certain circumstances under their applicable policies and procedures. If the investment managers intentionally or unintentionally come into possession of Confidential Information, they may be unable, potentially for a substantial period of time, to purchase or sell publicly traded securities to which such Confidential Information relates.

Repurchase Agreements. The Fund may enter into repurchase agreements with financial institutions. A repurchase agreement is an agreement under which the Fund acquires a fixed income security (generally a security issued by the U.S. government or an agency thereof, a banker's acceptance, or a certificate of deposit) from a commercial bank, broker, or dealer, and simultaneously agrees to resell such security to the seller at an agreed upon price and date (normally, the next business day). Because the security purchased constitutes collateral for the repurchase obligation, a repurchase agreement may be considered a loan that is collateralized by the security purchased. The acquisition of a repurchase agreement may be deemed to be an acquisition of the underlying securities as long as the obligation of the seller to repurchase the securities is collateralized fully. The Fund follows certain procedures designed to minimize the risks inherent in such agreements. These procedures include effecting repurchase transactions only with creditworthy financial institutions whose condition will be continually monitored by the investment managers. The repurchase agreements entered into by the Fund will provide that the underlying collateral at all times shall have a value at least equal to 102% of the resale price stated in the agreement and consist only of securities permissible under Section 101(47)(A)(i) of the Bankruptcy Code (the investment managers monitor compliance with this requirement). Under all repurchase agreements entered into by the Fund, the custodian or its agent must take possession of the underlying collateral. In the event of a default or bankruptcy by a selling financial institution, the Fund will seek to liquidate such collateral. However, the exercising of the Fund's right to liquidate such collateral could involve certain costs or delays and, to the extent that proceeds from any sale upon a default of the obligation to repurchase were less than the repurchase price, the Fund could suffer a loss. The Fund may enter into "tri-party" repurchase agreements. In "tri-party" repurchase agreements, an unaffiliated third party custodian maintains accounts to hold collateral for the Fund and its counterparties and, therefore, the Fund may be subject to the credit risk of those custodians." It is the current policy of the Fund not to invest in repurchase agreements that do not mature within seven days if any such investment, together with any other illiquid assets held by the Fund, amounts to more than 15% of the Fund's total

assets. The investments of the Fund in repurchase agreements, at times, may be substantial when, in the view of the portfolio managers, liquidity or other considerations so warrant.

Reverse Repurchase Agreements. Reverse repurchase agreements are transactions in which the Fund sells portfolio securities to financial institutions, such as banks and broker-dealers, and agrees to repurchase them at a mutually agreed-upon date and price that is higher than the original sale price. Reverse repurchase agreements are similar to a fully collateralized borrowing by the Fund. At the time the Fund enters into a reverse repurchase agreement, it will earmark on the books of the Fund or place in a segregated account cash or liquid securities having a value equal to the repurchase price (including accrued interest) and will subsequently monitor the account to ensure that such equivalent value is maintained.

Reverse repurchase agreements involve risks. Reverse repurchase agreements are a form of leverage, and the use of reverse repurchase agreements by the Fund may increase the Fund's volatility. Reverse repurchase agreements are also subject to the risk that the other party to the reverse repurchase agreement will be unable or unwilling to complete the transaction as scheduled, which may result in losses to the Fund. Reverse repurchase agreements also involve the risk that the market value of the securities sold by the Fund may decline below the price at which it is obligated to repurchase the securities. In addition, when the Fund invests the proceeds it receives in a reverse repurchase transaction, there is a risk that those investments may decline in value. In this circumstance, the Fund could be required to sell other investments in order to meet its obligations to repurchase the securities.

Securities of Other Investment Companies. The Fund may invest in shares of other investment companies, to the extent permitted by applicable law and subject to certain restrictions. These investment companies typically incur fees that are separate from those fees incurred directly by the Fund. The Fund's purchase of such investment company securities results in the layering of expenses, such that shareholders would indirectly bear a proportionate share of the operating expenses of such investment companies, including advisory fees, in addition to paying the Fund's expenses. Unless an exception is available, Section 12(d)(1)(A) of the 1940 Act prohibits a fund from (i) acquiring more than 3% of the voting shares of any one investment company, (ii) investing more than 5% of its total assets in any one investment company, and (iii) investing more than 10% of its total assets in all investment companies combined, including its ETF investments.

For hedging or other purposes, the Fund may invest in investment companies that seek to track the composition and/or performance of specific indexes or portions of specific indexes. Certain of these investment companies, known as ETFs, are traded on a securities exchange. (See "Exchange Traded Funds" above). The market prices of index-based investments will fluctuate in accordance with changes in the underlying portfolio securities of the investment company and also due to supply and demand of the investment company's shares on the exchange upon which the shares are traded. Index-based investments may not replicate or otherwise match the composition or performance of their specified index due to transaction costs, among other things.

Pursuant to orders issued by the U.S. Securities and Exchange Commission (the "SEC") to each of certain iShares, Market Vectors, Vanguard, ProShares, PowerShares, Guggenheim (formerly, Claymore), Direxion, Wisdom Tree, Rydex, First Trust and SPDR ETFs and procedures approved by the Board, the Fund may invest in these ETFs in excess of the 3% limit described above, provided that the Fund otherwise complies with the conditions of the SEC order, as it may be amended, and any other applicable investment limitations. Neither these ETFs nor their investment advisers make any representations regarding the advisability of investing in the ETFs.

Derivatives

Derivatives are financial instruments whose value is based on an underlying asset (such as a stock or a bond), an underlying economic factor (such as interest rates) or a market benchmark. Unless otherwise stated in the Prospectus, the Fund may use derivatives for a number of purposes including managing risk, gaining exposure to various markets in a cost-efficient manner, reducing transaction costs, remaining fully invested and speculating. The Fund may also invest in derivatives with the goal of protecting itself from broad fluctuations in market prices, interest rates or foreign currency exchange rates (a practice known as “hedging”). When hedging is successful, the Fund will have offset any depreciation in the value of its portfolio securities by the appreciation in the value of the derivative position. Although techniques other than the sale and purchase of derivatives could be used to control the exposure of the Fund to market fluctuations, the use of derivatives may be a more effective means of hedging this exposure. In the future, to the extent such use is consistent with the Fund’s investment objective and is legally permissible, the Fund may use instruments and techniques that are not presently contemplated, but that may be subsequently developed.

There can be no assurance that a derivative strategy, if employed, will be successful. Because many derivatives have a leverage or borrowing component, adverse changes in the value or level of the underlying asset, reference rate or index can result in a loss substantially greater than the amount invested in the derivative itself. Certain derivatives have the potential for unlimited loss, regardless of the size of the initial investment. Accordingly, certain derivative transactions may be considered to constitute borrowing transactions for purposes of the 1940 Act. Such a derivative transaction will not be considered to constitute the issuance of a “senior security” by the Fund, and therefore such transaction will not be subject to the 300% asset coverage requirement otherwise applicable to borrowings by the Fund, if the Fund covers the transaction or segregates sufficient liquid assets (or such assets are “earmarked” on the Fund’s books) in accordance with the requirements and interpretations of the SEC and its staff. The Fund may enter into agreements with broker-dealers that require the broker-dealers to accept physical settlement for certain types of derivatives instruments. If this occurs, the Fund would treat such derivative instruments as being cash settled for purposes of determining the Fund’s coverage requirements.

Pursuant to rules adopted under the Commodity Exchange Act (“CEA”) by the Commodity Futures Trading Commission (“CFTC”), the Fund must either operate within certain guidelines and restrictions with respect to the Fund’s use of futures, options on such futures, commodity options and certain swaps, or the Adviser will be subject to registration with the CFTC as a “commodity pool operator” (“CPO”). As discussed in the Prospectus, the Adviser has registered as a CPO under the CEA with respect to the Fund.

Types of Derivatives:

Futures. A futures contract is an agreement between two parties whereby one party agrees to sell and the other party agrees to buy a specified amount of a financial instrument at an agreed upon price and time. The financial instrument underlying the contract may be a stock, stock index, bond, bond index, interest rate, foreign exchange rate or other similar instrument. Agreeing to buy the underlying financial instrument is called buying a futures contract or taking a long position in the contract. Likewise, agreeing to sell the underlying financial instrument is called selling a futures contract or taking a short position in the contract.

Futures contracts are traded in the United States on commodity exchanges or boards of trade (known as “contract markets”) approved for such trading and regulated by the CFTC. These contract markets standardize the terms, including the maturity date and underlying financial instrument, of all futures contracts.

Unlike other securities, the parties to a futures contract do not have to pay for or deliver the underlying financial instrument until some future date (the delivery date). Contract markets require both the purchaser and seller to deposit “initial margin” with a futures broker, known as a futures commission merchant or custodian bank, when they enter into the contract. Initial margin deposits are typically equal to a percentage of the contract’s value.

Initial margin is similar to a performance bond or good faith deposit on a contract and is returned to the depositing party upon termination of the futures contract if all contractual obligations have been satisfied. After they open a futures contract, the parties to the transaction must compare the purchase price of the contract to its daily market value. If the value of the futures contract changes in such a way that a party's position declines, that party must make additional "variation margin" payments so that the margin payment is adequate. On the other hand, the value of the contract may change in such a way that there is excess margin on deposit, possibly entitling the party that has a gain to receive all or a portion of this amount. This process is known as "marking to the market." Variation margin does not represent a borrowing or loan by a party but is instead a settlement between the party and the futures broker of the amount one party would owe the other if the futures contract terminated. In computing daily NAV, each party marks to market its open futures positions.

Although the terms of a futures contract call for the actual delivery of and payment for the underlying security, in many cases the parties may close the contract early by taking an opposite position in an identical contract. If the sale price upon closing out the contract is less than the original purchase price, the party closing out the contract will realize a loss. If the sale price upon closing out the contract is more than the original purchase price, the party closing out the contract will realize a gain. Conversely, if the purchase price upon closing out the contract is more than the original sale price, the party closing out the contract will realize a loss. If the purchase price upon closing out the contract is less than the original sale price, the party closing out the contract will realize a gain.

The Fund may incur commission expenses when it opens or closes a futures position.

Options. An option is a contract between two parties for the purchase and sale of a financial instrument for a specified price (known as the "strike price" or "exercise price") at any time during the option period. Unlike a futures contract, an option grants a right (not an obligation) to buy or sell a financial instrument. Generally, a seller of an option can grant a buyer two kinds of rights: a "call" (the right to buy the security) or a "put" (the right to sell the security). Options have various types of underlying instruments, including specific securities, indices of securities prices, foreign currencies, interest rates and futures contracts. Options may be traded on an exchange (exchange-traded options) or may be customized agreements between the parties (over-the-counter or "OTC" options). Like futures, a financial intermediary, known as a clearing corporation, financially backs exchange-traded options. However, OTC options have no such intermediary and are subject to the risk that the counterparty will not fulfill its obligations under the contract. The principal factors affecting the market value of an option include supply and demand, interest rates, the current market value of the underlying instrument relative to the exercise price of the option, the volatility of the underlying instrument, and the time remaining until the option expires.

▪ **Purchasing Put and Call Options**

When the Fund purchases a put option, it buys the right to sell the instrument underlying the option at a fixed strike price. In return for this right, the Fund pays the current market price for the option (known as the "option premium"). The Fund may purchase put options to offset or hedge against a decline in the market value of its securities ("protective puts") or to benefit from a decline in the price of securities that it does not own. The Fund would ordinarily realize a gain if, during the option period, the value of the underlying securities decreased below the exercise price sufficiently to cover the premium and transaction costs. However, if the price of the underlying instrument does not fall enough to offset the cost of purchasing the option, a put buyer would lose the premium and related transaction costs.

Call options are similar to put options, except that the Fund obtains the right to purchase, rather than sell, the underlying instrument at the option's strike price. The Fund would normally purchase call options in anticipation of an increase in the market value of securities it owns or wants to buy. The Fund would ordinarily realize a gain if, during the option period, the value of the underlying instrument exceeded the exercise price plus the premium

paid and related transaction costs. Otherwise, the Fund would realize either no gain or a loss on the purchase of the call option.

The purchaser of an option may terminate its position by:

- Allowing it to expire and losing its entire premium;
- Exercising the option and either selling (in the case of a put option) or buying (in the case of a call option) the underlying instrument at the strike price; or
- Closing it out in the secondary market at its current price.

▪ **Selling (Writing) Put and Call Options**

When the Fund writes a call option it assumes an obligation to sell specified securities to the holder of the option at a fixed strike price if the option is exercised at any time before the expiration date. Similarly, when the Fund writes a put option it assumes an obligation to purchase specified securities from the option holder at a fixed strike price if the option is exercised at any time before the expiration date. The Fund may terminate its position in an exchange-traded put option before exercise by buying an option identical to the one it has written. Similarly, the Fund may cancel an OTC option by entering into an offsetting transaction with the counterparty to the option.

The Fund could try to hedge against an increase in the value of securities it would like to acquire by writing a put option on those securities. If security prices rise, the Fund would expect the put option to expire and the premium it received to offset the increase in the security's value. If security prices remain the same over time, the Fund would hope to profit by closing out the put option at a lower price. If security prices fall, the Fund may lose an amount of money equal to the difference between the value of the security and the premium it received. Writing covered put options may deprive the Fund of the opportunity to profit from a decrease in the market price of the securities it would like to acquire.

The characteristics of writing call options are similar to those of writing put options, except that call writers expect to profit if prices remain the same or fall. The Fund could try to hedge against a decline in the value of securities it already owns by writing a call option. If the price of that security falls as expected, the Fund would expect the option to expire and the premium it received to offset the decline of the security's value. However, the Fund must be prepared to deliver the underlying instrument in return for the strike price, which may deprive it of the opportunity to profit from an increase in the market price of the securities it holds.

The Fund is permitted to write only "covered" options. At the time of selling a call option, the Fund may cover the option by owning, among other things:

- The underlying security (or securities convertible into the underlying security without additional consideration), index, interest rate, foreign currency or futures contract;
- A call option on the same security or index with the same or lesser exercise price;
- A call option on the same security or index with a greater exercise price, provided that the Fund also segregates cash or liquid securities in an amount equal to the difference between the exercise prices;
- Cash or liquid securities equal to at least the market value of the optioned securities, interest rate, foreign currency or futures contract; or

- In the case of an index, the portfolio of securities that corresponds to the index.

At the time of selling a put option, the Fund may cover the option by, among other things:

- Entering into a short position in the underlying security;
- Purchasing a put option on the same security, index, interest rate, foreign currency or futures contract with the same or greater exercise price;
- Purchasing a put option on the same security, index, interest rate, foreign currency or futures contract with a lesser exercise price and segregating cash or liquid securities in an amount equal to the difference between the exercise prices; or
- Maintaining the entire exercise price in liquid securities.

- **Options on Securities Indices**

Options on securities indices are similar to options on securities, except that the exercise of securities index options requires cash settlement payments and does not involve the actual purchase or sale of securities. In addition, securities index options are designed to reflect price fluctuations in a group of securities or segment of the securities market rather than price fluctuations in a single security.

- **Options on Credit Default Swaps**

An option on a credit default swap (“CDS”) gives the holder the right to enter into a CDS at a specified future date and under specified terms in exchange for a purchase price or premium. The writer of the option bears the risk of any unfavorable move in the value of the CDS relative to the market value on the exercise date, while the purchaser may allow the option to expire unexercised.

- **Options on Futures**

An option on a futures contract provides the holder with the right to buy a futures contract (in the case of a call option) or sell a futures contract (in the case of a put option) at a fixed time and price. Upon exercise of the option by the holder, the contract market clearing house establishes a corresponding short position for the writer of the option (in the case of a call option) or a corresponding long position (in the case of a put option). If the option is exercised, the parties will be subject to the futures contracts. In addition, the writer of an option on a futures contract is subject to initial and variation margin requirements on the option position. Options on futures contracts are traded on the same contract market as the underlying futures contract.

The buyer or seller of an option on a futures contract may terminate the option early by purchasing or selling an option of the same series (i.e., the same exercise price and expiration date) as the option previously purchased or sold. The difference between the premiums paid and received represents the trader’s profit or loss on the transaction.

The Fund may purchase put and call options on futures contracts instead of selling or buying futures contracts. The Fund may buy a put option on a futures contract for the same reasons it would sell a futures contract. It also

may purchase such a put option in order to hedge a long position in the underlying futures contract. The Fund may buy a call option on a futures contract for the same purpose as the actual purchase of a futures contract, such as in anticipation of favorable market conditions.

The Fund may write a call option on a futures contract to hedge against a decline in the prices of the instrument underlying the futures contracts. If the price of the futures contract at expiration were below the exercise price, the Fund would retain the option premium, which would offset, in part, any decline in the value of its portfolio securities.

The writing of a put option on a futures contract is similar to the purchase of the futures contracts, except that, if the market price declines, the Fund would pay more than the market price for the underlying instrument. The premium received on the sale of the put option, less any transaction costs, would reduce the net cost to the Fund.

▪ **Options on Foreign Currencies**

A put option on a foreign currency gives the purchaser of the option the right to sell a foreign currency at the exercise price until the option expires. A call option on a foreign currency gives the purchaser of the option the right to purchase the currency at the exercise price until the option expires. The Fund may purchase or write put and call options on foreign currencies for the purpose of hedging against changes in future currency exchange rates.

The Fund may use foreign currency options given the same circumstances under which it could use forward foreign currency exchange contracts. For example, a decline in the U.S. dollar value of a foreign currency in which the Fund's securities are denominated would reduce the U.S. dollar value of the securities, even if their value in the foreign currency remained constant. In order to hedge against such a risk, the Fund may purchase a put option on the foreign currency. If the value of the currency then declined, the Fund could sell the currency for a fixed amount in U.S. dollars and thereby offset, at least partially, the negative effect on its securities that otherwise would have resulted. Conversely, if the Fund anticipates a rise in the U.S. dollar value of a currency in which securities to be acquired are denominated, the Fund may purchase call options on the currency in order to offset, at least partially, the effects of negative movements in exchange rates. If currency exchange rates do not move in the direction or to the extent anticipated, the Fund could sustain losses on transactions in foreign currency options.

▪ **Combined Positions**

The Fund may purchase and write options in combination with each other, or in combination with futures or forward contracts or swap agreements, to adjust the risk and return characteristics of the overall position. For example, the Fund could construct a combined position whose risk and return characteristics are similar to selling a futures contract by purchasing a put option and writing a call option on the same underlying instrument. Alternatively, the Fund could write a call option at one strike price and buy a call option at a lower price to reduce the risk of the written call option in the event of a substantial price increase. Because combined options positions involve multiple trades, they result in higher transaction costs and may be more difficult to open and close out.

Forward Foreign Currency Exchange Contracts. A forward foreign currency contract involves an obligation to purchase or sell a specific amount of currency at a future date or date range at a specific price. In the case of a cancelable forward contract, the holder has the unilateral right to cancel the contract at maturity by paying a specified fee. Forward foreign currency exchange contracts differ from foreign currency futures contracts in certain respects. Unlike futures contracts, forward contracts:

- Do not have standard maturity dates or amounts (i.e., the parties to the contract may fix the maturity date and the amount);
- Are typically traded directly between currency traders (usually large commercial banks) and their customers in the inter-bank markets, as opposed to on exchanges regulated by the CFTC (note, however, that under new definitions adopted by the CFTC and SEC, many non-deliverable foreign currency forwards will be considered swaps for certain purposes, including determination of whether such instruments must be traded on exchanges and centrally cleared);
- Do not require an initial margin deposit; and
- May be closed by entering into a closing transaction with the currency trader who is a party to the original forward contract, as opposed to with a commodities exchange.

- **Foreign Currency Hedging Strategies**

A “settlement hedge” or “transaction hedge” is designed to protect the Fund against an adverse change in foreign currency values between the date a security is purchased or sold and the date on which payment is made or received. Entering into a forward contract for the purchase or sale of the amount of foreign currency involved in an underlying security transaction for a fixed amount of U.S. dollars “locks in” the U.S. dollar price of the security. The Fund may also use forward contracts to purchase or sell a foreign currency when it anticipates purchasing or selling securities denominated in foreign currency, even if it has not yet selected the specific investments.

The Fund may use forward contracts to hedge against a decline in the value of existing investments denominated in foreign currency. Such a hedge, sometimes referred to as a “position hedge,” would tend to offset both positive and negative currency fluctuations, but would not offset changes in security values caused by other factors. The Fund could also hedge the position by selling another currency expected to perform similarly to the currency in which the Fund’s investment is denominated. This type of hedge, sometimes referred to as a “proxy hedge,” could offer advantages in terms of cost, yield, or efficiency, but generally would not hedge currency exposure as effectively as a direct hedge into U.S. dollars. Proxy hedges may result in losses if the currency used to hedge does not perform similarly to the currency in which the hedged securities are denominated.

Transaction and position hedging do not eliminate fluctuations in the underlying prices of the securities that the Fund owns or intends to purchase or sell. They simply establish a rate of exchange that one can achieve at some future point in time. Additionally, these techniques tend to minimize the risk of loss due to a decline in the value of the hedged currency and to limit any potential gain that might result from the increase in value of such currency.

The Fund may enter into forward contracts to shift its investment exposure from one currency into another. Such transactions may call for the delivery of one foreign currency in exchange for another foreign currency, including currencies in which its securities are not then denominated. This may include shifting exposure from U.S. dollars to a foreign currency, or from one foreign currency to another foreign currency. This type of strategy, sometimes known as a “cross-hedge,” will tend to reduce or eliminate exposure to the currency that is sold, and increase exposure to the currency that is purchased. Cross-hedges may protect against losses resulting from a decline in the hedged currency but will cause the Fund to assume the risk of fluctuations in the value of the currency it purchases. Cross-hedging transactions also involve the risk of imperfect correlation between changes in the values of the currencies involved.

It is difficult to forecast with precision the market value of portfolio securities at the expiration or maturity of a forward or futures contract. Accordingly, the Fund may have to purchase additional foreign currency on the spot (cash) market if the market value of a security it is hedging is less than the amount of foreign currency it is obligated to deliver. Conversely, the Fund may have to sell on the spot market some of the foreign currency it received upon the sale of a security if the market value of such security exceeds the amount of foreign currency it is obligated to deliver.

Equity-Linked Securities. The Fund may invest in privately issued securities whose investment results are designed to correspond generally to the performance of a specified stock index or “basket” of securities, or sometimes a single stock (referred to as “equity-linked securities”). These securities are used for many of the same purposes as derivative instruments and share many of the same risks. Equity-linked securities may be considered illiquid and thus subject to the Fund’s restrictions on investments in illiquid securities.

Swap Agreements. A swap agreement is a financial instrument that typically involves the exchange of cash flows between two parties on specified dates (settlement dates), where the cash flows are based on agreed-upon prices, rates, indices, etc. The nominal amount on which the cash flows are calculated is called the notional amount. Swap agreements are individually negotiated and structured to include exposure to a variety of different types of investments or market factors, such as interest rates, foreign currency rates, mortgage securities, corporate borrowing rates, security prices or inflation rates.

Swap agreements may increase or decrease the overall volatility of the investments of the Fund and its share price. The performance of swap agreements may be affected by a change in the specific interest rate, currency, or other factors that determine the amounts of payments due to and from the Fund. If a swap agreement calls for payments by the Fund, the Fund must be prepared to make such payments when due. In addition, if the counterparty’s creditworthiness declined, the value of a swap agreement would be likely to decline, potentially resulting in losses.

Generally, swap agreements have a fixed maturity date that will be agreed upon by the parties. The agreement can be terminated before the maturity date under certain circumstances, such as default by one of the parties or insolvency, among others, and can be transferred by a party only with the prior written consent of the other party. The Fund may be able to eliminate its exposure under a swap agreement either by assignment or by other disposition, or by entering into an offsetting swap agreement with the same party or a similarly creditworthy party. If the counterparty is unable to meet its obligations under the contract, declares bankruptcy, defaults or becomes insolvent, the Fund may not be able to recover the money it expected to receive under the swap agreement. The Fund will not enter into any swap agreement unless the investment managers believe that the counterparty to the transaction is creditworthy.

A swap agreement can be a form of leverage, which can magnify the Fund’s gains or losses. In order to reduce the risk associated with leveraging, the Fund may cover its current obligations under swap agreements according to guidelines established by the SEC. If the Fund enters into a swap agreement on a net basis, it will segregate assets with a daily value at least equal to the excess, if any, of the Fund’s accrued obligations under the swap agreement over the accrued amount the Fund is entitled to receive under the agreement. If the Fund enters into a swap agreement on other than a net basis, it will segregate assets with a value equal to the full amount of the Fund’s accrued obligations under the swap agreement.

- **Equity Swaps**

In a typical equity swap, one party agrees to pay another party the return on a stock, stock index or basket of stocks in return for a specified interest rate. By entering into an equity index swap, for example, the index receiver can gain exposure to stocks making up the index of securities without actually purchasing those stocks.

Equity index swaps involve not only the risk associated with investment in the securities represented in the index, but also the risk that the performance of such securities, including dividends, will not exceed the return on the interest rate that the Fund will be committed to pay.

- **Total Return Swaps**

Total return swaps are contracts in which one party agrees to make payments of the total return from a reference instrument—which may be a single asset, a pool of assets or an index of assets—during a specified period, in return for payments equal to a fixed or floating rate of interest or the total return from another underlying reference instrument. The total return includes appreciation or depreciation on the underlying asset, plus any interest or dividend payments. Payments under the swap are based upon an agreed upon principal amount but, since the principal amount is not exchanged, it represents neither an asset nor a liability to either counterparty, and is referred to as notional. Total return swaps are marked to market daily using different sources, including quotations from counterparties, pricing services, brokers or market makers. The unrealized appreciation or depreciation related to the change in the valuation of the notional amount of the swap is combined with the amount due to the Fund at termination or settlement. The primary risks associated with total return swaps are credit risks (if the counterparty fails to meet its obligations) and market risk (if there is no liquid market for the swap or unfavorable changes occur to the underlying reference instrument).

- **Interest Rate Swaps**

Interest rate swaps are financial instruments that involve the exchange of one type of interest rate for another type of interest rate cash flow on specified dates in the future. Some of the different types of interest rate swaps are “fixed-for-floating rate swaps,” “termed basis swaps” and “index amortizing swaps.” Fixed-for-floating rate swaps involve the exchange of fixed interest rate cash flows for floating rate cash flows. Termed basis swaps entail cash flows to both parties based on floating interest rates, where the interest rate indices are different. Index amortizing swaps are typically fixed-for-floating rate swaps where the notional amount changes if certain conditions are met.

As with a traditional investment in a debt security, the Fund could lose money by investing in an interest rate swap if interest rates change adversely. For example, if the Fund enters into a swap where it agrees to exchange a floating rate of interest for a fixed rate of interest, the Fund may have to pay more money than it receives. Similarly, if the Fund enters into a swap where it agrees to exchange a fixed rate of interest for a floating rate of interest, the Fund may receive less money than it has agreed to pay.

- **Currency Swaps**

A currency swap is an agreement between two parties in which one party agrees to make interest rate payments in one currency and the other promises to make interest rate payments in another currency. The Fund may enter into a currency swap when it has one currency and desires a different currency. Typically, the interest rates that determine the currency swap payments are fixed, although occasionally one or both parties may pay a floating rate of interest. Unlike an interest rate swap, however, the principal amounts are exchanged at the beginning of the agreement and returned at the end of the agreement. Changes in foreign exchange rates and changes in interest rates, as described above, may negatively affect currency swaps.

- **Inflation Swaps**

Inflation swaps are fixed-maturity, over-the-counter derivatives where one party pays a fixed rate in exchange for payments tied to an inflation index, such as the Consumer Price Index. The fixed rate, which is set by the parties at the initiation of the swap, is often referred to as the “breakeven inflation” rate and generally represents the

current difference between treasury yields and Treasury Inflation Protected Securities yields of similar maturities at the initiation of the swap agreement. Inflation swaps are typically designated as “zero coupon,” where all cash flows are exchanged at maturity. The value of an inflation swap is expected to fluctuate in response to changes in the relationship between nominal interest rates and the rate of inflation. An inflation swap can lose value if the realized rate of inflation over the life of the swap is less than the fixed market implied inflation rate (the breakeven inflation rate) the investor agreed to pay at the initiation of the swap.

- **Credit Default Swaps**

A credit default swap is an agreement between a “buyer” and a “seller” for credit protection. The credit default swap agreement may have as reference obligations one or more securities that are not then held by the Fund. The protection buyer is generally obligated to pay the protection seller an upfront payment and/or a periodic stream of payments over the term of the agreement until a credit event on a reference obligation has occurred. If no default occurs, the seller would keep the stream of payments and would have no payment obligations. If a credit event occurs, the seller generally must pay the buyer the full notional amount (the “par value”) of the swap.

- **Caps, Collars and Floors**

Caps and floors have an effect similar to buying or writing options. In a typical cap or floor agreement, one party agrees to make payments only under specified circumstances, usually in return for payment of a fee by the other party. For example, the buyer of an interest rate cap obtains the right to receive payments to the extent that a specified interest rate exceeds an agreed-upon level. The seller of an interest rate floor is obligated to make payments to the extent that a specified interest rate falls below an agreed-upon level. An interest rate collar combines elements of buying a cap and selling a floor.

Risks of Derivatives:

While transactions in derivatives may reduce certain risks, these transactions themselves entail certain other risks. For example, unanticipated changes in interest rates, securities prices or currency exchange rates may result in a poorer overall performance of the Fund than if it had not entered into any derivatives transactions. Derivatives may magnify the Fund’s gains or losses, causing it to make or lose substantially more than it invested.

When used for hedging purposes, increases in the value of the securities the Fund holds or intends to acquire should offset any losses incurred with a derivative. Purchasing derivatives for purposes other than hedging could expose the Fund to greater risks.

Use of derivatives involves transaction costs, which may be significant, and may also increase the amount of taxable income to shareholders.

Correlation of Prices. The Fund’s ability to hedge its securities through derivatives depends on the degree to which price movements in the underlying index or instrument correlate with price movements in the relevant securities. In the case of poor correlation, the price of the securities the Fund is hedging may not move in the same amount, or even in the same direction as the hedging instrument. The investment managers will try to minimize this risk by investing in only those contracts whose behavior they expect to correlate with the behavior of the portfolio securities they are trying to hedge. However, if the investment managers’ prediction of interest and currency rates, market value, volatility or other economic factors is incorrect, the Fund may lose money, or may not make as much money as it expected.

Derivative prices can diverge from the prices of their underlying instruments, even if the characteristics of the underlying instruments are very similar to the derivative. Listed below are some of the factors that may cause such a divergence:

- Current and anticipated short-term interest rates, changes in volatility of the underlying instrument, and the time remaining until expiration of the contract;
- A difference between the derivatives and securities markets, including different levels of demand, how the instruments are traded, the imposition of daily price fluctuation limits or discontinued trading of an instrument; and
- Differences between the derivatives, such as different margin requirements, different liquidity of such markets and the participation of speculators in such markets.

Derivatives based upon a narrower index of securities, such as those of a particular industry group, may present greater risk than derivatives based on a broad market index. Since narrower indices are made up of a smaller number of securities, they are more susceptible to rapid and extreme price fluctuations because of changes in the value of those securities.

While currency futures and options values are expected to correlate with exchange rates, they may not reflect other factors that affect the value of the investments of the Fund. A currency hedge, for example, should protect a yen-denominated security from a decline in the yen, but will not protect the Fund against a price decline resulting from deterioration in the issuer's creditworthiness. Because the value of the Fund's foreign-denominated investments changes in response to many factors other than exchange rates, it may not be possible to match the amount of currency options and futures to the value of the Fund's investments precisely over time.

Lack of Liquidity. Before a futures contract or option is exercised or expires, the Fund can terminate it only by entering into a closing purchase or sale transaction. Moreover, the Fund may close out a futures contract only on the exchange the contract was initially traded. Although the Fund intends to purchase options and futures only where there appears to be an active market, there is no guarantee that such a liquid market will exist. If there is no secondary market for the contract, or the market is illiquid, the Fund may not be able to close out its position. In an illiquid market, the Fund may:

- Have to sell securities to meet its daily margin requirements at a time when it is disadvantageous to do so;
- Have to purchase or sell the instrument underlying the contract;
- Not be able to hedge its investments; and/or
- Not be able to realize profits or limit its losses.

Derivatives may become illiquid (i.e., difficult to sell at a desired time and price) under a variety of market conditions. For example:

- An exchange may suspend or limit trading in a particular derivative instrument, an entire category of derivatives or all derivatives, which sometimes occurs because of increased market volatility;
- Unusual or unforeseen circumstances may interrupt normal operations of an exchange;
- The facilities of the exchange may not be adequate to handle current trading volume;

- Equipment failures, government intervention, insolvency of a brokerage firm or clearing house or other occurrences may disrupt normal trading activity; or
- Investors may lose interest in a particular derivative or category of derivatives.

Management Risk. Successful use of derivatives by the Fund is subject to the ability of the investment managers to forecast stock market and interest rate trends. If the investment managers incorrectly predict stock market and interest rate trends, the Fund may lose money by investing in derivatives. For example, if the Fund were to write a call option based on the investment managers' expectation that the price of the underlying security would fall, but the price were to rise instead, the Fund could be required to sell the security upon exercise at a price below the current market price. Similarly, if the Fund were to write a put option based on the investment managers' expectation that the price of the underlying security would rise, but the price were to fall instead, the Fund could be required to purchase the security upon exercise at a price higher than the current market price.

Pricing Risk. At times, market conditions might make it hard to value some investments. For example, if the Fund has valued its securities too high, shareholders may end up paying too much for Fund shares when they buy into the Fund. If the Fund underestimates its price, shareholders may not receive the full market value for their Fund shares when they sell.

Margin. Because of the low margin deposits required upon the opening of a derivative position, such transactions involve an extremely high degree of leverage. Consequently, a relatively small price movement in a derivative may result in an immediate and substantial loss (as well as gain) to the Fund and it may lose more than it originally invested in the derivative.

If the price of a futures contract changes adversely, the Fund may have to sell securities at a time when it is disadvantageous to do so to meet its minimum daily margin requirement. The Fund may lose its margin deposits if a broker-dealer with whom it has an open futures contract or related option becomes insolvent or declares bankruptcy.

Volatility and Leverage. The Fund's use of derivatives may have a leveraging effect. Leverage generally magnifies the effect of any increase or decrease in value of an underlying asset and results in increased volatility, which means the Fund will have the potential for greater gains, as well as the potential for greater losses, than if the Fund does not use derivative instruments that have a leveraging effect. The prices of derivatives are volatile (i.e., they may change rapidly, substantially and unpredictably) and are influenced by a variety of factors, including:

- Actual and anticipated changes in interest rates;
- Fiscal and monetary policies; and
- National and international political events.

Most exchanges limit the amount by which the price of a derivative can change during a single trading day. Daily trading limits establish the maximum amount that the price of a derivative may vary from the settlement price of that derivative at the end of trading on the previous day. Once the price of a derivative reaches that value, the Fund may not trade that derivative at a price beyond that limit. The daily limit governs only price movements during a given day and does not limit potential gains or losses. Derivative prices have occasionally moved to the daily limit for several consecutive trading days, preventing prompt liquidation of the derivative.

Government Regulation. The regulation of derivatives markets in the U.S. is a rapidly changing area of law and is subject to modification by government and judicial action. In particular, the Dodd-Frank Wall Street Reform and Consumer Protection Act, signed into law in 2010, grants significant new authority to the SEC and the CFTC to impose comprehensive regulations on the over-the-counter and cleared derivatives markets. These regulations include, but are not limited to, mandatory clearing of certain derivatives and requirements relating to disclosure, margin and trade reporting. The new law and regulations may negatively impact the Fund by increasing transaction and/or regulatory compliance costs, limiting the availability of certain derivatives or otherwise adversely affecting the value or performance of the derivatives the Fund trades. In addition, the SEC proposed new derivatives rules in December 2015 that could limit the Fund's use of derivatives, and adversely impact the Fund's ability to achieve its investment objectives. Other potentially adverse regulatory obligations can develop suddenly and without notice.

Illiquid Securities. Illiquid securities are securities that cannot be sold or disposed of in the ordinary course of business (i.e. within seven days) at approximately the prices at which they are valued. Because of their illiquid nature, illiquid securities must be priced at fair value as determined in good faith pursuant to procedures approved by the Board. Despite such good faith efforts to determine fair value prices, the Fund's illiquid securities are subject to the risk that the security's fair value price may differ from the actual price which the Fund may ultimately realize upon its sale or disposition. Difficulty in selling illiquid securities may result in a loss or may be costly to the Fund. Under the supervision of the Board, the investment managers determine the liquidity of the Fund's investments. In determining the liquidity of the Fund's investments, the investment managers may consider various factors, including (1) the frequency and volume of trades and quotations, (2) the number of dealers and prospective purchasers in the marketplace, (3) dealer undertakings to make a market, and (4) the nature of the security and the market in which it trades (including any demand, put or tender features, the mechanics and other requirements for transfer, any letters of credit or other credit enhancement features, any ratings, the number of holders, the method of soliciting offers, the time required to dispose of the security, and the ability to assign or offset the rights and obligations of the security). The Fund will not hold more than 15% of its net assets in illiquid securities.

Securities Lending. The Fund may lend portfolio securities to brokers, dealers and other financial organizations that meet capital and other credit requirements or other criteria established by the Board. These loans, if and when made, may not exceed 33 1/3% of the total asset value of the Fund (including the loan collateral). The Fund will not lend portfolio securities to the investment managers or their affiliates unless permissible under the 1940 Act and the rules and promulgations thereunder. Loans of portfolio securities will be fully collateralized by cash, letters of credit or U.S. government securities, and the collateral will be maintained in an amount equal to at least 100% of the current market value of the loaned securities by marking to market daily. Any gain or loss in the market price of the securities loaned that might occur during the term of the loan would be for the account of the Fund.

The Fund may pay a part of the interest earned from the investment of collateral, or other fee, to an unaffiliated third party for acting as the Fund's securities lending agent, but will bear all of any losses from the investment of collateral.

By lending its securities, the Fund may increase its income by receiving payments from the borrower that reflect the amount of any interest or any dividends payable on the loaned securities as well as by either investing cash collateral received from the borrower in short-term instruments or obtaining a fee from the borrower when U.S. government securities or letters of credit are used as collateral. Investing cash collateral subjects the Fund to market risk. The Fund remains obligated to return all collateral to the borrower under the terms of its securities lending arrangements, even if the value of investments made with the collateral decline. Accordingly, if the value of a security in which the cash collateral has been invested declines, the loss would be borne by the Fund, and the

Fund may be required to liquidate other investments in order to return collateral to the borrower at the end of the loan. The Fund will adhere to the following conditions whenever its portfolio securities are loaned: (i) the Fund must receive at least 100% cash collateral or equivalent securities of the type discussed in the preceding paragraph from the borrower; (ii) the borrower must increase such collateral whenever the market value of the securities rises above the level of such collateral; (iii) the Fund must be able to terminate the loan on demand; (iv) the Fund must receive reasonable interest on the loan, as well as any dividends, interest or other distributions on the loaned securities and any increase in market value; (v) the Fund may pay only reasonable fees in connection with the loan (which fees may include fees payable to the lending agent, the borrower, the Fund's administrator and the custodian); and (vi) voting rights on the loaned securities may pass to the borrower, provided, however, that if a material event adversely affecting the investment occurs, the Fund must terminate the loan and regain the right to vote the securities. In such instances, the investment managers will vote the securities in accordance with their proxy voting policies and procedures. The Board has adopted procedures reasonably designed to ensure that the foregoing criteria will be met. Loan agreements involve certain risks in the event of default or insolvency of the borrower, including possible delays or restrictions upon the Fund's ability to recover the loaned securities or dispose of the collateral for the loan, which could give rise to loss because of adverse market action, expenses and/or delays in connection with the disposition of the underlying securities.

Restricted Securities. The Fund may purchase restricted securities. Restricted securities are securities that may not be sold freely to the public absent registration under the Securities Act of 1933, as amended (the "1933 Act") or an exemption from registration. This generally includes securities that are unregistered that can be sold to qualified institutional buyers in accordance with Rule 144A under the 1933 Act or securities that are exempt from registration under the 1933 Act, such as commercial paper. Institutional markets for restricted securities have developed as a result of the promulgation of Rule 144A under the 1933 Act, which provides a "safe harbor" from 1933 Act registration requirements for qualifying sales to institutional investors. When Rule 144A restricted securities present an attractive investment opportunity and meet other selection criteria, the Fund may make such investments whether or not such securities are "illiquid" depending on the market that exists for the particular security. The Board has delegated the responsibility for determining the liquidity of Rule 144A restricted securities that the Fund may invest in to the investment managers.

Short Sales. The Fund may engage in short sales that are either "uncovered" or "against the box." A short sale is "against the box" if at all times during which the short position is open, the Fund owns at least an equal amount of the securities or securities convertible into, or exchangeable without further consideration for, securities of the same issue as the securities that are sold short. A short sale against the box is a taxable transaction to the Fund with respect to the securities that are sold short.

Uncovered short sales are transactions under which the Fund sells a security it does not own. To complete such a transaction, the Fund must borrow the security to make delivery to the buyer. The Fund then is obligated to replace the security borrowed by purchasing the security at the market price at the time of the replacement. The price at such time may be more or less than the price at which the security was sold by the Fund. Until the security is replaced, the Fund is required to pay the lender amounts equal to any dividends or interest that accrue during the period of the loan. To borrow the security, the Fund also may be required to pay a premium, which would increase the cost of the security sold. The proceeds of the short sale will be retained by the broker, to the extent necessary to meet margin requirements, until the short position is closed out.

Until the Fund closes its short position or replaces the borrowed security, the Fund may: (a) segregate cash or liquid securities at such a level that the amount segregated plus the amount deposited with the broker as collateral will equal the current value of the security sold short; or (b) otherwise cover the Fund's short position.

When-Issued, Delayed-Delivery and Forward-Delivery Transactions. A when-issued security is one whose terms are available and for which a market exists, but which have not been issued. In a forward-delivery transaction, the Fund contracts to purchase securities for a fixed price at a future date beyond customary settlement time. “Delayed-delivery” refers to securities transactions on the secondary market where settlement occurs in the future. In each of these transactions, the parties fix the payment obligation and the interest rate that they will receive on the securities at the time the parties enter the commitment; however, they do not pay money or deliver securities until a later date. Typically, no income accrues on securities the Fund has committed to purchase before the securities are delivered, although the Fund may earn income on securities it has in a segregated account to cover its position. The Fund will only enter into these types of transactions with the intention of actually acquiring the securities, but may sell them before the settlement date.

The Fund may use when-issued, delayed-delivery and forward-delivery transactions to secure what it considers an advantageous price and yield at the time of purchase. When the Fund engages in when-issued, delayed-delivery or forward-delivery transactions, it relies on the other party to consummate the sale. If the other party fails to complete the sale, the Fund may miss the opportunity to obtain the security at a favorable price or yield.

When purchasing a security on a when-issued, delayed-delivery, or forward-delivery basis, the Fund assumes the rights and risks of ownership of the security, including the risk of price and yield changes. At the time of settlement, the market value of the security may be more or less than the purchase price. The yield available in the market when the delivery takes place also may be higher than those obtained in the transaction itself. Because the Fund does not pay for the security until the delivery date, these risks are in addition to the risks associated with its other investments.

The Fund will segregate cash or liquid securities equal in value to commitments for the when-issued, delayed-delivery or forward-delivery transactions. The Fund will segregate additional liquid assets daily so that the value of such assets is equal to the amount of the commitments.

Special Risks of Cyber Attacks. As with any entity that conducts business through electronic means in the modern marketplace, the Fund, and its service providers, may be susceptible to operational and information security risks resulting from cyber attacks. Cyber attacks include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized monitoring, release, misuse, loss, destruction or corruption of confidential information, unauthorized access to relevant systems, compromises to networks or devices that the Fund and its service providers use to service the Fund’s operations, operational disruption or failures in the physical infrastructure or operating systems that support the Fund and its service providers, or various other forms of cyber security breaches. Cyber attacks affecting the Fund or the Adviser, a Sub-Adviser, the Fund’s distributor, custodian, or any other of the Fund’s intermediaries or service providers may adversely impact the Fund and its shareholders, potentially resulting in, among other things, financial losses or the inability of Fund shareholders to transact business. For instance, cyber attacks may interfere with the processing of shareholder transactions, impact the Fund’s ability to calculate its NAV, cause the release of private shareholder information or confidential business information, impede trading, subject the Fund to regulatory fines or financial losses and/or cause reputational damage. The Fund may also incur additional costs for cyber security risk management purposes designed to mitigate or prevent the risk of cyber attacks. Such costs may be ongoing because threats of cyber attacks are constantly evolving as cyber attackers become more sophisticated and their techniques become more complex. Similar types of cyber security risks are also present for issuers of securities in which the Fund may invest, which could result in material adverse consequences for such issuers and may cause the Fund’s investments in such companies to lose value. There can be no assurance that the Fund, the Fund’s service providers, or the issuers of the securities in which the Fund invests will not suffer losses relating to cyber attacks or other information security breaches in the future.

INVESTMENT LIMITATIONS

Fundamental Policies

In addition to the investment objective of the Fund, the following investment limitations are fundamental, which means that the Fund cannot change them without approval by the vote of a majority of the outstanding shares of the Fund. The phrase “majority of the outstanding shares” means the vote of (i) 67% or more of the Fund’s shares present at a meeting, if more than 50% of the outstanding shares of the Fund are present or represented by proxy, or (ii) more than 50% of the Fund’s outstanding shares, whichever is less.

The Fund may not:

1. Purchase securities of an issuer that would cause the Fund to fail to satisfy the diversification requirement for a diversified management company under the 1940 Act, the rules or regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.
2. Concentrate investments in a particular industry or group of industries, as concentration is defined under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.
3. Borrow money or issue senior securities (as defined under the 1940 Act), except to the extent permitted under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.
4. Make loans, except to the extent permitted under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.
5. Purchase or sell commodities or real estate, except to the extent permitted under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.
6. Underwrite securities issued by other persons, except to the extent permitted under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.

Non-Fundamental Policies

The following limitations are non-fundamental and may be changed by the Board without shareholder approval.

The Fund may not:

1. Purchase securities of any issuer (except securities of other investment companies, securities issued or guaranteed by the U.S. government, its agencies or instrumentalities and repurchase agreements involving such securities) if, as a result, more than 5% of the total assets of the Fund would be invested in the securities of such issuer; or (ii) acquire more than 10% of the outstanding voting securities of any one issuer. This restriction applies to 75% of the Fund’s total assets.

2. Purchase any securities which would cause 25% or more of the total assets of the Fund to be invested in the securities of one or more issuers conducting their principal business activities in the same industry, provided that this limitation does not apply to investments in obligations issued or guaranteed by the U.S. government, its agencies or instrumentalities and repurchase agreements involving such securities. For purposes of this limitation, (i) utility companies will be classified according to their services, for example, gas distribution, gas transmission, electric and telephone will each be considered a separate industry; and (ii) financial service companies will be classified according to the end users of their services, for example, automobile finance, bank finance and diversified finance will each be considered a separate industry.
3. Borrow money from a bank in an amount exceeding 33 1/3% of the value of its total assets, provided that, for purposes of this limitation, investment strategies that either obligate the Fund to purchase securities or require the Fund to segregate assets are not considered to be borrowing.
4. Make loans if, as a result, more than 33 1/3% of its total assets would be lent to other parties, except that the Fund may: (i) purchase or hold debt instruments in accordance with its investment objective and policies; (ii) enter into repurchase agreements; and (iii) engage in securities lending as described in the SAI.
5. Purchase or sell real estate or real estate limited partnership interests, except that the Fund may purchase marketable securities issued by companies which own or invest in real estate (including REITs).
6. Purchase an investment if, as a result, more than 15% of the value of the Fund's net assets would be invested in illiquid securities.

In addition:

1. The Fund may purchase or sell financial and physical commodities, commodity contracts based on (or relating to) physical commodities or financial commodities and securities and derivative instruments whose values are derived from (in whole or in part) physical commodities or financial commodities.

The following descriptions of certain provisions of the 1940 Act may assist investors in understanding the above policies and restrictions:

Borrowing. The 1940 Act presently allows a fund to borrow from any bank in an amount up to 33 1/3% of its total assets (including the amount borrowed) and to borrow for temporary purposes in an amount not exceeding 5% of the value of its total assets. Transactions that are fully collateralized in a manner that does not involve the prohibited issuance of a "senior security" within the meaning of Section 18(f) of the 1940 Act, shall not be regarded as borrowings for the purposes of the Fund's investment restriction. Section 18(f) of the 1940 Act permits an investment company to borrow only from banks.

Concentration. The SEC has defined concentration as investing 25% or more of an investment company's total assets in any particular industry or group of industries, with certain exceptions. For purposes of the Fund's concentration policy, the Fund may classify and re-classify companies in a particular industry and define and re-define industries in any reasonable manner.

Diversification. Under the 1940 Act and the rules, regulations and interpretations thereunder, a "diversified company," as to 75% of its total assets, may not purchase securities of any issuer (other than obligations of, or guaranteed by, the U.S. government or its agencies, or instrumentalities or securities of other investment companies) if, as a result, more than 5% of its total assets would be invested in the securities of such issuer, or

more than 10% of the issuer's voting securities would be held by a fund.

Lending. Under the 1940 Act, an investment company may only make loans if expressly permitted by its investment policies.

Senior Securities. Senior securities may include any obligation or instrument issued by a fund evidencing indebtedness. The 1940 Act generally prohibits funds from issuing senior securities, although it does not treat certain transactions as senior securities, such as certain borrowings, short sales, reverse repurchase agreements, firm commitment agreements and standby commitments, with appropriate earmarking or segregation of assets to cover such obligation.

Underwriting. Under the 1940 Act, underwriting securities involves an investment company purchasing securities directly from an issuer for the purpose of selling (distributing) them or participating in any such activity either directly or indirectly. Under the 1940 Act, a diversified fund may not make any commitment as underwriter, if immediately thereafter the amount of its outstanding underwriting commitments, plus the value of its investments in securities of issuers (other than investment companies) of which it owns more than 10% of the outstanding voting securities, exceeds 25% of the value of its total assets.

Real Estate and Commodities. The 1940 Act does not directly restrict an investment company's ability to invest in real estate or commodities, but does require that every investment company have a fundamental investment policy governing such investments.

Except with respect to Fund policies concerning borrowing, if a percentage restriction is adhered to at the time of an investment, a later increase or decrease in percentage resulting from changes in values or assets will not constitute a violation of such restriction. With respect to the limitation on illiquid securities, in the event that a subsequent change in net assets or other circumstances causes the Fund to exceed its limitation, the Fund will take steps to bring the aggregate amount of illiquid instruments back within the limitations as soon as reasonably practicable. With respect to the limitation on borrowing, in the event that a subsequent change in net assets or other circumstances cause the Fund to exceed its limitation, the Fund will take steps to bring the aggregate amount of borrowing back within the limitations within three days thereafter (not including Sundays and holidays).

THE ADVISER AND SUB-ADVISERS

The Adviser.

General. Fiera Capital Inc. ("Fiera" or the "Adviser"), a Delaware corporation founded in 1972, is wholly owned by Fiera US Holding Inc., a U.S. holding company which in turn is wholly owned by Fiera Capital Corporation, a publicly traded Canadian investment management firm whose stock is listed on the Toronto Stock Exchange (FSZ: CN). Fiera is located at 375 Park Avenue, 8th Floor, New York, New York 10152. Fiera US Holding Inc. is located at 375 Park Avenue, 8th Floor, New York, New York 10152. Fiera Capital Corporation is located at 1501, avenue McGill College, bureau 800, Montreal (Quebec), Canada H3A 3M8. As of December 31, 2016, Fiera had approximately \$19.6 billion in assets under management.

Prior to September 1, 2016, Fiera Capital Management Company LLC ("Fiera Capital Management") served as the investment adviser to the Fund. Prior to July 11, 2016, Fiera Capital Management was known as Rothschild Larch Lane Management Company LLC.

Manager of Managers Structure. The Adviser acts as the manager of managers of the Fund and is

responsible for the investment performance of the Fund, since it allocates the Fund's assets to the sub-advisers and recommends hiring or changing sub-advisers to the Board. The Adviser has ultimate responsibility (subject to oversight by the Board) to oversee the sub-advisers and recommend their hiring, termination, and replacement. An exemptive order from the SEC permits the Adviser, subject to certain conditions, to select new sub-advisers with the approval of the Board but without obtaining shareholder approval, although any sub-advisory agreements with affiliates of the Trust, the Fund or the Adviser ("Affiliated Sub-Advisers") require shareholder approval. Except with respect to Affiliated Sub-Advisers, the order also permits (i) the Adviser to materially change the terms of agreements with the sub-advisers or to continue the employment of a sub-adviser after an event that would otherwise cause the automatic termination of services and (ii) the Fund to disclose sub-advisers' fees only in the aggregate in its registration statement. Any new sub-advisory agreement or any amendment to the Fund's existing investment advisory agreement or existing sub-advisory agreements that directly or indirectly results in an increase in the aggregate advisory fee rate payable by the Fund will be submitted to shareholders for approval. Further, the structure does not permit investment advisory fees paid by the Fund to the Adviser to be increased or to materially change the Adviser's obligations under the investment advisory agreement, including the Adviser's responsibility to monitor and oversee sub-advisory services furnished to the Fund, without shareholder approval. The manager of managers structure enables the Fund to operate with greater efficiency by not incurring the expense and delays associated with obtaining shareholder approval of sub-advisory agreements. This arrangement has been approved by the Board and the Fund's initial shareholder. Within 90 days of retaining a new sub-adviser for the Fund, shareholders of the Fund will receive notification of the change.

An affiliate of Mizuho Alternative Investments, LLC ("MAI"), one of the Fund's sub-advisers discussed below, provided seed capital to the Fund, and such seeding resulted in MAI being an Affiliated Sub-Adviser. Such seeding also raises a potential conflict of interest with respect to the Adviser's decisions to allocate Fund assets to, retain and/or terminate MAI. The Adviser believes that these conflicts are mitigated because: (i) the Adviser and MAI have agreed that MAI will be subject to the same retention, monitoring and oversight standards as any other Fund sub-adviser; (ii) the seed investment was not subject to any conditions relating to the Fund's initial or continued asset allocation to MAI; and (iii) initial approval of the MAI sub-advisory agreement (and all other sub-advisory agreements) and the agreement's continuation beyond a 2 year term remain, by law, subject to the separate review and approval by the Board, including its independent Trustees, and the Board expects to subject its review and consideration of the MAI sub-advisory agreement to at least the same standards it applies to the Fund's other sub-advisers.

Advisory and Sub-Advisory Agreements. The Trust and the Adviser have entered into an investment advisory agreement (the "Advisory Agreement"). Pursuant to the Advisory Agreement, the Adviser oversees the investment advisory services provided to the Fund and may directly manage a portion of the Fund's assets under certain circumstances. Pursuant to separate sub-advisory agreements (the "Sub-Advisory Agreements" and, together with the Advisory Agreement, the "Investment Advisory Agreements") with the Adviser, and under the supervision of the Adviser and the Board, one or more sub-advisers (the "Sub-Advisers") are responsible for the day-to-day investment management of all or a distinct portion of the assets of the Fund. The Sub-Advisers are also responsible for managing their employees who provide services to the Fund.

After its initial two year term, the continuance of each Investment Advisory Agreement must be specifically approved at least annually: (i) by the vote of the Trustees or by a vote of the majority of the outstanding voting securities of the Fund; and (ii) by the vote of a majority of the Trustees who are not parties to the Investment Advisory Agreement or "interested persons" of any party thereto, cast in person at a meeting called for the purpose of voting on such approval. The Advisory Agreement will terminate automatically in the event of its assignment, and is terminable at any time without penalty by the Board or by a majority of the outstanding voting securities of the Fund or, by the Adviser, on not less than 30 days' nor more than 60 days' written notice to the

Trust. A Sub-Advisory Agreement will terminate automatically in the event of its assignment, and is terminable at any time without penalty by the Trustees or by a majority of the outstanding voting securities of the Fund, by the Adviser on not less than 30 days' nor more than 60 days' written notice to the applicable Sub-Adviser, or by the Sub-Adviser on not less than 30 days' nor more than 60 days' (or, in the case of MAI, on not less than 90 days') written notice to the Adviser.

Advisory Fees Paid to the Adviser and the Sub-Advisers. For its services to the Fund, the Adviser is entitled to a fee, which is calculated daily and paid monthly, at an annual rate of 1.75% based on the average daily net assets of the Fund. Fiera Capital Management was entitled to the same fee. The Adviser pays the sub-advisers out of the advisory fees it receives from the Fund, and pays MAI a fee, which is calculated daily and paid monthly, at an annual rate of 1.00% based on the average daily net assets that MAI manages for the Fund. Each Sub-Adviser participates in a capital allocation program that allows the excess cash held by one Sub-Adviser ("Sub-Adviser A") to be reallocated to another Sub-Adviser ("Sub-Adviser B") at the direction of the Adviser and provides that the Adviser will compensate both Sub-Adviser A and Sub-Adviser B without regard to the amount of excess cash allocated from Sub-Adviser A or allocated to Sub-Adviser B.

The Adviser has contractually agreed to reduce fees and reimburse expenses to the extent necessary to keep Total Annual Fund Operating Expenses after Fee Reductions and/or Expense Reimbursements (excluding any class-specific expenses, Dividend and Interest Expenses on Securities Sold Short, interest, taxes, brokerage commissions, acquired fund fees and expenses and non-routine expenses) from exceeding 2.50% with respect to Investor Class shares and Institutional Class shares of the Fund's average daily net assets until February 28, 2018 (the "Expense Limitation"). The Adviser may recover all or a portion of its fee reductions or expense reimbursements within a three-year period from the year in which it reduced its fee or reimbursed expenses if the Fund's Total Annual Fund Operating Expenses are below the Expense Limitation. This agreement may be terminated: (i) by the Board for any reason at any time, or (ii) by the Adviser, upon ninety (90) days' prior written notice to the Trust, effective as of the close of business on February 28, 2018. Fiera Capital Management had contractually agreed to the same Expense Limitation.

For the fiscal years ended October 31, 2014, 2015 and 2016, the following advisory fees were paid to the Fund's investment advisers:

| Contractual Advisory Fees | | | Fees Paid by Adviser to MAI | | | Fees Paid by Adviser to Unaffiliated Sub-Advisers | | | Fees Waived by Adviser | | |
|---------------------------|-------------|-------------|-----------------------------|-----------|-----------|---|-----------|-----------|------------------------|-----------|-----------|
| 2014 ¹ | 2015 | 2016 | 2014 ¹ | 2015 | 2016 | 2014 ¹ | 2015 | 2016 | 2014 ¹ | 2015 | 2016 |
| \$225,212 | \$1,025,999 | \$1,039,161 | \$32,671 | \$143,790 | \$152,137 | \$79,219 | \$357,582 | \$365,995 | \$135,556 | \$361,441 | \$169,442 |

| Fees Retained by Adviser | | | Fees Paid to Adviser and MAI | | |
|--------------------------|-----------|-----------|------------------------------|-----------|-----------|
| 2014 ¹ | 2015 | 2016 | 2014 ¹ | 2015 | 2016 |
| \$0 ² | \$163,186 | \$351,587 | \$32,671 | \$306,976 | \$503,724 |

1 Represents the fiscal period from July 25, 2014 (commencement of Fund operations) to October 31, 2014.

2 For the fiscal period from July 25, 2014 (commencement of Fund operations) to October 31, 2014, Rothschild Larch Lane Management Company LLC additionally reimbursed fees of \$22,234 for the Fund to maintain the stated expense cap under its contractual expense limitation agreement with the Fund.

The Sub-Advisers.

Acadian Asset Management LLC. Acadian Asset Management LLC ("Acadian"), a Delaware limited liability company formed in 1986, located at 260 Franklin Street, Boston, Massachusetts 02110, serves as investment sub-

adviser to a portion of the Fund's assets. Acadian is a subsidiary of OMAM Affiliate Holdings LLC, which is an indirect wholly owned subsidiary of Old Mutual plc, a publicly listed company on the NYSE. As of December 31, 2016, Acadian had approximately \$74 billion in assets under management.

Ellington Management Group, L.L.C. Ellington Management Group, L.L.C. ("Ellington"), a Delaware limited liability company formed in 1995, located at 53 Forest Avenue, Old Greenwich, Connecticut 06870, serves as investment sub-adviser to a portion of the Fund's assets. Ellington has been in business since 1995 and is owned primarily by Michael Vranos indirectly through his ownership interest in Ellington's majority owner, EMG Holdings, L.P. As of December 31, 2016, Ellington had approximately \$5.9 billion in assets under management.

Karya Capital Management LP. Karya Capital Management LP ("Karya"), a Delaware limited partnership formed in 2011, located at 1330 Avenue of the Americas, Suite 520, New York, New York 10019, serves as investment sub-adviser to a portion of the Fund's assets. Karya is principally owned by Dr. Rajiv Sobti. Dr. Sobti is also Karya's Chief Investment Officer. As of December 31, 2016, Karya had approximately \$1.088 billion in assets under management.

Mizuho Alternative Investments, LLC. MAI, a Delaware limited liability company, located at 757 Third Avenue, 8th Floor, New York, New York 10017, serves as investment sub-adviser to a portion of the Fund's assets. MAI was founded in 2007 and is wholly owned by Mizuho Americas LLC, a US bank holding company, that is wholly owned by Mizuho Financial Group, Inc. ("Mizuho Group"), a publicly traded company listed on the Tokyo Stock Exchange and New York Stock Exchange (American Depositary Receipts). As of December 31, 2016, MAI had assets under management of approximately \$1.429 billion on a discretionary basis and approximately \$2.409 billion on a non-discretionary basis, including a \$2.404 billion non-discretionary structured credit portfolio of MAI's parent company.

THE PORTFOLIO MANAGERS

This section includes information about the Fund's portfolio managers, including information about other accounts they manage, the dollar range of Fund shares they own and how they are compensated.

The Adviser.

Compensation. Compensation for Mr. Doyle is a combination of a fixed salary and a bonus. Mr. Doyle is eligible to participate in the annual bonus plan beginning in 2017, any payments related to which would be made in March 2018. Currently, Mr. Jurish's compensation is based on a fixed salary, but he is eligible to participate in a revenue sharing plan in the future. The bonus paid to eligible portfolio managers for any year may be tied, in part, to the performance of the Fund or any other fund managed by the Adviser during such year as compared to the performance of the HFRX Global Hedge Fund Index or another index or indices deemed relevant by the senior management of the Adviser. The amount of salary and bonus paid to the eligible portfolio managers is based on a variety of factors, including the financial performance of the Adviser, execution of managerial responsibilities, client interactions and teamwork support. As part of their compensation, the portfolio managers also have 401(k) plans that enable them to direct a percentage of their pre-tax salary and bonus (matched up to 4% by the Adviser) into a tax-qualified retirement plan and may also be eligible to participate in revenue-sharing plans with the Adviser.

Fund Shares Owned by Portfolio Managers. The Fund is required to show the dollar amount range of each portfolio manager's "beneficial ownership" of shares of the Fund as of the end of the most recently completed fiscal year. Dollar amount ranges disclosed are established by the SEC. "Beneficial ownership" is determined in accordance with Rule 16a-1(a)(2) under the Securities Exchange Act of 1934, as amended (the "1934 Act").

| | Dollar Range of Fund Shares ¹ |
|---------------------------|--|
| Fiera Capital Inc. | |
| Geoffrey B. Doyle | \$50,001-\$100,000 |
| Mark A. Jurish | \$100,001-\$500,000 |

¹ Valuation date is October 31, 2016.

Other Accounts. In addition to the Fund, the portfolio managers may also be responsible for the day-to-day management of certain other accounts, as indicated by the following table. The information below is provided as of October 31, 2016.

| Name | Registered Investment Companies | | Other Pooled Investment Vehicles | | Other Accounts | |
|-------------------|---------------------------------|--------------|----------------------------------|----------------------------|--------------------|--------------|
| | Number of Accounts | Total Assets | Number of Accounts | Total Assets (in Millions) | Number of Accounts | Total Assets |
| Geoffrey B. Doyle | 0 | \$0 | 8 ¹ | \$277 | 0 | \$0 |
| Mark A. Jurish | 0 | \$0 | 8 ¹ | \$277 | 0 | \$0 |

¹ Includes 2 accounts with assets under management of \$159 million that are subject to performance-based advisory fees.

Conflicts of Interest. A potential conflict of interest may arise as a result of the Adviser's portfolio managers' management of the Fund and other accounts managed by the portfolio managers ("Other Accounts"), which, in theory, may allow them to allocate investment opportunities in a way that favors Other Accounts over the Fund. This conflict of interest may be exacerbated to the extent that the Adviser or its portfolio managers receive, or expect to receive, greater compensation from their management of the Other Accounts (many of which receive a base and incentive fee) than from the Fund. Notwithstanding this theoretical conflict of interest, it is the Adviser's policy to manage each account based on its investment objectives and related restrictions and the Adviser has adopted policies and procedures reasonably designed to allocate investment opportunities on a fair and equitable basis over time and in a manner consistent with each account's investment objectives and related restrictions. For example, while the Adviser's portfolio managers may buy for Other Accounts securities that differ in identity or quantity from securities bought for the Fund, such securities might not be suitable for the Fund given its structure, investment objectives and related restrictions.

Acadian.

Compensation. Compensation structure varies among professionals, although the basic package involves a generous base salary, strong bonus potential, profit sharing potential, various fringe benefits, and, among the majority of senior investment professionals and certain other key employees, equity ownership in the firm as part of the Acadian Key Employee Limited Partnership ("KELP").

Compensation is highly incentive-driven, with Acadian paying up to and sometimes in excess of 100% of base pay for performance bonuses. Bonuses are tied directly to the individual's contribution and performance during the year, with members of the investment team evaluated on such factors as their contributions to the investment process, account retention, portfolio performance, asset growth, and overall firm performance. Since portfolio management is a team approach, investment team members' compensation is not linked to the performance of specific accounts but rather to the individual's overall contribution to the success of the team and the firm's profitability.

Fund Shares Owned by Portfolio Manager. The Fund is required to show the dollar amount range of the portfolio manager’s “beneficial ownership” of shares of the Fund as of the end of the most recently completed fiscal year. Dollar amount ranges disclosed are established by the SEC. “Beneficial ownership” is determined in accordance with Rule 16a-1(a)(2) under the 1934 Act.

| Dollar Range of Fund Shares¹ | |
|--|------|
| <u>Acadian</u> | |
| Alexandre Voitenok | None |

¹ Valuation date is October 31, 2016.

Other Accounts. In addition to the Fund, the portfolio manager may also be responsible for the day-to-day management of certain other accounts, as indicated by the following table. The information below is provided as of October 31, 2016.

| | Registered Investment Companies | | Other Pooled Investment Vehicles | | Other Accounts | |
|--------------------|--|-----------------------------------|---|-----------------------------------|---------------------------|---------------------|
| | Number of Accounts | Total Assets (in Millions) | Number of Accounts | Total Assets (in Millions) | Number of Accounts | Total Assets |
| Alexandre Voitenok | 2 | \$106.5 | 5 ¹ | \$195.1 | 0 | \$0 |

¹ Includes 1 account with assets under management of \$3.1 million that is subject to performance-based advisory fees.

Conflicts of Interest. A conflict of interest may arise as a result of the portfolio manager being responsible for multiple accounts, including the Fund, which may have similar investment guidelines and objectives. In addition to the Fund, these accounts may include other mutual funds managed on an advisory or sub-advisory basis, separate accounts and collective trust accounts. An investment opportunity may be suitable for the Fund as well as for any of the other managed accounts. However, the investment may not be available in sufficient quantity for all of the accounts to participate fully. In addition, there may be limited opportunity to sell an investment held by both the Fund and the other accounts. The portfolio manager may be responsible for accounts that have different advisory fee schedules, which may create the incentive for the portfolio manager to favor one account over another in terms of access to investment opportunities. The portfolio manager may also manage accounts whose investment objectives and policies differ from those of the Fund, which may cause the portfolio manager to effect trading in one account that may have an adverse effect on the value of the holdings within another account, including the Fund.

To address and manage these potential conflicts of interest, Acadian has adopted compliance policies and procedures to allocate investment opportunities and to ensure that each of its clients is treated on a fair and equitable basis. Such policies and procedures include, but are not limited to, trade allocation and trade aggregation policies and oversight by investment management and the compliance team.

Ellington.

Compensation. Compensation for the portfolio manager is a combination of a fixed salary and a bonus. The bonus paid to the portfolio manager for any year may be tied, in part, to the performance of the Fund or any other fund managed by Ellington using the portfolio manager’s investment strategies. In addition, a portion of the salary and bonus paid to the portfolio manager may be based on a variety of factors, including the financial performance of Ellington, execution of the portfolio manager’s responsibilities, client interactions and the collaboration of the portfolio manager with other of Ellington’s personnel.

Fund Shares Owned by Portfolio Manager. The Fund is required to show the dollar amount range of the portfolio manager’s “beneficial ownership” of shares of the Fund as of the end of the most recently completed fiscal year. Dollar amount ranges disclosed are established by the SEC. “Beneficial ownership” is determined in accordance with Rule 16a-1(a)(2) under the 1934 Act.

| Dollar Range of Fund Shares ¹ | |
|--|------|
| Ellington | |
| Rasheed Sabar | None |

¹ Valuation date is October 31, 2016.

Other Accounts. In addition to the Fund, the portfolio manager may also be responsible for the day-to-day management of certain other accounts, as indicated by the following table. The information below is provided as of October 31, 2016.

| Name | Registered Investment Companies | | Other Pooled Investment Vehicles | | Other Accounts | |
|---------------|---------------------------------|----------------------------|----------------------------------|----------------------------|--------------------|----------------------------|
| | Number of Accounts | Total Assets (in Millions) | Number of Accounts | Total Assets (in Millions) | Number of Accounts | Total Assets (in Millions) |
| Rasheed Sabar | 1 | \$0.22 | 3 ¹ | \$35.09 | 4 ² | \$357.47 |

¹ Includes 2 accounts with assets under management of \$27.36 million that are subject to performance-based advisory fees.

² These accounts are subject to performance-based advisory fees.

Conflicts of Interest. In addition to the sub-advisory services provided to the Fund, Ellington Management Group, L.L.C. and its affiliates (together “Ellington” or the “Ellington Group”) provide investment management services to private, pooled investment vehicles, public companies, and institutional managed accounts (together “Clients” or “Client Accounts”). Ellington, other members of the Ellington Group, and Ellington’s employees and other related persons have interests in certain of these Client Accounts. In some cases, the Ellington Group may have invested in or hold shares of a Client Account, or may own most or all of an Account. In some cases, members of the Ellington Group may receive performance-based fees from a Client Account though Ellington does not receive such fees from the Fund. For all these reasons, Ellington may have differing interests with respect to different Client Accounts, including the Fund, or with respect to individual transactions or investments made by or contemplated for those Accounts. Conflicts of interest among Client Accounts, for example when they compete for limited investment opportunities, may be more pronounced because of differing direct or indirect interests of Ellington or its affiliates with respect to those Accounts.

Set forth below is a summary of some of the circumstances in which such conflicts of interest may and do arise:

Allocation of Investment Opportunities and Order Aggregation

Ellington exercises reasonable, good faith judgment when determining which investment opportunities are appropriate for each Client Account. Investment opportunities are generally allocated on the basis of capital available for such opportunities and other relevant factors particular to an Account, including, but not limited to, the strategy pursued for the Account and applicable investment restrictions, tax considerations, Employee Retirement Income Security Act and other regulatory considerations, risk parameters, a Client’s pre-existing position, and the appropriate overall composition of each Client Account. Ellington may at times allocate opportunities on a preferential basis to Client Accounts that are in a “start-up” or “ramp-up” phase or to re-balance Accounts following the addition of capital to or withdrawal of capital from one or more Client Accounts.

Because Ellington allocates investment opportunities among multiple Client Accounts, conflicts may arise when certain Client Accounts seek to sell investments when other Client Accounts hold similar or the same investments. For example, Client Accounts in liquidation or wind-down, or Client Accounts with differing liquidity or redemption terms, may seek to sell commonly held investments before other Client Accounts. Sale by such Client Accounts of the same or similar investments, depending upon the volume of sales and the nature of the market, may affect the market value of investments that continue to be held by other Client Accounts, including the Fund.

Transactions executed for Client Accounts may be effected independently or on an aggregated basis. Aggregation of Client orders can achieve better execution or result in more favorable commission rates. Such aggregation of orders, however, may not always be to the benefit of every Client Account with regard to the price or quantity executed for each individual transaction. Ellington's policy is to allocate executions of aggregated Client orders on a fair and equitable basis among participating Clients.

Receipt of Material Non-public Information

The Ellington Group may come into possession of material non-public information or other confidential information as a result of its business activities. Ellington has adopted policies with respect to insider trading and receipt of confidential information which include restrictions on trading for personal and Client Accounts in circumstances in which the firm has received material, confidential information. As a consequence, the possession of such information may limit the ability of Ellington's Client Accounts to buy or sell a security or otherwise to participate in an investment opportunity.

Differing Advice

Client Accounts may buy or sell securities of an issuer that are also bought or sold by the Ellington Group, other Client Accounts of the Ellington Group, or by Ellington employees for their own accounts. In this regard, Ellington may give advice and recommend securities, derivatives, and other financial instruments to a Client Account which may be identical to or may differ from advice given to or instruments recommended or bought or sold for or by other Accounts, affiliates, or employees, even though their investment objectives may be the same or similar.

Cross or Principal Transactions

Ellington, an Ellington Client Account, or a member or principal account of the Ellington Group may buy securities from or sell securities to a Client Account where consistent with the best interests of participating Clients, applicable law (including the 1940 Act) and the governing, advisory, and other documents related to the participating Clients.

Differing Interests in an Issuer

Client Accounts may, from time to time, make an investment in an issuer in a different level of whose capital structure the Ellington Group or one or more other Client Accounts has invested. Such circumstances may result in a conflict among or with such Client Accounts to the extent that a Client Account holds securities with rights, preferences, or privileges with respect to an issuer that are different than those held by other Client Accounts or the Ellington Group. In such instances, Ellington, in its sole discretion when acting in the best interests of each Client, may make recommendations and decisions regarding such rights or privileges for other entities that may be the same as or different from those made by or on behalf a Client Account and may take actions (or elect to take no action) in the context of these other economic interests or relationships the consequences of which may be adverse to the interests of a particular Client Account.

Other Activities and Affiliations

Ellington and the Ellington Group are not restricted from forming additional funds or vehicles, from entering into other investment advisory relationships, or from engaging in other business, academic, public policy, or charitable

activities, even though such activities may be in competition with a Client Account or its interests or may involve substantial time and resources of Ellington’s principals or employees. Although Ellington and its principals and employees will devote as much of their time to the activities of Client Accounts as they deem necessary and appropriate, these other activities could be viewed as creating a conflict of interest in that the time and effort of Ellington and its related persons will be allocated among various Client Accounts and business activities.

Other Relationships with Brokers and Counterparties

The Ellington Group may have other interests in or business arrangements with brokers and dealers used to execute transactions for Client Accounts, including the Fund.

Certain brokers or other counterparties for Ellington’s Client Accounts may offer capital introduction services. Capital introduction is a service designed to introduce fund managers to potential investors, typically through individual meetings or in a conference format. Although capital introduction is customarily offered as a free service, various conflicts of interest are presented by such arrangements. Ellington may, for example, have an incentive to use the services of a specific broker due to the broker’s ability to raise capital for management by Ellington or another member of the Ellington Group.

The Ellington Group may have other business arrangements with brokers and dealers used to execute transactions for Clients. For example, brokerage firms and their affiliates and representatives may also be Ellington Clients or invest in pooled investment vehicles managed by the Ellington Group. Brokerage firms may also provide financing, underwriting, placement or other services to the Ellington Group or other Client Accounts.

In addition, brokerage firms and their employees may offer gifts to Ellington’s employees, and may invite employees to entertainment and social events. Acceptance of such gifts and entertainment is subject to policies set forth in Ellington’s Code of Ethics. Ellington policy prohibits consideration of factors such as receipt of gifts and entertainment when selecting brokers and counterparties to execute transactions for Client Accounts.

Karya.

Compensation. The portfolio manager, Rajiv Sobti, directly or indirectly owns 100% of Karya. Since the company’s inception in 2011, Dr. Sobti has received no salary or bonus from Karya or its affiliates, as his compensation has come exclusively from the increase in value of Karya and its affiliates.

Fund Shares Owned by Portfolio Manager. The Fund is required to show the dollar amount range of the portfolio manager’s “beneficial ownership” of shares of the Fund as of the end of the most recently completed fiscal year. Dollar amount ranges disclosed are established by the SEC. “Beneficial ownership” is determined in accordance with Rule 16a-1(a)(2) under the 1934 Act.

| | Dollar Range of Fund Shares ¹ |
|---------------------|--|
| <u>Karya</u> | |
| Dr. Rajiv Sobti | \$100,001-\$500,000 |

¹ Valuation date is October 31, 2016.

Other Accounts. In addition to the Fund, the portfolio manager may also be responsible for the day-to-day management of certain other accounts, as indicated by the following table. The information below is provided as of October 31, 2016.

| | Registered Investment Companies | | Other Pooled Investment Vehicles | | Other Accounts | |
|-----------------|---------------------------------|--------------|----------------------------------|----------------------------|--------------------|----------------------------|
| | Number of Accounts | Total Assets | Number of Accounts | Total Assets (in Millions) | Number of Accounts | Total Assets (in Millions) |
| Dr. Rajiv Sobti | 0 | \$0 | 6 ¹ | \$765 | 3 ² | \$339 |

1 These accounts are subject to performance-based advisory fees.

2 Includes 2 accounts with assets under management of \$239 million that are subject to performance-based advisory fees.

Conflicts of Interest. Karya’s portfolio manager’s management of other accounts (collectively, the “Other Accounts”) may give rise to potential conflicts of interest in connection with his management of the Fund’s investments, on the one hand, and the investments of the Other Accounts, on the other. The Other Accounts might have similar investment objectives as the Fund or hold, purchase or sell securities that are eligible to be held, purchased or sold by the Fund. Karya does not believe that these conflicts, if any, are material or, to the extent any such conflicts are material, Karya believes that it has designed policies and procedures to manage those conflicts in an appropriate way.

A potential conflict of interest may arise as a result of Karya’s portfolio manager’s day-to-day management of the Fund. Because of his position with the Fund, the portfolio manager knows the size, timing and possible market impact of Fund trades. It is theoretically possible that Karya’s portfolio manager could use this information to the advantage of Other Accounts he manages and to the possible detriment of the Fund. However, Karya has adopted policies and procedures reasonably designed to allocate investment opportunities on a fair and equitable basis over time.

A potential conflict of interest may arise as a result of Karya’s portfolio manager’s management of the Fund and Other Accounts, which, in theory, may allow him to allocate investment opportunities in a way that favors Other Accounts over the Fund. This conflict of interest may be exacerbated to the extent that Karya or its portfolio manager receive, or expect to receive, greater compensation from management of the Other Accounts (many of which receive a base and incentive fee) than from the Fund. Notwithstanding this theoretical conflict of interest, it is Karya’s policy to manage each account based on its investment objectives and related restrictions and, as discussed above, Karya has adopted policies and procedures reasonably designed to allocate investment opportunities on a fair and equitable basis over time and in a manner consistent with each account’s investment objectives and related restrictions. For example, while Karya’s portfolio manager may buy for Other Accounts securities that differ in identity or quantity from securities bought for the Fund, such securities might not be suitable for the Fund given its investment objective and related restrictions.

MAI.

Compensation. The portfolio manager, Kazuhiro Shimbo, receives a combination of a fixed salary and an annual, discretionary bonus. In determining the amount of the bonus, MAI considers, among other things, the performance of the investment funds advised by MAI and the overall performance of MAI. The portfolio manager also participates in an employee 401(k) plan, which enables him to direct a percentage of his pre-tax salary and bonus into a qualified retirement plan, with an employer contribution of a certain percentage of total compensation, subject to applicable limits. There is no material difference between the portfolio manager’s compensation with respect to the Fund and the Other Accounts (as defined below).

Fund Shares Owned by Portfolio Manager. The Fund is required to show the dollar amount range of the portfolio manager’s “beneficial ownership” of shares of the Fund as of the end of the most recently completed fiscal year. Dollar amount ranges disclosed are established by the SEC. “Beneficial ownership” is determined in

accordance with Rule 16a-1(a)(2) under the 1934 Act.

| | Dollar Range of Fund Shares ¹ |
|-----------------|--|
| MAI | |
| Kazuhiro Shimbo | \$50,001 - \$100,000 |

¹ Valuation date is October 31, 2016.

Other Accounts. In addition to the Fund, the portfolio manager may also be responsible for the day-to-day management of certain other accounts, as indicated by the following table. The information below is provided as of October 31, 2016.

| | Registered Investment Companies | | Other Pooled Investment Vehicles | | Other Accounts | |
|-----------------|---------------------------------|--------------|----------------------------------|----------------------------|--------------------|--------------|
| | Number of Accounts | Total Assets | Number of Accounts | Total Assets (in Billions) | Number of Accounts | Total Assets |
| Kazuhiro Shimbo | 0 | \$0 | 23 ¹ | \$1.123 | 0 | \$0 |

¹ Includes 6 accounts with assets under management of \$333 million that are subject to performance-based advisory fees.

Conflicts of Interest. In addition to managing the activities of the Fund, MAI, its affiliates and managers, members, officers, directors, agents, and employees act as investment manager, investment adviser, sponsor, manager, general partner or managing member for other clients, investment funds, accounts and collective investment vehicles (“Other Accounts”) and give advice, and take action, with respect to any of those Other Accounts (including, without limitation, Mizuho Bank Ltd. and its affiliates) that may differ from the advice given, or the timing or nature of action taken, with respect to the Fund. MAI and its affiliates may advise Other Accounts that trade in identical or similar underlying investments, or similar strategies, as the Fund and that are generally classified as the same type of fund product, even though such activities may be in competition with the Fund and/or may involve substantial time and resources of MAI or its affiliates. These activities could be viewed as creating a conflict of interest in that the time and effort of the members of MAI and its officers and employees will not be devoted exclusively to the business of the Fund, but will be allocated between the business of the Fund and the management of the Other Accounts of MAI. Moreover, in contrast to the Fund, such Other Accounts may pay MAI a performance fee, which could create an incentive for MAI to allocate more profitable trades and investment opportunities to such Other Accounts instead of to the Fund. MAI has adopted policies and procedures reasonably designed to allocate investment opportunities on a fair and equitable basis over time and in a manner consistent with each account’s investment objectives and related restrictions. To that end, MAI may bunch or aggregate orders for the Fund with orders for the Other Accounts. MAI shall not have any obligation to engage in any transaction or investment for the Fund’s account or to recommend any transaction to the Fund that MAI or its affiliates may engage in for its own account or any Other Accounts, except as otherwise required by applicable law.

THE ADMINISTRATOR

General. SEI Investments Global Funds Services (the “Administrator”), a Delaware statutory trust, has its principal business offices at One Freedom Valley Drive, Oaks, Pennsylvania 19456. SEI Investments Management Corporation (“SIMC”), a wholly-owned subsidiary of SEI Investments Company (“SEI Investments”), is the owner of all beneficial interest in the Administrator. SEI Investments and its subsidiaries and affiliates, including the Administrator, are leading providers of fund evaluation services, trust accounting systems, and brokerage and information services to financial institutions, institutional investors, and money

managers. The Administrator and its affiliates also serve as administrator or sub-administrator to other mutual funds.

Administration Agreement with the Trust. The Trust and the Administrator have entered into an administration agreement dated February 12, 2014 (the “Administration Agreement”). Under the Administration Agreement, the Administrator provides the Trust with administrative services, including regulatory reporting and all necessary office space, equipment, personnel and facilities.

The Administration Agreement provides that the Administrator shall not be liable for any error of judgment or mistake of law or for any loss suffered by the Trust in connection with the matters to which the Administration Agreement relates, except a loss resulting from willful misfeasance, bad faith or gross negligence on the part of the Administrator in the performance of its duties or from reckless disregard by it of its duties and obligations thereunder.

Administration Fees Paid to the Administrator. For its services under the Administration Agreement, the Administrator is paid a fee, which varies based on the average daily net assets of the Fund, subject to certain minimums. For the fiscal years ended October 31, 2014, 2015 and 2016, the Fund paid the following amounts for these services:

| Administration Fees Paid | | |
|--------------------------|-----------|-----------|
| 2014 ¹ | 2015 | 2016 |
| \$63,288 | \$225,001 | \$225,141 |

1 Represents the fiscal period from July 25, 2014 (commencement of Fund operations) to October 31, 2014.

THE DISTRIBUTOR

The Trust and SEI Investments Distribution Co. (the “Distributor”), a wholly-owned subsidiary of SEI Investments, and an affiliate of the Administrator, are parties to a distribution agreement dated February 12, 2014 (the “Distribution Agreement”), whereby the Distributor acts as principal underwriter for the Trust’s shares. The principal business address of the Distributor is One Freedom Valley Drive, Oaks, Pennsylvania 19456.

The continuance of the Distribution Agreement must be specifically approved at least annually (i) by the vote of the Trustees or by a vote of the majority of the outstanding voting securities of the Trust and (ii) by the vote of a majority of the Trustees who are not “interested persons” of the Trust and have no direct or indirect financial interest in the operations of the Distribution Agreement or any related agreement, cast in person at a meeting called for the purpose of voting on such approval. The Distribution Agreement will terminate automatically in the event of its assignment (as such term is defined in the 1940 Act), and is terminable at any time without penalty by the Board or by a majority of the outstanding voting securities of the Trust, or by the Distributor, upon not more than 60 days’ written notice to the other party.

PAYMENTS TO FINANCIAL INTERMEDIARIES

Distribution Plan. The Trust has adopted a Distribution Plan with respect to the Investor Class Shares (the “Plan”) in accordance with the provisions of Rule 12b-1 under the 1940 Act, which regulates circumstances under which an investment company may directly or indirectly bear expenses relating to the distribution of its shares. Continuance of the Plan must be approved annually by a majority of the Trustees and by a majority of the Trustees who are not interested persons (as defined in the 1940 Act) of the Trust and have no direct or indirect financial interest in the Plan or in any agreements related to the Plan (“Qualified Trustees”). The Plan requires that quarterly written reports of amounts spent under the Plan and the purposes of such expenditures be furnished to and reviewed by the Trustees. The Plan may not be amended to increase materially the amount that may be

spent thereunder without approval by a majority of the outstanding shares of the Fund. All material amendments of the Plan will require approval by a majority of the Trustees and of the Qualified Trustees.

The Plan provides a method of paying for distribution and shareholder services, which may help the Fund grow or maintain asset levels to provide operational efficiencies and economies of scale, provided by the Distributor or other financial intermediaries that enter into agreements with the Distributor. The Fund may make payments to financial intermediaries, such as banks, savings and loan associations, insurance companies, investment counselors, broker-dealers, mutual fund “supermarkets” and the Distributor’s affiliates and subsidiaries, as compensation for services, reimbursement of expenses incurred in connection with distribution assistance or provision of shareholder services. The Distributor may, at its discretion, retain a portion of such payments to compensate itself for distribution services and distribution related expenses such as the costs of preparation, printing, mailing or otherwise disseminating sales literature, advertising, and prospectuses (other than those furnished to current shareholders of the Fund), promotional and incentive programs, and such other marketing expenses that the Distributor may incur.

Under the Plan, the Distributor or financial intermediaries may receive up to 0.25% of the average daily net assets of the Investor Class Shares as compensation for distribution and shareholder services. The Plan is characterized as a compensation plan since the distribution fee will be paid to the Distributor without regard to the distribution or shareholder service expenses incurred by the Distributor or the amount of payments made to financial intermediaries. The Trust intends to operate the Plan in accordance with its terms and with Financial Industry Regulatory Authority (“FINRA”) rules concerning sales charges.

For the fiscal years ended October 31, 2014, 2015 and 2016, the Fund paid the Distributor the following distribution fees:

| Share Class | 12b-1 Fees Paid | | | 12b-1 Fees Retained by the Distributor | | |
|----------------|-------------------|---------|---------|--|------|------|
| | 2014 ¹ | 2015 | 2016 | 2014 ¹ | 2015 | 2016 |
| Investor Class | \$6 | \$3,328 | \$2,146 | \$0 | \$38 | \$37 |

1 Represents the fiscal period from July 25, 2014 (commencement of Fund operations) to October 31, 2014.

Shareholder Servicing Plan. The Fund has adopted a shareholder servicing plan under which a shareholder servicing fee of up to 0.10% of average daily net assets of Investor Class Shares of the Fund will be paid to financial intermediaries. Under the plan, financial intermediaries may perform, or may compensate other financial intermediaries for performing, certain shareholder and administrative services, including: (i) maintaining shareholder accounts; (ii) arranging for bank wires; (iii) responding to shareholder inquiries relating to the services performed by the financial intermediaries; (iv) responding to inquiries from shareholders concerning their investment in the Fund; (v) assisting shareholders in changing dividend options, account designations and addresses; (vi) providing information periodically to shareholders showing their position in the Fund; (vii) forwarding shareholder communications from the Fund such as proxies, shareholder reports, annual reports, and dividend and capital gain distribution and tax notices to shareholders; (viii) processing purchase, exchange and redemption requests from shareholders and placing orders with the Fund or its service providers; (ix) providing sub-accounting services; (x) processing dividend and capital gain payments from the Fund on behalf of shareholders; (xi) preparing tax reports; and (xii) providing such other similar non-distribution services as the Fund may reasonably request to the extent that the financial intermediary is permitted to do so under applicable laws or regulations.

Payments by the Adviser and Sub-Advisers. The Adviser, the Sub-Advisers and/or their affiliates, in their discretion, may make payments from their own resources and not from Fund assets to affiliated or unaffiliated brokers, dealers, banks (including bank trust departments), trust companies, registered investment advisers,

financial planners, retirement plan administrators, insurance companies, and any other institution having a service, administration, or any similar arrangement with the Fund, its service providers or their respective affiliates, as incentives to help market and promote the Fund and/or in recognition of their distribution, marketing, administrative services, and/or processing support.

These additional payments may be made to financial intermediaries that sell Fund shares or provide services to the Fund, the Distributor or shareholders of the Fund through the financial intermediary's retail distribution channel and/or fund supermarkets. Payments may also be made through the financial intermediary's retirement, qualified tuition, fee-based advisory, wrap fee bank trust, or insurance (e.g., individual or group annuity) programs. These payments may include, but are not limited to, placing the Fund in a financial intermediary's retail distribution channel or on a preferred or recommended fund list; providing business or shareholder financial planning assistance; educating financial intermediary personnel about the Fund; providing access to sales and management representatives of the financial intermediary; promoting sales of Fund shares; providing marketing and educational support; maintaining share balances and/or for sub-accounting, administrative or shareholder transaction processing services. A financial intermediary may perform the services itself or may arrange with a third party to perform the services.

The Adviser, the Sub-Advisers and/or their affiliates may also make payments from their own resources to financial intermediaries for costs associated with the purchase of products or services used in connection with sales and marketing, participation in and/or presentation at conferences or seminars, sales or training programs, client and investor entertainment and other sponsored events. The costs and expenses associated with these efforts may include travel, lodging, sponsorship at educational seminars and conferences, entertainment and meals to the extent permitted by law.

Revenue sharing payments may be negotiated based on a variety of factors, including the level of sales, the amount of Fund assets attributable to investments in the Fund by financial intermediaries customers, a flat fee or other measures as determined from time to time by the Adviser, the Sub-Advisers and/or their affiliates. A significant purpose of these payments is to increase the sales of Fund shares, which in turn may benefit the Adviser and the Sub-Advisers through increased fees as Fund assets grow.

Investors should understand that some financial intermediaries may also charge their clients fees in connection with purchases of shares or the provision of shareholder services.

THE TRANSFER AGENT

DST Systems, Inc., 333 West 11th Street, Kansas City, Missouri 64105 (the "Transfer Agent"), serves as the Fund's transfer agent.

THE CUSTODIAN

MUFG Union Bank, N.A., 350 California Street, 6th Floor, San Francisco, California 94104 (the "Custodian"), acts as custodian of the Fund. The Custodian holds cash, securities and other assets of the Fund as required by the 1940 Act.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

KPMG LLP, 1601 Market Street, Philadelphia, PA 19103, serves as the independent registered public accounting firm for the Fund. The financial statements and notes thereto incorporated by reference have been audited by KPMG LLP, as indicated in their report with respect thereto, and are incorporated by reference in reliance on the authority of their report as experts in accounting and auditing.

LEGAL COUNSEL

Morgan, Lewis & Bockius LLP, 1701 Market Street, Philadelphia, Pennsylvania 19103-2921, serves as legal counsel to the Trust.

TRUSTEES AND OFFICERS OF THE TRUST

Board Responsibilities. The management and affairs of the Trust and its series, including the Fund described in this SAI, are overseen by the Trustees. The Board has approved contracts, as described above, under which certain companies provide essential management services to the Trust.

Like most mutual funds, the day-to-day business of the Trust, including the management of risk, is performed by third party service providers, such as the Adviser, the Sub-Advisers, the Distributor and the Administrator. The Trustees are responsible for overseeing the Trust's service providers and, thus, have oversight responsibility with respect to risk management performed by those service providers. Risk management seeks to identify and address risks, i.e., events or circumstances that could have material adverse effects on the business, operations, shareholder services, investment performance or reputation of the funds. The funds and their service providers employ a variety of processes, procedures and controls to identify various possible events or circumstances, to lessen the probability of their occurrence and/or to mitigate the effects of such events or circumstances if they do occur. Each service provider is responsible for one or more discrete aspects of the Trust's business (e.g., the Adviser and the Sub-Advisers are responsible for the day-to-day management of the Fund's portfolio investments) and, consequently, for managing the risks associated with that business. The Board has emphasized to the funds' service providers the importance of maintaining vigorous risk management.

The Trustees' role in risk oversight begins before the inception of a fund, at which time certain of the fund's service providers present the Board with information concerning the investment objectives, strategies and risks of the fund as well as proposed investment limitations for the fund. Additionally, the fund's adviser provides the Board with an overview of, among other things, its investment philosophy, brokerage practices and compliance infrastructure. Thereafter, the Board continues its oversight function as various personnel, including the Trust's Chief Compliance Officer, as well as personnel of the adviser and other service providers, such as the fund's independent accountants, make periodic reports to the Audit Committee or to the Board with respect to various aspects of risk management. The Board and the Audit Committee oversee efforts by management and service providers to manage risks to which the funds may be exposed.

The Board is responsible for overseeing the nature, extent and quality of the services provided to the funds by the adviser and receives information about those services at its regular meetings. In addition, on an annual basis, in connection with its consideration of whether to renew the advisory agreement with the adviser, the Board meets with the adviser to review such services. Among other things, the Board regularly considers the adviser's adherence to the funds' investment restrictions and compliance with various fund policies and procedures and with applicable securities regulations. The Board also reviews information about the funds' investments, including, for example, reports on the adviser's use of derivatives in managing the funds, if any, as well as reports on the funds' investments in other investment companies, if any.

The Trust's Chief Compliance Officer reports regularly to the Board to review and discuss compliance issues and fund and adviser risk assessments. At least annually, the Trust's Chief Compliance Officer provides the Board with a report reviewing the adequacy and effectiveness of the Trust's policies and procedures and those of its service providers, including the adviser. The report addresses the operation of the policies and procedures of the Trust and each service provider since the date of the last report; any material changes to the policies and

procedures since the date of the last report; any recommendations for material changes to the policies and procedures; and any material compliance matters since the date of the last report.

The Board receives reports from the funds' service providers regarding operational risks and risks related to the valuation and liquidity of portfolio securities. The Trust's Fair Value Pricing Committee makes regular reports to the Board concerning investments for which market quotations are not readily available. Annually, the independent registered public accounting firm reviews with the Audit Committee its audit of the funds' financial statements, focusing on major areas of risk encountered by the funds and noting any significant deficiencies or material weaknesses in the funds' internal controls. Additionally, in connection with its oversight function, the Board oversees fund management's implementation of disclosure controls and procedures, which are designed to ensure that information required to be disclosed by the Trust in its periodic reports with the SEC are recorded, processed, summarized, and reported within the required time periods. The Board also oversees the Trust's internal controls over financial reporting, which comprise policies and procedures designed to provide reasonable assurance regarding the reliability of the Trust's financial reporting and the preparation of the Trust's financial statements.

From their review of these reports and discussions with the adviser, the Chief Compliance Officer, the independent registered public accounting firm and other service providers, the Board and the Audit Committee learn in detail about the material risks of the funds, thereby facilitating a dialogue about how management and service providers identify and mitigate those risks.

The Board recognizes that not all risks that may affect the funds can be identified and/or quantified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve the funds' goals, and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, reports received by the Trustees as to risk management matters are typically summaries of the relevant information. Most of the funds' investment management and business affairs are carried out by or through the funds' advisers and other service providers, each of which has an independent interest in risk management but whose policies and the methods by which one or more risk management functions are carried out may differ from the funds' and each other's in the setting of priorities, the resources available or the effectiveness of relevant controls. As a result of the foregoing and other factors, the Board's ability to monitor and manage risk, as a practical matter, is subject to limitations.

Members of the Board. There are five members of the Board, four of whom are not interested persons of the Trust, as that term is defined in the 1940 Act ("independent Trustees"). Mr. Doran, an interested person of the Trust, serves as Chairman of the Board. Mr. Hunt, an independent Trustee, serves as the lead independent Trustee. The Trust has determined its leadership structure is appropriate given the specific characteristics and circumstances of the Trust. The Trust made this determination in consideration of, among other things, the fact that the independent Trustees constitute more than three-quarters of the Board, the fact that the chairperson of each Committee of the Board is an independent Trustee, the amount of assets under management in the Trust, and the number of funds (and classes of shares) overseen by the Board. The Board also believes that its leadership structure facilitates the orderly and efficient flow of information to the independent Trustees from fund management.

The Board has two standing committees: the Audit Committee and the Governance Committee. The Audit Committee and Governance Committee are chaired by an independent Trustee and composed of all of the independent Trustees. In addition, the Board has a lead independent Trustee.

In his role as lead independent Trustee, Mr. Hunt, among other things: (i) presides over Board meetings in the absence of the Chairman of the Board; (ii) presides over executive sessions of the independent Trustees; (iii) along with the Chairman of the Board, oversees the development of agendas for Board meetings; (iv) facilitates communication between the independent Trustees and management, and among the independent Trustees; (v) serves as a key point person for dealings between the independent Trustees and management; and (vi) has such other responsibilities as the Board or independent Trustees determine from time to time.

Set forth below are the names, years of birth, position with the Trust and length of time served, and the principal occupations and other directorships held during at least the last five years of each of the persons currently serving as a Trustee. There is no stated term of office for the Trustees. Unless otherwise noted, the business address of each Trustee is SEI Investments Company, One Freedom Valley Drive, Oaks, Pennsylvania 19456.

| Name and Year of Birth | Position with Trust and Length of Time Served | Principal Occupations in the Past 5 Years | Other Directorships Held in the Past 5 Years |
|----------------------------------|--|--|--|
| <u>Interested Trustee</u> | | | |
| William M. Doran (Born: 1940) | Chairman of the Board of Trustees ¹ (since 2014) | Self-Employed Consultant since 2003. Partner at Morgan, Lewis & Bockius LLP (law firm) from 1976 to 2003. Counsel to the Trust, SEI Investments, SIMC, the Administrator and the Distributor. 1 Mr. Doran may be deemed to be an “interested” person of the Fund as that term is defined in the 1940 Act by virtue of his affiliation with the Distributor and/or its affiliates.

Individual Trustee Qualifications

The Trust has concluded that each of the Trustees should serve on the Board because of their ability to review and understand information about the Fund provided to them by management, to identify and request other information they may deem relevant to the performance of their duties, to question management and other service providers regarding material factors bearing on the management and administration of the Fund, and to exercise their business judgment in a manner that serves the best interests of the Fund’s shareholders. The Trust has concluded that each of the Trustees should serve as a Trustee based on their own experience, qualifications, attributes and skills as described below.

The Trust has concluded that Mr. Doran should serve as Trustee because of the experience he gained serving as a Partner in the Investment Management and Securities Industry Practice of a large law firm, his experience in and knowledge of the financial services industry, and the experience he has gained serving on other mutual fund boards.

The Trust has concluded that Mr. Hunt should serve as Trustee because of the experience he gained in a variety of leadership roles with different investment management institutions, his experience in and knowledge of the financial services industry, and the experience he has gained as a board member of open-end, closed-end and private funds investing in a broad range of asset classes, including alternative asset classes.

The Trust has concluded that Mr. Lemke should serve as Trustee because of the extensive experience he gained in the financial services industry, including experience in various senior management positions with financial services firms and multiple years of service with a regulatory agency, his background in controls, including legal, compliance and risk management, and his service as general counsel for several financial services firms.

The Trust has concluded that Mr. Nadel should serve as Trustee because of the experience he gained in a variety of leadership roles with an audit firm and various financial services firms, his experience in and knowledge of the financial services industry, and the experience he has gained serving on other mutual fund and operating company boards.

The Trust has concluded that Mr. Yanker should serve as Trustee because of the experience he gained in a variety of leadership roles with the alternative asset management divisions of various financial services firms, his experience in and knowledge of the financial services industry, and the experience he has gained advising institutions on alternative asset management.

In its periodic assessment of the effectiveness of the Board, the Board considers the complementary individual skills and experience of the individual Trustees primarily in the broader context of the Board’s overall composition so that the Board, as a body, possesses the appropriate (and appropriately diverse) skills and experience to oversee the business of the funds.

Board Committees. The Board has established the following standing committees:

- Audit Committee.** The Board has a standing Audit Committee that is composed of each of the independent Trustees. The Audit Committee operates under a written charter approved by the Board. The principal responsibilities of the Audit Committee include: (i) recommending which firm to engage as each fund's independent registered public accounting firm and whether to terminate this relationship; (ii) reviewing the independent registered public accounting firm's compensation, the proposed scope and terms of its engagement, and the firm's independence; (iii) pre-approving audit and non-audit services provided by each fund's independent registered public accounting firm to the Trust and certain other affiliated entities; (iv) serving as a channel of communication between the independent registered public accounting firm and the Trustees; (v) reviewing the results of each external audit, including any qualifications in the independent registered public accounting firm's opinion, any related management letter, management's responses to recommendations made by the independent registered public accounting firm in connection with the audit, reports submitted to the Committee by the internal auditing department of the Administrator that are material to the Trust as a whole, if any, and management's responses to any such reports; (vi) reviewing each fund's audited financial statements and considering any significant disputes between the Trust's management and the independent registered public accounting firm that arose in connection with the preparation of those financial statements; (vii) considering, in consultation with the independent registered public accounting firm and the Trust's senior internal accounting executive, if any, the independent registered public accounting firms' reports on the adequacy of the Trust's internal financial controls; (viii) reviewing, in consultation with each fund's independent registered public accounting firm, major changes regarding auditing and accounting principles and practices to be followed when preparing each fund's financial statements; and (ix) other audit related matters. Mr. Hunt, Mr. Lemke, Mr. Nadel and Mr. Yanker currently serve as members of the Audit Committee. Mr. Nadel serves as the Chairman of the Audit Committee. The Audit Committee meets periodically, as necessary, and met four (4) times during the most recently completed fiscal year.
- Governance Committee.** The Board has a standing Governance Committee that is composed of each of the independent Trustees. The Governance Committee operates under a written charter approved by the Board. The principal responsibilities of the Governance Committee include: (i) considering and reviewing Board governance and compensation issues; (ii) conducting a self-assessment of the Board's operations; (iii) selecting and nominating all persons to serve as independent Trustees and evaluating the qualifications of "interested" Trustee candidates; and (iv) reviewing shareholder recommendations for nominations to fill vacancies on the Board if such recommendations are submitted in writing and addressed to the Committee at the Trust's office. Mr. Hunt, Mr. Lemke, Mr. Nadel and Mr. Yanker currently serve as members of the Governance Committee. Mr. Lemke serves as the Chairman of the Governance Committee. The Governance Committee meets periodically, as necessary, and met four (4) times during the most recently completed fiscal year.

Fair Value Pricing Committee. The Board has also established a standing Fair Value Pricing Committee that is composed of various representatives of the Trust's service providers, as appointed by the Board. The Fair Value Pricing Committee operates under procedures approved by the Board. The principal responsibility of the Fair Value Pricing Committee is to determine the fair value of securities for which current market quotations are not readily available. The Fair Value Pricing Committee's determinations are reviewed by the Board.

Fund Shares Owned by Board Members. The following table shows the dollar amount range of each Trustee's "beneficial ownership" of shares of the Fund as of the end of the most recently completed calendar year. Dollar amount ranges disclosed are established by the SEC. "Beneficial ownership" is determined in accordance with Rule 16a-1(a)(2) under the 1934 Act. The Trustees and officers of the Trust own less than 1% of the outstanding shares of the Trust.

| Randall S. Yanker | \$34,024 | N/A | N/A | \$34,024 for service on one (1) board |

¹ All funds in the Fund Complex are series of the Trust.

² Joined the Board on June 9, 2016.

Trust Officers. Set forth below are the names, years of birth, position with the Trust and length of time served, and the principal occupations for the last five years of each of the persons currently serving as executive officers of the Trust. There is no stated term of office for the officers of the Trust. Unless otherwise noted, the business address of each officer is SEI Investments Company, One Freedom Valley Drive, Oaks, Pennsylvania 19456. The Chief Compliance Officer is the only officer who receives compensation from the Trust for his services.

Certain officers of the Trust also serve as officers of one or more mutual funds for which SEI Investments Company or its affiliates act as investment manager, administrator or distributor.

| Name and Year of Birth | Position with Trust and Length of Time Served | Principal Occupations in Past 5 Years |

| Lisa Whittaker (Born: 1978) | Vice President and Assistant Secretary (since 2014) | Attorney, SEI Investments Company (2012-present). Associate Counsel and Compliance Officer, The Glenmede Trust Company, N.A. (2011-2012). Associate, Drinker Biddle & Reath LLP (2006-2011). |
| John Y. Kim (Born: 1981) | Vice President and Assistant Secretary (since 2014) | Attorney, SEI Investments Company (2014-present). Associate, Stradley Ronon Stevens & Young, LLP (2009-2014). |
| Bridget E. Sudall (Born: 1980) | Privacy Officer (since 2015) Anti-Money Laundering Officer (since 2015) | Senior Associate and AML Officer, Morgan Stanley Alternative Investment Partners (2011-2015). Investor Services Team Lead, Morgan Stanley Alternative Investment Partners (2007-2011). |

PURCHASING AND REDEEMING SHARES

Purchases and redemptions may be made through the Transfer Agent on any day the New York Stock Exchange (the "NYSE") is open for business. Shares of the Fund are offered and redeemed on a continuous basis. Currently, the Trust is closed for business when the following holidays are observed: New Year's Day, Martin Luther King Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving and Christmas.

It is currently the Trust's policy to pay all redemptions in cash. The Trust retains the right, however, to alter this policy to provide for redemptions in whole or in part by a distribution in-kind of securities held by the Fund in lieu of cash. Shareholders may incur brokerage charges on the sale of any such securities so received in payment of redemptions.

The Trust reserves the right to suspend the right of redemption and/or to postpone the date of payment upon redemption during times when the NYSE is closed, other than during customary weekends or holidays, for any period on which trading on the NYSE is restricted (as determined by the SEC by rule or regulation), or during the existence of an emergency (as determined by the SEC by rule or regulation) as a result of which disposal or valuation of the Fund's securities is not reasonably practicable, or for such other periods as the SEC has by order permitted. The Trust also reserves the right to suspend sales of shares of the Fund for any period during which the NYSE, the Adviser, the Sub-Advisers, the Administrator, the Transfer Agent and/or the Custodian are not open for business.

DETERMINATION OF NET ASSET VALUE

General Policy. The Fund adheres to Section 2(a)(41), and Rule 2a-4 thereunder, of the 1940 Act with respect to the valuation of portfolio securities. In general, securities for which market quotations are readily available are

valued at current market value, and all other securities are valued at fair value in accordance with procedures adopted by the Board. In complying with the 1940 Act, the Trust relies on guidance provided by the SEC and by the SEC staff in various interpretive letters and other guidance.

Equity Securities. Securities listed on a securities exchange, market or automated quotation system for which quotations are readily available (except for securities traded on NASDAQ), including securities traded over the counter, are valued at the last quoted sale price on an exchange or market (foreign or domestic) on which they are traded on the valuation date (or at approximately 4:00 p.m. Eastern Time if such exchange is normally open at that time), or, if there is no such reported sale on the valuation date, at the most recent quoted bid price. For securities traded on NASDAQ, the NASDAQ Official Closing Price will be used. If such prices are not available or determined to not represent the fair value of the security as of the Fund's pricing time, the security will be valued at fair value as determined in good faith using methods approved by the Board.

Money Market Securities and other Debt Securities. If available, money market securities and other debt securities are priced based upon valuations provided by recognized independent, third-party pricing agents. Such values generally reflect the last reported sales price if the security is actively traded. The third-party pricing agents may also value debt securities by employing methodologies that utilize actual market transactions, broker-supplied valuations, or other methodologies designed to identify the market value for such securities. Such methodologies generally consider such factors as security prices, yields, maturities, call features, ratings and developments relating to specific securities in arriving at valuations. Money market securities and other debt securities with remaining maturities of sixty days or less may be valued at their amortized cost, which approximates market value. If such prices are not available or determined to not represent the fair value of the security as of the Fund's pricing time, the security will be valued at fair value as determined in good faith using methods approved by the Board.

Foreign Securities. The prices for foreign securities are reported in local currency and converted to U.S. dollars using currency exchange rates. Exchange rates are provided daily by recognized independent pricing agents.

Derivatives and Other Complex Securities. Exchange traded options on securities and indices purchased by the Fund generally are valued at their last trade price or, if there is no last trade price, the last bid price. Exchange traded options on securities and indices written by the Fund generally are valued at their last trade price or, if there is no last trade price, the last asked price. In the case of options traded in the over-the-counter market, if the OTC option is also an exchange traded option, the Fund will follow the rules regarding the valuation of exchange traded options. If the OTC option is not also an exchange traded option, the Fund will value the option at fair value in accordance with procedures adopted by the Board.

Futures and swaps cleared through a central clearing house ("centrally cleared swaps") are valued at the settlement price established each day by the board of the exchange on which they are traded. The daily settlement prices for financial futures are provided by an independent source. On days when there is excessive volume or market volatility, or the future or centrally cleared swap does not end trading by the time the Fund calculates NAV, the settlement price may not be available at the time at which the Fund calculates its NAV. On such days, the best available price (which is typically the last sales price) may be used to value the Fund's futures or centrally cleared swaps position.

Foreign currency forward contracts are valued at the current day's interpolated foreign exchange rate, as calculated using the current day's spot rate, and the thirty, sixty, ninety and one-hundred eighty day forward rates provided by an independent source.

If available, non-centrally cleared swaps, collateralized debt obligations, collateralized loan obligations and bank

loans are priced based on valuations provided by an independent third party pricing agent. If a price is not available from an independent third party pricing agent, the security will be valued at fair value as determined in good faith using methods approved by the Board.

Use of Third-Party Independent Pricing Agents and Independent Brokers. Pursuant to contracts with the Administrator, prices for most securities held by the Fund are provided daily by third-party independent pricing agents that are approved by the Board. The valuations provided by third-party independent pricing agents are reviewed daily by the Administrator.

If a security price cannot be obtained from an independent, third-party pricing agent, the Administrator shall seek to obtain a bid price from at least one independent broker.

Fair Value Procedures. Securities for which market prices are not “readily available” or which cannot be valued using the methodologies described above are valued in accordance with Fair Value Procedures established by the Board and implemented through the Fair Value Pricing Committee. The members of the Fair Value Pricing Committee report, as necessary, to the Board regarding portfolio valuation determinations. The Board, from time to time, will review these methods of valuation and will recommend changes which may be necessary to assure that the investments of the Fund are valued at fair value.

Some of the more common reasons that may necessitate a security being valued using Fair Value Procedures include: the security’s trading has been halted or suspended; the security has been de-listed from a national exchange; the security’s primary trading market is temporarily closed at a time when under normal conditions it would be open; the security has not been traded for an extended period of time; the security’s primary pricing source is not able or willing to provide a price; trading of the security is subject to local government-imposed restrictions; or a significant event with respect to a security has occurred after the close of the market or exchange on which the security principally trades and before the time the Fund calculates NAV. When a security is valued in accordance with the Fair Value Procedures, the Fair Value Pricing Committee will determine the value after taking into consideration relevant information reasonably available to the Fair Value Pricing Committee.

TAXES

The following is only a summary of certain additional U.S. federal income tax considerations generally affecting the Fund and its shareholders that is intended to supplement the discussion contained in the Prospectus. No attempt is made to present a detailed explanation of the tax treatment of the Fund or its shareholders, and the discussion here and in the Prospectus is not intended as a substitute for careful tax planning. Shareholders are urged to consult their tax advisors with specific reference to their own tax situations, including their state, local, and foreign tax liabilities.

The following general discussion of certain federal income tax consequences is based on the Code and the regulations issued thereunder as in effect on the date of this SAI. New legislation, as well as administrative changes or court decisions, may significantly change the conclusions expressed herein, and may have a retroactive effect with respect to the transactions contemplated herein.

Qualification as a Regulated Investment Company (“RIC”). The Fund intends to qualify and elects to be treated as a RIC. By following such a policy, the Fund expects to eliminate or reduce to a nominal amount the federal taxes to which it may be subject. If the Fund qualifies as a RIC, it will generally not be subject to federal income taxes on the net investment income and net realized capital gains that it timely distributes to its shareholders. The Board reserves the right not to maintain the qualification of the Fund as a RIC if it determines such course of action to be beneficial to shareholders.

In order to qualify as a RIC under the Code, the Fund must distribute annually to its shareholders at least 90% of its net investment income (which, includes dividends, taxable interest, and the excess of net short-term capital gains over net long-term capital losses, less operating expenses) and at least 90% of its net tax exempt interest income, for each tax year, if any (the “Distribution Requirement”) and also must meet certain additional requirements. Among these requirements are the following: (i) at least 90% of the Fund’s gross income each taxable year must be derived from dividends, interest, payments with respect to certain securities loans, and gains from the sale or other disposition of stock, securities, or foreign currencies, or other income (including but not limited to gains from options, futures or forward contracts) derived with respect to its business of investing in such stock, securities, or currencies, and net income derived from an interest in a qualified publicly traded partnership (the “Qualifying Income Test”); and (ii) at the close of each quarter of the Fund’s taxable year: (A) at least 50% of the value of its total assets must be represented by cash and cash items, U.S. government securities, securities of other RICs and other securities, with such other securities limited, in respect to any one issuer, to an amount not greater than 5% of the value of the Fund’s total assets and that does not represent more than 10% of the outstanding voting securities of such issuer, including the equity securities of a qualified publicly traded partnership, and (B) not more than 25% of the value of its total assets is invested in the securities (other than U.S. government securities or securities of other RICs) of any one issuer or the securities (other than the securities of another RIC) of two or more issuers that the Fund controls and which are engaged in the same or similar trades or businesses or related trades or businesses, or the securities of one or more qualified publicly traded partnerships (the “Asset Test”). Although the Fund intends to distribute substantially all of its net investment income and may distribute its capital gains for any taxable year, the Fund will be subject to federal income taxation to the extent any such income or gains are not distributed.

If the Fund fails to satisfy the Qualifying Income or Asset Tests in any taxable year, the Fund may be eligible for relief provisions if the failures are due to reasonable cause and not willful neglect and if a penalty tax is paid with respect to each failure to satisfy the applicable requirements. Additionally, relief is provided for certain *de minimis* failures of the diversification requirements where the Fund corrects the failure within a specified period. If the Fund fails to maintain qualification as a RIC for a tax year, and the relief provisions are not available, the Fund will be subject to federal income tax at regular corporate rates without any deduction for distributions to shareholders. In such case, its shareholders would be taxed as if they received ordinary dividends, although corporate shareholders could be eligible for the dividends received deduction (subject to certain limitations) and individuals may be able to benefit from the lower tax rates available to qualified dividend income. In addition, the Fund could be required to recognize unrealized gains, pay substantial taxes and interest, and make substantial distributions before requalifying as a RIC. The Board reserves the right not to maintain the qualification of the Fund as a RIC if it determines such course of action to be beneficial to shareholders.

The Fund may elect to treat part or all of any “qualified late year loss” as if it had been incurred in the succeeding taxable year in determining the Fund’s taxable income, net capital gain, net short-term capital gain, and earnings and profits. The effect of this election is to treat any such “qualified late year loss” as if it had been incurred in the succeeding taxable year in characterizing Fund distributions for any calendar year. A “qualified late year loss” generally includes net capital loss, net long-term capital loss, or net short-term capital loss incurred after October 31 of the current taxable year (commonly referred to as “post-October losses”) and certain other late-year losses.

The treatment of capital loss carryovers for the Fund is similar to the rules that apply to capital loss carryovers of individuals, which provide that such losses are carried over indefinitely. If the Fund has a “net capital loss” (that is, capital losses in excess of capital gains), the excess of the Fund’s net short-term capital losses over its net long-term capital gains is treated as a short-term capital loss arising on the first day of the Fund’s next taxable year, and the excess (if any) of the Fund’s net long-term capital losses over its net short-term capital gains is treated as a

long-term capital loss arising on the first day of the Fund's next taxable year. The carryover of capital losses may be limited under the general loss limitation rules if the Fund experiences an ownership change as defined in the Code.

Federal Excise Tax. Notwithstanding the Distribution Requirement described above, which generally requires the Fund to distribute at least 90% of its annual investment company taxable income and the excess of its exempt interest income (but does not require any minimum distribution of net capital gain), the Fund will be subject to a nondeductible 4% federal excise tax to the extent it fails to distribute, by the end of the calendar year at least 98% of its ordinary income and 98.2% of its capital gain net income (the excess of short- and long-term capital gains over short- and long-term capital losses) for the one-year period ending on October 31 of such year (including any retained amount from the prior calendar year on which the Fund paid no federal income tax). The Fund intends to make sufficient distributions to avoid liability for federal excise tax, but can make no assurances that such tax will be completely eliminated. The Fund may in certain circumstances be required to liquidate Fund investments in order to make sufficient distributions to avoid federal excise tax liability at a time when the investment managers might not otherwise have chosen to do so, and liquidation of investments in such circumstances may affect the ability of the Fund to satisfy the requirement for qualification as a RIC.

Distributions to Shareholders. The Fund receives income generally in the form of dividends and interest on investments. This income, plus net short-term capital gains, if any, less expenses incurred in the operation of the Fund, constitutes the Fund's net investment income from which dividends may be paid to you. Any distributions by the Fund from such income will be taxable to you as ordinary income or at the lower capital gains rates that apply to individuals receiving qualified dividend income, whether you take them in cash or in additional shares.

Distributions by the Fund will be eligible for the reduced maximum tax rate to individuals currently set at 20% (lower rates apply to individuals in lower tax brackets) to the extent that the Fund receives qualified dividend income on the securities it holds and the Fund reports the distributions as qualified dividend income. Qualified dividend income is, in general, dividend income from taxable domestic corporations and certain foreign corporations (e.g., foreign corporations incorporated in a possession of the United States or in certain countries with a comprehensive tax treaty with the United States, or the stock of which is readily tradable on an established securities market in the United States). A dividend will not be treated as qualified dividend income to the extent that: (i) the shareholder has not held the shares (on which the dividend was paid for more than 60 days during the 121-day period that begins on the date that is 60 days before the date on which the shares become "ex-dividend" (which is the day on which declared distributions (dividends or capital gains) are deducted from the Fund's assets before it calculates the NAV) with respect to such dividend, (ii) the Fund has not satisfied similar holding period requirements with respect to the securities it holds that paid the dividends distributed to the shareholder), (iii) the shareholder is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to substantially similar or related property, or (iv) the shareholder elects to treat such dividend as investment income under section 163(d)(4)(B) of the Code. Therefore, if you lend your shares in the Fund, such as pursuant to a securities lending arrangement, you may lose the ability to treat dividends (paid while the shares are held by the borrower) as qualified dividend income. Distributions that the Fund receives from an ETF or underlying fund taxable as a RIC or a REIT will be treated as qualified dividend income only to the extent so reported by such ETF, underlying fund or REIT.

Distributions by the Fund of its net short-term capital gains will be taxable as ordinary income. Capital gain distributions consisting of the Fund's net capital gains will be taxable as long-term capital gains for individual shareholders currently set at a maximum rate of 20% regardless of how long you have held your shares in the Fund.

In the case of corporate shareholders, the Fund's distributions (other than capital gain distributions) generally qualify for the dividends-received deduction to the extent such distributions are so reported and do not exceed the gross amount of qualifying dividends received by the Fund for the year. Generally, and subject to certain limitations (including certain holding period limitations), a dividend will be treated as a qualifying dividend if it has been received from a domestic corporation. All such qualifying dividends (including the deducted portion) must be included in your alternative minimum taxable income calculation.

To the extent that the Fund makes a distribution of income received by the Fund in lieu of dividends (a "substitute payment") with respect to securities on loan pursuant to a securities lending transaction, such income will not constitute qualified dividend income to individual shareholders and will not be eligible for the dividends received deduction for corporate shareholders.

If the Fund's distributions exceed its taxable income and capital gains realized during a taxable year, all or a portion of the distributions made in the same taxable year may be recharacterized as a return of capital to shareholders. A return of capital distribution will generally not be taxable, but will reduce each shareholder's cost basis in the Fund and result in a higher reported capital gain or lower reported capital loss when those shares on which the distribution was received are sold.

A dividend or distribution received shortly after the purchase of shares reduces the NAV of the shares by the amount of the dividend or distribution and, although in effect a return of capital, will be taxable to the shareholder. If the NAV of shares were reduced below the shareholder's cost by dividends or distributions representing gains realized on sales of securities, such dividends or distributions would be a return of investment though taxable to the shareholder in the same manner as other dividends or distributions.

The Fund (or its administrative agent) will inform you of the amount of your ordinary income dividends, qualified dividend income and capital gain distributions, if any, and will advise you of their tax status for federal income tax purposes shortly after the close of each calendar year. If you have not held your shares for a full year, the Fund may designate and distribute to you, as ordinary income, qualified dividend income or capital gain, a percentage of income that is not equal to the actual amount of such income earned during the period of your investment in the Fund.

Dividends declared to shareholders of record in October, November or December and actually paid in January of the following year will be treated as having been received by shareholders on December 31 of the calendar year in which declared. Under this rule, therefore, a shareholder may be taxed in one year on dividends or distributions actually received in January of the following year.

Sales or Redemptions. Any gain or loss recognized on a sale or redemption of shares of the Fund by a shareholder who is not a dealer in securities will generally, for individual shareholders, be treated as a long-term capital gain or loss if the shares have been held for more than twelve months and otherwise will be treated as a short-term capital gain or loss. However, if shares on which a shareholder has received a net capital gain distribution are subsequently sold or redeemed and such shares have been held for six months or less, any loss recognized will be treated as a long-term capital loss to the extent of the net capital gain distribution. In addition, the loss realized on a sale or other disposition of shares will be disallowed to the extent a shareholder repurchases (or enters into a contract to or option to repurchase) shares within a period of 61 days (beginning 30 days before and ending 30 days after the disposition of the shares). This loss disallowance rule will apply to shares received through the reinvestment of dividends during the 61-day period.

U.S. individuals with income exceeding \$200,000 (\$250,000 if married and filing jointly) are subject to a 3.8% Medicare contribution tax on their “net investment income,” including interest, dividends, and capital gains (including any capital gains realized on the sale of shares of the Fund).

The Fund (or its administrative agent) must report to the Internal Revenue Service (“IRS”) and furnish to Fund shareholders the cost basis information for purchases of Fund shares. In addition to the requirement to report the gross proceeds from the sale of Fund shares, the Fund is also required to report the cost basis information for such shares and indicate whether these shares had a short-term or long-term holding period. For each sale of Fund shares, the Fund will permit Fund shareholders to elect from among several IRS-accepted cost basis methods, including the average basis method. In the absence of an election, the Fund will use the average basis method as its default cost basis method. The cost basis method elected by the Fund shareholder (or the cost basis method applied by default) for each sale of Fund shares may not be changed after the settlement date of each such sale of Fund shares. Fund shareholders should consult with their tax advisors to determine the best IRS-accepted cost basis method for their tax situation and to obtain more information about cost basis reporting. Shareholders also should carefully review any cost basis information provided to them and make any additional basis, holding period or other adjustments that are required when reporting these amounts on their federal income tax returns.

Tax Treatment of Complex Securities. The Fund may invest in complex securities and these investments may be subject to numerous special and complex tax rules. These rules could affect the Fund’s ability to qualify as a RIC, affect whether gains and losses recognized by the Fund are treated as ordinary income or capital gain, accelerate the recognition of income to the Fund and/or defer the Fund’s ability to recognize losses, and, in limited cases, subject the Fund to U.S. federal income tax on income from certain of its foreign securities. In turn, these rules may affect the amount, timing or character of the income distributed to you by the Fund.

Certain derivative investment by the Fund, such as exchange-traded products and over-the-counter derivatives, may not produce qualifying income for purposes of the “Qualifying Income Test” described above, which must be met in order for the Fund to maintain its status as a RIC under the Code. In addition, the determination of the value and the identity of the issuer of such derivative investments are often unclear for purposes of the “Asset Test” described above. The Fund intends to carefully monitor such investments to ensure that any non-qualifying income does not exceed permissible limits and to ensure that it is adequately diversified under the “Asset Test.” The Fund, however, may not be able to accurately predict the non-qualifying income from these investments and there are no assurances that the IRS will agree with the Fund’s determination of the “Asset Test” with respect to such derivatives.

The Fund is currently permitted to invest in commodity-linked derivative instruments. Such investments may generate non-qualifying income for the Fund for purposes of the Qualifying Income Test discussed above. The Fund intends to carefully monitor the income from such investments in order to satisfy the Qualifying Income Test by maintaining the Fund’s non-qualifying income below 10% of the Fund’s gross income for a taxable year. However, there is no guarantee that the Fund will be successful in this regard. If the Fund fails to qualify as a RIC and to avail itself of certain relief provisions discussed above, it would be subject to tax at regular corporate rates without any deduction for distributions to shareholders, and its distributions would generally be taxable as dividends.

The Fund is required for federal income tax purposes to mark-to-market and recognize as income for each taxable year its net unrealized gains and losses on certain futures contracts as of the end of the year as well as those actually realized during the year. Gain or loss from futures and options contracts on broad-based indexes required to be marked to market will be 60% long-term and 40% short-term capital gain or loss. Application of this rule may alter the timing and character of distributions to shareholders. The Fund may be required to defer the recognition of losses on futures contracts, options contracts and swaps to the extent of any unrecognized gains on

offsetting positions held by the Fund. These provisions may also require the Fund to mark-to-market certain types of positions in its portfolio (i.e., treat them as if they were closed out), which may cause the Fund to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the Distribution Requirement and for avoiding the excise tax discussed above. Accordingly, in order to avoid certain income and excise taxes, the Fund may be required to liquidate its investments at a time when the investment managers might not otherwise have chosen to do so.

With respect to investments in STRIPS, treasury receipts, and other zero coupon securities which are sold at original issue discount and thus do not make periodic cash interest payments, the Fund will be required to include as part of its current income the imputed interest on such obligations even though the Fund has not received any interest payments on such obligations during that period. Because the Fund intends to distribute all of its net investment income to its shareholders, the Fund may have to sell Fund securities to distribute such imputed income which may occur at a time when the investment managers would not have chosen to sell such securities and which may result in taxable gain or loss.

Any market discount recognized on a bond is taxable as ordinary income. A market discount bond is a bond acquired in the secondary market at a price below redemption value or adjusted issue price if issued with original issue discount. Absent an election by the Fund to include the market discount in income as it accrues, gain on the Fund's disposition of such an obligation will be treated as ordinary income rather than capital gain to the extent of the accrued market discount.

The Fund may invest in REITs. Investments in REIT equity securities may require the Fund to accrue and distribute income not yet received. To generate sufficient cash to make the requisite distributions, the Fund may be required to sell securities in its portfolio (including when it is not advantageous to do so) that it otherwise would have continued to hold. The Fund's investments in REIT equity securities may at other times result in the Fund's receipt of cash in excess of the REIT's earnings; if the Fund distributes these amounts, these distributions could constitute a return of capital to the Fund's shareholders for federal income tax purposes. Dividends paid by a REIT, other than capital gain distributions, will be taxable as ordinary income up to the amount of the REIT's current and accumulated earnings and profits. Capital gain dividends paid by a REIT to the Fund will be treated as long-term capital gains by the Fund and, in turn, may be distributed by the Fund to its shareholders as a capital gain distribution. Dividends received by the Fund from a REIT generally will not constitute qualified dividend income or qualify for the dividends-received deduction. If a REIT is operated in a manner such that it fails to qualify as a REIT, an investment in the REIT would become subject to double taxation, meaning the taxable income of the REIT would be subject to federal income tax at regular corporate rates without any deduction for dividends paid to shareholders and the dividends would be taxable to shareholders as ordinary income (or possibly as qualified dividend income) to the extent of the REIT's current and accumulated earnings and profits.

If the Fund owns shares in certain foreign investment entities, referred to as "passive foreign investment companies" or "PFICs," the Fund will generally be subject to one of the following special tax regimes: (i) the Fund may be liable for U.S. federal income tax, and an additional interest charge, on a portion of any "excess distribution" from such foreign entity or any gain from the disposition of such shares, even if the entire distribution or gain is paid out by the Fund as a dividend to its shareholders; (ii) if the Fund were able and elected to treat a PFIC as a "qualified electing fund" or "QEF," the Fund would be required each year to include in income, and distribute to shareholders in accordance with the distribution requirements set forth above, the Fund's pro rata share of the ordinary earnings and net capital gains of the PFIC, whether or not such earnings or gains are distributed to the Fund, whether or not such earnings or gains are distributed to the Fund; or (iii) the Fund may be entitled to mark-to-market annually shares of the PFIC, and in such event would be required to distribute to shareholders any such mark-to-market gains in accordance with the distribution requirements set forth above.

The Fund intends to make the appropriate tax elections, if possible, and take any additional steps that are necessary to mitigate the effect of these rules.

Certain Foreign Currency Tax Issues. The Fund's transactions in foreign currencies and forward foreign currency contracts will generally be subject to special provisions of the Code that, among other things, may affect the character of gains and losses realized by the Fund (i.e., may affect whether gains or losses are ordinary or capital), accelerate recognition of income to the Fund and defer losses. These rules could therefore affect the character, amount and timing of distributions to shareholders. These provisions also may require the Fund to mark-to-market certain types of positions in its portfolio (i.e., treat them as if they were closed out) which may cause the Fund to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the Distribution Requirements and for avoiding the excise tax described above. The Fund intends to monitor its transactions, intends to make the appropriate tax elections, and intends to make the appropriate entries in its books and records when it acquires any foreign currency or forward foreign currency contract in order to mitigate the effect of these rules so as to prevent disqualification of the Fund as a RIC and minimize the imposition of income and excise taxes.

The U.S. Treasury Department has authority to issue regulations that would exclude foreign currency gains from the Qualifying Income Test described above if such gains are not directly related to the Fund's business of investing in stock or securities (or options and futures with respect to stock or securities). Accordingly, regulations may be issued in the future that could treat some or all of the Fund's non-U.S. currency gains as non-qualifying income, thereby potentially jeopardizing the Fund's status as a RIC for all years to which the regulations are applicable.

Foreign Taxes. Dividends and interest received by the Fund may be subject to income, withholding or other taxes imposed by foreign countries and U.S. possessions that would reduce the yield on the Fund's stock or securities. Tax conventions between certain countries and the United States may reduce or eliminate these taxes. Foreign countries generally do not impose taxes on capital gains with respect to investments by foreign investors.

If more than 50% of the value of the Fund's total assets at the close of its taxable year consists of stocks or securities of foreign corporations, the Fund will be eligible to and intends to file an election with the IRS that may enable shareholders, in effect, to receive either the benefit of a foreign tax credit, or a deduction from such taxes, with respect to any foreign and U.S. possessions income taxes paid by the Fund, subject to certain limitations. Pursuant to the election, the Fund will treat those taxes as dividends paid to its shareholders. Each such shareholder will be required to include a proportionate share of those taxes in gross income as income received from a foreign source and must treat the amount so included as if the shareholder had paid the foreign tax directly. The shareholder may then either deduct the taxes deemed paid by him or her in computing his or her taxable income or, alternatively, use the foregoing information in calculating any foreign tax credit they may be entitled to use against the shareholders' federal income tax. If the Fund makes the election, the Fund (or its administrative agent) will report annually to its shareholders the respective amounts per share of the Fund's income from sources within, and taxes paid to, foreign countries and U.S. possessions.

Tax-Exempt Shareholders. Certain tax-exempt shareholders, including qualified pension plans, individual retirement accounts, salary deferral arrangements, 401(k)s, and other tax-exempt entities, generally are exempt from federal income taxation except with respect to their unrelated business taxable income ("UBTI"). Under current law, the Fund generally serves to block UBTI from being realized by its tax-exempt shareholders. However, notwithstanding the foregoing, the tax-exempt shareholder could realize UBTI by virtue of an investment in the Fund where, for example: (i) the Fund invests in residual interests of Real Estate Mortgage Investment Conduits ("REMICs"), (ii) the Fund invests in a REIT that is a taxable mortgage pool ("TMP") or that has a subsidiary that is a TMP or that invests in the residual interest of a REMIC, or (iii) shares in the Fund

constitute debt-financed property in the hands of the tax-exempt shareholder within the meaning of section 514(b) of the Code. Charitable remainder trusts are subject to special rules and should consult their tax advisor. The IRS has issued guidance with respect to these issues and prospective shareholders, especially charitable remainder trusts, are strongly encouraged to consult their tax advisors regarding these issues.

Backup Withholding. The Fund will be required in certain cases to withhold at a 28% withholding rate and remit to the U.S. Treasury the amount withheld on amounts payable to any shareholder who: (i) has provided the Fund either an incorrect tax identification number or no number at all; (ii) is subject to backup withholding by the IRS for failure to properly report payments of interest or dividends; (iii) has failed to certify to the Fund that such shareholder is not subject to backup withholding; or (iv) has failed to certify to the Fund that the shareholder is a U.S. person (including a resident alien).

Non-U.S. Investors. Any non-U.S. investors in the Fund may be subject to U.S. withholding and estate tax and are encouraged to consult their tax advisors prior to investing in the Fund. Foreign shareholders (i.e., nonresident alien individuals and foreign corporations, partnerships, trusts and estates) are generally subject to U.S. withholding tax at the rate of 30% (or a lower tax treaty rate) on distributions derived from taxable ordinary income. The Fund may, under certain circumstances, report all or a portion of a dividend as an “interest-related dividend” or a “short-term capital gain dividend,” which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Short-term capital gain dividends received by a nonresident alien individual who is present in the United States for a period or periods aggregating 183 days or more during the taxable year are not exempt from this 30% withholding tax. Gains realized by foreign shareholders from the sale or other disposition of shares of the Fund generally are not subject to U.S. taxation, unless the recipient is an individual who is physically present in the United States for 183 days or more per year. Foreign shareholders who fail to provide an applicable IRS form may be subject to backup withholding on certain payments from the Fund. Backup withholding will not be applied to payments that are subject to the 30% (or lower applicable treaty rate) withholding tax described in this paragraph. Different tax consequences may result if the foreign shareholder is engaged in a trade or business within the United States. In addition, the tax consequences to a foreign shareholder entitled to claim the benefits of a tax treaty may be different than those described above.

Under legislation generally known as “FATCA” (the Foreign Account Tax Compliance Act), the Fund is required to withhold 30% of certain ordinary dividends it pays, and, after December 31, 2018, 30% of the gross proceeds of share redemptions and certain capital gain dividends it pays, to shareholders that fail to meet prescribed information reporting or certification requirements. In general, no such withholding will be required with respect to a U.S. person or non-U.S. individual that timely provides the certifications required by the Fund or its agent on a valid IRS Form W-9 or applicable IRS Form W-8, respectively. Shareholders potentially subject to withholding include foreign financial institutions (“FFIs”), such as non-U.S. investment funds, and non-financial foreign entities (“NFFE”). To avoid withholding under FATCA, an FFI generally must enter into an information sharing agreement with the IRS in which it agrees to report certain identifying information (including name, address, and taxpayer identification number) with respect to its U.S. account holders (which, in the case of an entity shareholder, may include its direct and indirect U.S. owners), and an NFFE generally must identify and provide other required information to the Fund or other withholding agent regarding its U.S. owners, if any. Such non-U.S. shareholders also may fall into certain exempt, excepted or deemed compliant categories as established by regulations and other guidance. A non-U.S. shareholder resident or doing business in a country that has entered into an intergovernmental agreement with the U.S. to implement FATCA will be exempt from FATCA withholding provided that the shareholder and the applicable foreign government comply with the terms of the agreement.

A non-U.S. entity that invests in the Fund will need to provide the Fund with documentation properly certifying the entity's status under FATCA in order to avoid FATCA withholding. Non-U.S. investors in the Fund should consult their tax advisors in this regard.

Tax Shelter Reporting Regulations. Under U.S. Treasury regulations, generally, if a shareholder recognizes a loss of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder, the shareholder must file with the IRS a disclosure statement on Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a RIC such as the Fund are not excepted. Future guidance may extend the current exception from this reporting requirement to shareholders of most or all RICs. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Shareholders should consult their tax advisors to determine the applicability of these regulations in light of their individual circumstances.

State Taxes. Depending upon state and local law, distributions by the Fund to its shareholders and the ownership of such shares may be subject to state and local taxes. Rules of state and local taxation of dividend and capital gains distributions from RICs often differ from the rules for federal income taxation described above. It is expected that the Fund will not be liable for corporate tax in Delaware if it qualifies as a RIC for federal income tax purposes.

Many states grant tax-free status to dividends paid to you from interest earned on direct obligations of the U.S. government, subject in some states to minimum investment requirements that must be met by the Fund. Investment in Ginnie Mae or Fannie Mae securities, banker's acceptances, commercial paper, and repurchase agreements collateralized by U.S. government securities do not generally qualify for such tax-free treatment. The rules on exclusion of this income are different for corporate shareholders. Shareholders are urged to consult their tax advisors regarding state and local taxes applicable to an investment in the Fund.

The Fund's shares held in a tax-qualified retirement account will generally not be subject to federal taxation on income and capital gains distributions from the Fund until a shareholder begins receiving payments from their retirement account. Because each shareholder's tax situation is different, shareholders should consult their tax advisor about the tax implications of an investment in the Fund.

FUND TRANSACTIONS

Brokerage Transactions. Generally, equity securities, both listed and over-the-counter, are bought and sold through brokerage transactions for which commissions are payable. Purchases from underwriters will include the underwriting commission or concession, and purchases from dealers serving as market makers will include a dealer's mark-up or reflect a dealer's mark-down. Money market securities and other debt securities are usually bought and sold directly from the issuer or an underwriter or market maker for the securities. Generally, the Fund will not pay brokerage commissions for such purchases. When a debt security is bought from an underwriter, the purchase price will usually include an underwriting commission or concession. The purchase price for securities bought from dealers serving as market makers will similarly include the dealer's mark up or reflect a dealer's mark down. When the Fund executes transactions in the over-the-counter market, it will generally deal with primary market makers unless prices that are more favorable are otherwise obtainable.

In addition, an adviser may place a combined order for two or more accounts it manages, including the Fund, engaged in the purchase or sale of the same security if, in its judgment, joint execution is in the best interest of each participant and will result in best price and execution. Transactions involving commingled orders are allocated in a manner deemed equitable to each account or fund. Although it is recognized that, in some cases, the

joint execution of orders could adversely affect the price or volume of the security that a particular account or the Fund may obtain, it is the opinion of the advisers that the advantages of combined orders outweigh the possible disadvantages of separate transactions.

For the fiscal years ended October 31, 2014, 2015 and 2016, the Fund paid the following aggregate brokerage commissions on portfolio transactions:

| Aggregate Dollar Amount of Brokerage Commissions Paid | | |
|--|-------------|-------------|
| <i>2014¹</i> | <i>2015</i> | <i>2016</i> |
| \$47,686 | \$106,745 | \$79,933 |

1 Represents the fiscal period from July 25, 2014 (commencement of Fund operations) to October 31, 2014.

Brokerage Selection. The Trust does not expect to use one particular broker or dealer, and when one or more brokers is believed capable of providing the best combination of price and execution, an adviser may select a broker based upon brokerage or research services provided to the adviser. The advisers may pay a higher commission than otherwise obtainable from other brokers in return for such services only if a good faith determination is made that the commission is reasonable in relation to the services provided.

Section 28(e) of the 1934 Act permits an adviser, under certain circumstances, to cause the Fund to pay a broker or dealer a commission for effecting a transaction in excess of the amount of commission another broker or dealer would have charged for effecting the transaction in recognition of the value of brokerage and research services provided by the broker or dealer. In addition to agency transactions, an adviser may receive brokerage and research services in connection with certain riskless principal transactions, in accordance with applicable SEC guidance. Brokerage and research services include: (1) furnishing advice as to the value of securities, the advisability of investing in, purchasing or selling securities, and the availability of securities or purchasers or sellers of securities; (2) furnishing analyses and reports concerning issuers, industries, securities, economic factors and trends, portfolio strategy, and the performance of accounts; and (3) effecting securities transactions and performing functions incidental thereto (such as clearance, settlement, and custody). In the case of research services, the advisers believe that access to independent investment research is beneficial to their investment decision-making processes and, therefore, to the Fund.

To the extent research services may be a factor in selecting brokers, such services may be in written form or through direct contact with individuals and may include information as to particular companies and securities as well as market, economic, or institutional areas and information which assists in the valuation and pricing of investments. Examples of research-oriented services for which the advisers might utilize Fund commissions include research reports and other information on the economy, industries, sectors, groups of securities, individual companies, statistical information, political developments, technical market action, pricing and appraisal services, credit analysis, risk measurement analysis, performance and other analysis. An adviser may use research services furnished by brokers in servicing all client accounts and not all services may necessarily be used by the adviser in connection with the Fund or any other specific client account that paid commissions to the broker providing such services. Information so received by the adviser will be in addition to and not in lieu of the services required to be performed by the adviser under an Investment Advisory Agreement. Any advisory or other fees paid to the advisers are not reduced as a result of the receipt of research services.

In some cases an adviser may receive a service from a broker that has both a “research” and a “non-research” use. When this occurs, the adviser makes a good faith allocation, under all the circumstances, between the research and non-research uses of the service. The percentage of the service that is used for research purposes may be paid for with client commissions, while the adviser will use its own funds to pay for the percentage of the service that is used for non-research purposes. In making this good faith allocation, the advisers face a potential conflict of

interest, but the advisers believe that their allocation procedures are reasonably designed to ensure that they appropriately allocate the anticipated use of such services to their research and non-research uses.

From time to time, an adviser may purchase new issues of securities for clients, including the Fund, in a fixed price offering. In these situations, the seller may be a member of the selling group that will, in addition to selling securities, provide the advisers with research services. FINRA has adopted rules expressly permitting these types of arrangements under certain circumstances. Generally, the seller will provide research “credits” in these situations at a rate that is higher than that which is available for typical secondary market transactions. These arrangements may not fall within the safe harbor of Section 28(e).

For the fiscal year ended October 31, 2016, the Fund did not pay any commissions on brokerage transactions directed to brokers pursuant to an agreement or understanding whereby the broker provides research or other brokerage services to an adviser.

Brokerage with Fund Affiliates. The Fund may execute brokerage or other agency transactions through registered broker-dealer affiliates of either the Fund, the Adviser or the Sub-Advisers for a commission in conformity with the 1940 Act and rules promulgated by the SEC. The 1940 Act requires that commissions paid to the affiliate by the Fund for exchange transactions not exceed “usual and customary” brokerage commissions. The rules define “usual and customary” commissions to include amounts which are “reasonable and fair compared to the commission, fee or other remuneration received or to be received by other brokers in connection with comparable transactions involving similar securities being purchased or sold on a securities exchange during a comparable period of time.” The Trustees, including those who are not “interested persons” of the Fund, have adopted procedures for evaluating the reasonableness of commissions paid to affiliates and review these procedures periodically.

For the fiscal period from July 25, 2014 (commencement of Fund operations) to October 31, 2014 and the fiscal years ended October 31, 2015 and 2016, the Fund did not pay brokerage commissions on portfolio transactions effected by affiliated brokers.

Securities of “Regular Broker-Dealers.” The Fund is required to identify any securities of its “regular brokers and dealers” (as such term is defined in the 1940 Act) that the Fund held during its most recent fiscal year. During the fiscal year ended October 31, 2016, the Fund did not hold any securities of its “regular brokers or dealers.”

Portfolio Turnover Rates. Portfolio turnover rate is defined under SEC rules as the greater of the value of the securities purchased or securities sold, excluding all securities whose maturities at the time of acquisition were one-year or less, divided by the average monthly value of such securities owned during the year. Based on this definition, instruments with remaining maturities of less than one-year are excluded from the calculation of the portfolio turnover rate. Instruments excluded from the calculation of portfolio turnover generally would include the futures contracts in which the Fund may invest since such contracts generally have remaining maturities of less than one-year. The Fund may at times hold investments in other short-term instruments, such as repurchase agreements, which are excluded for purposes of computing portfolio turnover. For the fiscal years ended October 31, 2015 and 2016, the Fund’s portfolio turnover rates were as follows:

| Portfolio Turnover Rates | |
|--------------------------|------|
| 2015 | 2016 |
| 603% | 796% |

PORTFOLIO HOLDINGS

The Board has approved policies and procedures that govern the timing and circumstances regarding the disclosure of Fund portfolio holdings information to shareholders and third parties. These policies and procedures are designed to ensure that disclosure of information regarding the Fund's portfolio securities is in the best interests of Fund shareholders, and include procedures to address conflicts between the interests of the Fund's shareholders, on the one hand, and those of the Adviser, Sub-Advisers, principal underwriter or any affiliated person of the Fund, the Adviser, Sub-Advisers or their principal underwriter, on the other. Pursuant to such procedures, the Board has authorized the Adviser's Chief Compliance Officer (the "Authorized Person") to authorize the release of the Fund's portfolio holdings, as necessary, in conformity with the foregoing principles. The Authorized Person reports at least quarterly to the Board regarding the implementation of such policies and procedures.

Pursuant to applicable law, the Fund is required to disclose its complete portfolio holdings quarterly, within 60 days of the end of each fiscal quarter (currently, each January 31, April 30, July 31 and October 31). The Fund discloses a complete schedule of investments in each Semi-Annual Report and Annual Report to Fund shareholders following the second and fourth fiscal quarters and in quarterly holdings reports filed with the SEC on Form N-Q following the first and third fiscal quarters. Semi-Annual and Annual Reports are distributed to Fund shareholders. Reports filed with the SEC on Form N-Q are not distributed to Fund shareholders, but are available, free of charge, on the EDGAR database on the SEC's website at www.sec.gov.

In addition to the quarterly portfolio holdings disclosure required by applicable law, ten calendar days after each month end, a complete list of the Fund's portfolio holdings as of the end of such month may be made available at <http://www.fierausa.com/investment-strategies/alternatives/liquid-alternatives/altsfund/>. The Adviser may exclude any portion of the portfolio holdings from such publication when deemed in the best interest of the Fund. Beginning on the day after any portfolio holdings information is posted on the Fund's website, such information will be delivered directly to any person that requests it, through electronic or other means. The portfolio holdings information placed on the Fund's website generally will remain there until replaced by new postings as described above.

The Fund's policies and procedures provide that the Authorized Person may authorize disclosure of portfolio holdings information to third parties at differing times and/or with different lag times than the information posted to the internet; provided that the recipient is, either by contractual agreement or otherwise by law, (i) required to maintain the confidentiality of the information and (ii) prohibited from using the information to facilitate or assist in any securities transactions or investment program. The Fund will review a third party's request for portfolio holdings information to determine whether the third party has legitimate business objectives in requesting such information.

The Trust's policies and procedures prohibit any compensation or other consideration from being paid to or received by any party in connection with the disclosure of portfolio holdings information, including the Fund, Adviser, Sub-Advisers and their affiliates or recipients of the Fund's portfolio holdings information.

In addition, the Fund's service providers, such as the Custodian, Administrator and Transfer Agent, may receive portfolio holdings information as frequently as daily in connection with their services to the Fund. In addition to any contractual provisions relating to confidentiality of information that may be included in the service providers contract with the Trust, these arrangements impose obligations on the Fund's service providers that would prohibit them from disclosing or trading on the Fund's non-public information. Financial printers and pricing information vendors may receive portfolio holdings information, as necessary, in connection with their services to the Fund.

The Administrator may disclose portfolio holdings information to rating agencies and similar parties as part of its services to the Fund if such disclosure is made in the best interests of shareholders, as determined by the Trust's

president and chief compliance officer. Portfolio holdings information may be disclosed no more frequently than monthly to such parties. Monthly disclosures will not be made sooner than three (3) days after the date of the information.

DESCRIPTION OF SHARES

The Declaration of Trust authorizes the issuance of an unlimited number of funds and shares of each fund, each of which represents an equal proportionate interest in that fund with each other share. Shares are entitled upon liquidation to a pro rata share in the net assets of the fund. Shareholders have no preemptive rights. The Declaration of Trust provides that the Trustees may create additional series or classes of shares. All consideration received by the Trust for shares of any additional funds and all assets in which such consideration is invested would belong to that fund and would be subject to the liabilities related thereto. Share certificates representing shares will not be issued. The Fund's shares, when issued, are fully paid and non-assessable.

LIMITATION OF TRUSTEES' LIABILITY

The Declaration of Trust provides that a Trustee shall be liable only for his or her own willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of the office of Trustee, and shall not be liable for errors of judgment or mistakes of fact or law. The Trustees shall not be responsible or liable in any event for any neglect or wrongdoing of any officer, agent, employee, investment adviser or principal underwriter of the Trust, nor shall any Trustee be responsible for the act or omission of any other Trustee. The Declaration of Trust also provides that the Trust shall indemnify each person who is, or has been, a Trustee, officer, employee or agent of the Trust, any person who is serving or has served at the Trust's request as a Trustee, officer, employee or agent of another organization in which the Trust has any interest as a shareholder, creditor or otherwise to the extent and in the manner provided in the By-Laws. However, nothing in the Declaration of Trust shall protect or indemnify a Trustee against any liability for his or her willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of the office of Trustee. Nothing contained in this section attempts to disclaim a Trustee's individual liability in any manner inconsistent with the federal securities laws.

PROXY VOTING

The Board has delegated responsibility for decisions regarding proxy voting for securities held by the Fund to the Adviser, who in turn has delegated the responsibility to the Sub-Advisers. To the extent that they invest in voting securities on behalf of the Fund, each Sub-Adviser will vote such proxies in accordance with its proxy policies and procedures. The proxy voting policies and procedures of the Adviser and Acadian are included in Appendix B to the SAI. As of the date of this SAI, it is not contemplated that the sleeves of the Fund sub-advised by Karya or MAI will include voting securities, and as a result there are no proxy voting policies and procedures attached for Karya or MAI.

Ellington will engage a third-party proxy voting service to vote proxies with respect to positions held by the Fund as a result of the advisory services provided by Ellington. Proxies will be voted by the service in accordance with its then-current guidelines. Though in the ordinary course proxies will be voted in accordance with the service's guidelines, the recommendation of the proxy service may be overridden on a case-by-case basis, provided that the relevant Ellington portfolio manager has made a determination that it is in the best interests of the Fund to vote contrary to the recommendation of the service and the override has been pre-approved by Ellington's Chief Compliance Officer or his designee. The proxy voting guidelines utilized by the third-party proxy voting service engaged by Ellington are included in Appendix B to the SAI.

The Trust is required to disclose annually the Fund’s complete proxy voting record during the most recent 12-month period ended June 30 on Form N-PX. This voting record is available: (i) without charge, upon request, by calling 1-844-755-3863; and (ii) on the SEC’s website at <http://www.sec.gov>.

CODES OF ETHICS

The Board on behalf of the Trust has adopted a Code of Ethics pursuant to Rule 17j-1 under the 1940 Act. In addition, the Adviser, the Sub-Advisers, the Administrator and the Distributor have adopted Codes of Ethics pursuant to Rule 17j-1. These Codes of Ethics apply to the personal investing activities of trustees, officers and certain employees (“Access Persons”). Rule 17j-1 and the Codes are designed to prevent unlawful practices in connection with the purchase or sale of securities by Access Persons. Under each Code of Ethics, Access Persons are permitted to engage in personal securities transactions, including securities that may be purchased or held by the Fund, but are required to report their personal securities transactions for monitoring purposes. In addition, certain Access Persons are required to obtain approval before investing in initial public offerings or private placements or are prohibited from making such investments. Copies of these Codes of Ethics are on file with the SEC, and are available to the public.

PRINCIPAL SHAREHOLDERS AND CONTROL PERSONS

As of February 13, 2017, the following persons were record owners (or to the knowledge of the Trust, beneficial owners) of 5% or more of any class of the shares of the Fund. Persons beneficially owning more than 25% of the Fund’s outstanding shares may be deemed to “control” the Fund within the meaning of the 1940 Act. Shareholders controlling the Fund may have a significant impact on any shareholder vote of the Fund.

APPENDIX A

DESCRIPTION OF RATINGS

Description of Ratings

The following descriptions of securities ratings have been published by Moody's Investors Services, Inc. ("Moody's"), Standard & Poor's ("S&P"), and Fitch Ratings ("Fitch"), respectively.

DESCRIPTION OF MOODY'S GLOBAL RATINGS

Ratings assigned on Moody's global long-term and short-term rating scales are forward-looking opinions of the relative credit risks of financial obligations issued by non-financial corporates, financial institutions, structured finance vehicles, project finance vehicles, and public sector entities. Long-term ratings are assigned to issuers or obligations with an original maturity of one year or more and reflect both on the likelihood of a default on contractually promised payments and the expected financial loss suffered in the event of default. Short-term ratings are assigned to obligations with an original maturity of thirteen months or less and reflect both on the likelihood of a default on contractually promised payments and the expected financial loss suffered in the event of default.

Description of Moody's Global Long-Term Ratings

Aaa Obligations rated Aaa are judged to be of the highest quality, subject to the lowest level of credit risk.

Aa Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

A Obligations rated A are judged to be upper-medium grade and are subject to low credit risk.

Baa Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

Ba Obligations rated Ba are judged to be speculative and are subject to substantial credit risk.

B Obligations rated B are considered speculative and are subject to high credit risk.

Caa Obligations rated Caa are judged to be speculative of poor standing and are subject to very high credit risk.

Ca Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

C Obligations rated C are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Hybrid Indicator (hyb)

The hybrid indicator (hyb) is appended to all ratings of hybrid securities issued by banks, insurers, finance companies, and securities firms. By their terms, hybrid securities allow for the omission of scheduled dividends, interest, or principal payments, which can potentially result in impairment if such an omission occurs. Hybrid securities may also be subject to contractually allowable write-downs of principal that could result in impairment. Together with the hybrid indicator, the long-term obligation rating assigned to a hybrid security is an expression of the relative credit risk associated with that security.

Description of Moody's Global Short-Term Ratings

P-1 Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

P-2 Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

P-3 Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to repay short-term obligations.

NP Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

Description of Moody's U.S. Municipal Short-Term Obligation Ratings

The Municipal Investment Grade ("MIG") scale is used to rate U.S. municipal bond anticipation notes of up to three years maturity. Municipal notes rated on the MIG scale may be secured by either pledged revenues or proceeds of a take-out financing received prior to note maturity. MIG ratings expire at the maturity of the obligation, and the issuer's long-term rating is only one consideration in assigning the MIG rating. MIG ratings are divided into three levels—MIG 1 through MIG 3—while speculative grade short-term obligations are designated SG.

Moody's U.S. municipal short-term obligation ratings are as follows:

MIG 1 This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

MIG 2 This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

MIG 3 This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

SG This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

Description of Moody's Demand Obligation Ratings

In the case of variable rate demand obligations (“VRDOs”), a two-component rating is assigned: a long or short-term debt rating and a demand obligation rating. The first element represents Moody’s evaluation of risk associated with scheduled principal and interest payments. The second element represents Moody’s evaluation of risk associated with the ability to receive purchase price upon demand (“demand feature”). The second element uses a rating from a variation of the MIG scale called the Variable Municipal Investment Grade (“VMIG”) scale.

Moody’s demand obligation ratings are as follows:

VMIG 1 This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

VMIG 2 This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

VMIG 3 This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

SG This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have an investment grade short-term rating or may lack the structural and/or legal protections necessary to ensure the timely payment of purchase price upon demand.

DESCRIPTION OF S&P’S ISSUE CREDIT RATINGS

An S&P issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion reflects S&P’s view of the obligor’s capacity and willingness to meet its financial commitments as they come due, and may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default.

Issue credit ratings can be either long-term or short-term. Short-term ratings are generally assigned to those obligations considered short-term in the relevant market. In the U.S., for example, that means obligations with an original maturity of no more than 365 days—including commercial paper. Short-term ratings are also used to indicate the creditworthiness of an obligor with respect to put features on long-term obligations. Medium-term notes are assigned long-term ratings.

Issue credit ratings are based, in varying degrees, on S&P’s analysis of the following considerations:

- The likelihood of payment—the capacity and willingness of the obligor to meet its financial commitment on a financial obligation in accordance with the terms of the obligation;

- The nature of and provisions of the financial obligation; and the promise S&P imputes; and
- The protection afforded by, and relative position of, the obligation in the event of bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

Issue ratings are an assessment of default risk, but may incorporate an assessment of relative seniority or ultimate recovery in the event of default. Junior obligations are typically rated lower than senior obligations, to reflect the lower priority in bankruptcy. (Such differentiation may apply when an entity has both senior and subordinated obligations, secured and unsecured obligations, or operating company and holding company obligations.)

Description of S&P's Long-Term Issue Credit Ratings*

AAA An obligation rated 'AAA' has the highest rating assigned by S&P. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

AA An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

A An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

BB; B; CCC; CC; and C Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

CCC An obligation rated 'CCC' is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC An obligation rated 'CC' is currently highly vulnerable to nonpayment. The 'CC' rating is used when a default has not yet occurred, but S&P expects default to be a virtual certainty, regardless of the

anticipated time to default.

C An obligation rated 'C' is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared to obligations that are rated higher.

D An obligation rated 'D' is in default or in breach of an imputed promise. For non-hybrid capital instruments, the 'D' rating category is used when payments on an obligation are not made on the date due, unless S&P believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation's rating is lowered to 'D' if it is subject to a distressed exchange offer.

NR This indicates that no rating has been requested, or that there is insufficient information on which to base a rating, or that S&P does not rate a particular obligation as a matter of policy.

*The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

Description of S&P's Short-Term Issue Credit Ratings

A-1 A short-term obligation rated 'A-1' is rated in the highest category by S&P. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

A-2 A short-term obligation rated 'A-2' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

A-3 A short-term obligation rated 'A-3' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

B A short-term obligation rated 'B' is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties which could lead to the obligor's inadequate capacity to meet its financial commitments.

C A short-term obligation rated 'C' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.

D A short-term obligation rated 'D' is in default or in breach of an imputed promise. For non-hybrid capital instruments, the 'D' rating category is used when payments on an obligation are not made on the date due, unless S&P believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An

obligation's rating is lowered to 'D' if it is subject to a distressed exchange offer.

Description of S&P's Municipal Short-Term Note Ratings

An S&P U.S. municipal note rating reflects S&P's opinion about the liquidity factors and market access risks unique to the notes. Notes due in three years or less will likely receive a note rating. Notes with an original maturity of more than three years will most likely receive a long-term debt rating. In determining which type of rating, if any, to assign, S&P's analysis will review the following considerations:

- Amortization schedule—the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and
- Source of payment—the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

S&P's municipal short-term note ratings are as follows:

SP-1 Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

SP-2 Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

SP-3 Speculative capacity to pay principal and interest.

DESCRIPTION OF FITCH'S CREDIT RATINGS

Fitch's credit ratings provide an opinion on the relative ability of an entity to meet financial commitments, such as interest, preferred dividends, repayment of principal, insurance claims or counterparty obligations. Credit ratings are used by investors as indications of the likelihood of receiving the money owed to them in accordance with the terms on which they invested.

The terms "investment grade" and "speculative grade" have established themselves over time as shorthand to describe the categories 'AAA' to 'BBB' (investment grade) and 'BB' to 'D' (speculative grade). The terms "investment grade" and "speculative grade" are market conventions, and do not imply any recommendation or endorsement of a specific security for investment purposes. "Investment grade" categories indicate relatively low to moderate credit risk, while ratings in the "speculative" categories either signal a higher level of credit risk or that a default has already occurred.

Fitch's credit ratings do not directly address any risk other than credit risk. In particular, ratings do not deal with the risk of a market value loss on a rated security due to changes in interest rates, liquidity and other market considerations. However, in terms of payment obligation on the rated liability, market risk may be considered to the extent that it influences the *ability* of an issuer to pay upon a commitment. Ratings nonetheless do not reflect market risk to the extent that they influence the size or other conditionality of the *obligation* to pay upon a commitment (for example, in the case of index-linked bonds).

In the default components of ratings assigned to individual obligations or instruments, the agency typically rates to the likelihood of non-payment or default in accordance with the terms of that

instrument's documentation. In limited cases, Fitch may include additional considerations (i.e. rate to a higher or lower standard than that implied in the obligation's documentation). In such cases, the agency will make clear the assumptions underlying the agency's opinion in the accompanying rating commentary.

A designation of Not Rated or NR is used to denote securities not rated by Fitch where Fitch has rated some, but not all, securities comprising an issuance capital structure.

Description of Fitch's Long-Term Corporate Finance Obligations Ratings

AAA Highest credit quality. 'AAA' ratings denote the lowest expectation of credit risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

AA Very high credit quality. 'AA' ratings denote expectations of very low credit risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

A High credit quality. 'A' ratings denote expectations of low credit risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

BBB Good credit quality. 'BBB' ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate but adverse business or economic conditions are more likely to impair this capacity.

BB Speculative. 'BB' ratings indicate an elevated vulnerability to credit risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial alternatives may be available to allow financial commitments to be met.

B Highly speculative. 'B' ratings indicate that material credit risk is present.

CCC Substantial credit risk. 'CCC' ratings indicate that substantial credit risk is present.

CC Very high levels of credit risk. 'CC' ratings indicate very high levels of credit risk.

C Exceptionally high levels of credit risk. 'C' ratings indicate exceptionally high levels of credit risk.

Defaulted obligations typically are not assigned 'RD' or 'D' ratings, but are instead rated in the 'B' to 'C' rating categories, depending upon their recovery prospects and other relevant characteristics. This approach better aligns obligations that have comparable overall expected loss but varying vulnerability to default and loss.

Note: The modifiers "+" or "-" may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the 'AAA' obligation rating category, or to corporate finance obligation ratings in the categories below 'CCC'.

The subscript 'emr' is appended to a rating to denote embedded market risk which is beyond the scope of the rating. The designation is intended to make clear that the rating solely addresses the counterparty risk

of the issuing bank. It is not meant to indicate any limitation in the analysis of the counterparty risk, which in all other respects follows published Fitch criteria for analyzing the issuing financial institution. Fitch does not rate these instruments where the principal is to any degree subject to market risk.

Description of Fitch's Short-Term Ratings

A short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity or security stream and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-Term Ratings are assigned to obligations whose initial maturity is viewed as short term based on market convention. Typically, this means up to 13 months for corporate, sovereign, and structured obligations, and up to 36 months for obligations in U.S. public finance markets.

Fitch's short-term ratings are as follows:

F1 Highest short-term credit quality. Indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature.

F2 Good short-term credit quality. Good intrinsic capacity for timely payment of financial commitments.

F3 Fair short-term credit quality. The intrinsic capacity for timely payment of financial commitments is adequate.

B Speculative short-term credit quality. Minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

C High short-term default risk. Default is a real possibility.

RD Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically applicable to entity ratings only.

D Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.

APPENDIX B**PROXY VOTING POLICIES AND PROCEDURES AND/OR PROXY VOTING
GUIDELINES USED BY THE ADVISER AND CERTAIN SUB-ADVISERS**

| Exhibit | Investment Adviser or Sub-Adviser | Document |

| A | Fiera Capital Inc. | Proxy Voting Policies and Procedures |
| B | Ellington Management Group, L.L.C. | Proxy Voting Guidelines Utilized by Third Party Proxy Voting Service Engaged by Ellington |
| C | Acadian Asset Management LLC | Proxy Voting Policies and Procedures |

EXHIBIT A

Fiera Capital Inc.

PROXY VOTING POLICIES AND PROCEDURES

Rule 206(4)-6 under the Advisers Act requires every investment adviser who exercises voting authority with respect to client securities to adopt and implement written policies and procedures, reasonably designed to ensure that the adviser votes proxies in the best interest of its clients. The procedures must address material conflicts that may arise in connection with proxy voting. The Rule further requires the adviser to provide a concise summary of the adviser's proxy voting process and offer to provide copies of the complete proxy voting policy and procedures to clients upon request. Lastly, the Rule requires that the adviser disclose to clients how they may obtain information on how the adviser voted their proxies.

A. Thematic Equity Strategy

Fiera Capital Inc. (the "Firm") votes or acts in a manner that it believes is most likely to enhance the economic value of the underlying securities held in client accounts. The Thematic Equity Proxy Coordinator is responsible for the execution of this policy with respect to the Thematic Equity Strategy. With respect to any Registered Fund, the Firm applies this Policy and Procedures only to the extent it is required to exercise proxy voting authority (and authority for class actions) for the Registered Fund pursuant to the Registered Fund Agreement and only to the extent these Policy and Procedures are consistent with the Firm's obligations under the Registered Fund Agreement.

a. Procedures

i. General Procedures

In light of the Firm's fiduciary duty to its clients, and given the complexity of the issues that may be raised in connection with proxy votes, the Firm has retained Broadridge Financial Solutions, Inc. ("*Broadridge*"). Broadridge is an independent adviser that specializes in providing a variety of fiduciary-level proxy-related services to institutional investment managers. The services provided to the Firm include in-depth research, voting recommendations, vote execution and recordkeeping. Notwithstanding the foregoing, the Firm will use its best judgment to vote proxies in the manner it deems to be in the best interests of its clients. The Firm's general guidelines are contained in Attachment A.

ii. Restricted Voting Procedures

At times, neither the Firm nor Broadridge will be allowed to vote proxies on behalf of clients when those clients have adopted a securities lending program. The Firm recognizes that clients who have adopted securities lending programs have made a general determination that the lending program provides a greater economic benefit than retaining the ability to vote proxies.

In certain markets where share blocking occurs, shares must be "frozen" for trading purposes at the custodian or sub-custodian in order to vote. During the time that shares are blocked, any pending trades will not settle. Depending on the market, this period can last from one (1) day to three (3) weeks. Any sales that must be executed will settle late and potentially be subject to interest charges

or other punitive fees. For this reason, in blocking markets, the Firm retains the right to vote or not. Broadridge sends periodic reports of upcoming meetings in blocking markets detailing each client account entitled to vote, the number of shares held, type of meeting and blocking period. The Proxy Voting Coordinator will monitor these upcoming meetings, consult with the relevant investment committee members responsible for each industry or market and arrive at a decision on whether or not to vote. If the decision is made to vote, the Firm will process votes through Broadridge unless other action is required as detailed in this policy. The Proxy Voting Coordinator will periodically review Broadridge's procedures for handling the Firm's proxy voting.

iii. Conflict Assessment Procedures

In the event that the Portfolio Manager responsible for determining the Firm's vote becomes aware of a material conflict of interest in connection with a proxy vote, the Compliance Team must be notified. It is impossible to anticipate all material conflicts of interest that could arise in connection with proxy voting. The following examples are meant to help Portfolio Managers identify potential conflicts:

- The Firm provides investment advice to a senior executive of an issuer. The Firm receives a proxy solicitation from that issuer or from a competitor of that issuer;
- An issuer or some other third party offers the Firm or an employee compensation in exchange for voting a proxy in a particular way; and
- An employee, or a member of an employee's household, has a personal or business relationship with an issuer. The Firm receives a proxy solicitation from that issuer.

If the Firm detects a material conflict of interest in connection with a proxy solicitation, it will request that the relevant investment committee review any voting recommendation made by the Portfolio Manager while taking into account the conflict. In the event that the relevant investment committee is unable to mitigate the conflict, the Firm will vote based upon Broadridge's or an alternative third party service provider's recommendation.

iv. General Class Action Procedures

The Firm does not direct clients' participation in class action lawsuits; however, as part of its monitoring of client portfolios, the Firm will notify clients of class action lawsuits relevant to the clients' portfolio if the Firm becomes aware of the class action during the normal course of business in the event that the class action lawsuit had a reasonably likely chance of benefiting the client.

b. Recordkeeping

The Firm must maintain the documentation described in the following section for a period of not less than five (5) years, the first two (2) years at its principal place of business. The Firm will be responsible for the following procedures and for ensuring that the required documentation is retained.

c. Client request to review proxy votes

- i. Any request, whether written (including e-mail) or oral, received by any employee of the Firm, must be promptly reported to the Proxy Coordinator and the Compliance Team. All written requests must be retained in the permanent file.
- ii. The Compliance Team will record the identity of the client, the date of the request, and the disposition (e.g., provided a written or oral response to client's request, referred to third party, not a proxy voting client, other dispositions, etc.) in a suitable place.
- iii. In order to facilitate the management of proxy voting record keeping process, and to facilitate dissemination of such proxy voting records to clients, the Compliance Team will distribute to any client requesting proxy voting information the complete proxy voting record of the Firm for the period requested. Reports containing proxy information of only those issuers held by a certain client will not be created or distributed.¹
- iv. Furnish the information requested, free of charge, to the client within a reasonable time period (within 10 business days). Maintain a copy of the written record provided in response to client's written (including e-mail) or oral request. A copy of the written response should be attached and maintained with the client's written request, if applicable and maintained in the permanent file.
- v. Clients are permitted to request the proxy voting record for the five (5) year period prior to their request.

d. Proxy statements received regarding client securities. Upon receipt of a proxy, the Proxy Coordinator will copy or print a sample of the proxy statement or card and maintain the copy in a central file along with a sample of the proxy solicitation instructions.

Note: The Firm is permitted to rely on proxy statements filed on the SEC's EDGAR system instead of keeping its own copies.

e. Proxy voting records:

- i. The Firm Proxy Voting Record.
- ii. Documents prepared or created by the Firm that were material to making a decision on how to vote, or that memorialized the basis for the decision.
- iii. Documentation or notes or any communications received from third parties, other industry analysts, third party service providers, a company's management discussions, etc. that were material in the basis for the decision.

f. Disclosure. The Firm will ensure that Part 2 of Form ADV is updated as necessary to

¹ For clients who have provided the Firm with specific direction on proxy voting, the Chief Executive Officer and/or such similarly titled individual will review the proxy voting record and permanent file in order to identify those proposals voted differently than how the Firm voted clients not providing direction.

reflect: (i) all material changes to this policy; and (ii) regulatory requirements.

B. Apex Growth Equity Strategy

With respect to the Apex Growth Equity Strategy, the Firm has delegated to the Apex Growth Equity Proxy Coordinator the authority to execute all proxies, as designated to its proxy voting Service-Egan Jones, and vote in the clients' best interest. Generally, we will vote for managements' recommendations on recurring items. Specific situations may require unique responses that will be directed by the Chief Investment Officer or designee. Unless the parties otherwise agree in writing, the Firm shall have no obligation with respect to the voting of proxies.

a. General Proxy Voting Guidelines

The Firm has adopted general guidelines for voting proxies as summarized below. In keeping with its fiduciary obligations to its advisory clients, the Firm reviews all proposals, even those that may be considered to be routine matters. Although these guidelines are to be followed as a general policy, in all cases each proxy and proposal will be considered based on the relevant facts and circumstances. The Firm may deviate from the general policies and procedures when it determines that the particular facts and circumstances warrant such deviation to protect the interests of the advisory clients. These guidelines cannot provide an exhaustive list of all the issues that may arise nor can the Firm anticipate all future situations. Corporate governance issues are diverse and continually evolving and the Firm devotes significant time and resources to monitor these changes.

b. Apex Growth Equity Strategy Proxy Voting Policies and Principles

The Firm's proxy voting positions have been developed based on years of experience with proxy voting and corporate governance issues. These principles have been reviewed by various members of the Firm's organization, including portfolio management, and The Firm's officers. The following guidelines reflect what we believe to be good corporate governance and behavior:

- i. *Board of Directors:* The election of directors and an independent board are key to good corporate governance. Directors are expected to be competent individuals and they should be accountable and responsive to shareholders. The Firm supports an independent board of directors, and prefers that key committees such as audit, nominating, and compensation committees be comprised of independent directors. The Firm will generally vote against management efforts to classify a board and will generally support proposals to declassify the board of directors. The Firm will consider withholding votes from directors who have attended less than 75% of meetings without a valid reason. While generally in favor of separating Chairman and CEO positions, the Firm will review this issue on a case-by-case basis taking into consideration other factors including the company's corporate governance guidelines and performance. The Firm evaluates proposals to restore or provide for cumulative voting on a case-by-case basis and considers such factors as corporate governance provisions as well as relative performance. The Firm generally will support non-binding shareholder proposals to require a majority vote standard for the election of directors; however, if these

proposals are binding, the Firm will give careful review on a case-by-case basis of the potential ramifications of such implementation.

- ii. *Ratification of Auditors:* In light of several high profile accounting scandals, The Firm will closely scrutinize the role and performance of auditors. On a case-by-case basis, The Firm will examine proposals relating to non-audit relationships and non-audit fees. The Firm will also consider, on a case-by-case basis, proposals to rotate auditors, and will vote against the ratification of auditors when there is clear and compelling evidence of accounting irregularities or negligence attributable to the auditors.
- iii. *Management & Director Compensation:* A company's equity-based compensation plan should be in alignment with the shareholders' long-term interests. The Firm believes that executive compensation should be directly linked to the performance of the company. The Firm evaluates plans on a case-by-case basis by considering several factors to determine whether the plan is fair and reasonable. The Firm will generally support employee stock option plans in which the purchase price is at least 85% of fair market value, and when potential dilution is 10% or less.

Severance compensation arrangements will be reviewed on a case-by-case basis, although the Firm will generally oppose "golden parachutes" that are considered excessive. The Firm will normally support proposals that require that a percentage of directors' compensation be in the form of common stock, as it aligns their interests with those of the shareholders.

- iv. *Anti-Takeover Mechanisms and Related Issues:* The Firm generally opposes anti-takeover measures since they tend to reduce shareholder rights. The Firm generally supports proposals that require shareholder rights plans ("poison pills") to be subject to a shareholder vote. The Firm will closely evaluate shareholder rights' plans on a case-by-case basis to determine whether or not they warrant support. We will generally vote against any proposal to issue stock that has unequal or subordinate voting rights. In addition, we generally oppose any supermajority voting requirements as well as the payment of "greenmail." The Firm usually supports "fair price" provisions and confidential voting.
- v. *Changes to Capital Structure:* The Firm realizes that a company's financing decisions have a significant impact on its shareholders, particularly when they involve the issuance of additional shares of common or preferred stock or the assumption of additional debt. The Firm will carefully review, on a case-by-case basis, proposals by companies to increase authorized shares and the purpose for the increase. The Firm will generally not vote in favor of dual-class capital structures to increase the number of authorized shares where that class of stock would have superior voting rights. The Firm will generally vote in favor of the issuance of preferred stock in cases where the company specifies the voting, dividend, conversion and other rights of such stock and the terms of the preferred stock issuance are deemed reasonable. The Firm will review proposals seeking preemptive rights on a case-by-case basis.

- vi.** *Mergers and Corporate Restructuring:* Mergers and acquisitions will be subject to careful review by the research analyst to determine whether they would be beneficial to shareholders. The Firm will analyze various economic and strategic factors in making the final decision on a merger or acquisition. Corporate restructuring proposals are also subject to a thorough examination on a case-by-case basis.
- vii.** *Social and Corporate Policy Issues:* As a fiduciary, the Firm is primarily concerned about the financial interests of its advisory clients. The Firm will generally give management discretion with regard to social, environmental and ethical issues although the Firm may vote in favor of those issues that are believed to have significant economic benefits or implications.
- viii.** *Conflict of Interest:* Each proxy ballot will be reviewed by the Firm to determine if a conflict exists. If it is determined that a conflict exists, the Firm will (choose one): abstain from voting vote with management vote in accordance with its proxy voting service (Egan-Jones) recommendation.

The firm provides clients with this notification by investment advisory contract.

C. Fixed Income Strategy

a. Proxy Voting for Separately Managed Accounts

Because investment management services for the fixed income strategy relate primarily to fixed income securities, the Firm generally exercises discretion to vote proxies for clients' securities only in limited circumstances involving non-routine issuer events. When it does vote proxies for the fixed income strategy, the Firm's proxy voting policy is to vote all client proxies in the client's best interest on a case-by-case basis, considering such facts as it deems material. The Firm's objective is to vote proxies, in its judgment, in a manner that is most likely to maximize the value of its clients' investments. The Fixed Income Proxy Coordinator oversees and manages the process by which the Firm votes proxies for the Fixed Income Strategy.

A record of all proxy decisions and the rationale for voting in any situations that differ from the policy and are material will be retained and available for inspection by clients at any time in accordance with the procedures listed below.

b. Conflicts of Interest. The Firm must act as a fiduciary when voting proxies on behalf of its clients. In that regard, the Firm will seek to avoid possible conflict of interest in connection with proxy voting as follows:

Where the Firm identifies a potential conflict of interest (such as if the Firm or an employee is affiliated or associated with the issuer or the Firm holds the issuer's securities on a proprietary basis), the Firm will initially determine whether such potential conflict is material. Where the Firm determines there is a potential for a material conflict of interest regarding a proxy, the Firm will take one or some of the following steps: (i) inform the client of the material conflict and the Firm's voting decision; (ii) discuss the proxy vote with the client; (iii) fully disclose the material facts regarding the conflict and seek the client's consent to vote the proxy as intended; and/or (iv) seek the recommendations of an independent third party. The Firm will document the steps it took to evidence

that the proxy vote or abstention was in the best interest of the client and not the product of any material conflict. Such documentation will be maintained in accordance with required recordkeeping procedures.

c. Disclosure of Policies and Procedures. The Firm will provide a summary of these policies and procedures in its Form ADV, Part 2A (or in a separate disclosure) to be furnished to clients. The Firm will further provide a copy of these policies and procedures to any client upon request. In addition, the Firm will inform its clients how they can obtain further proxy voting information about their own proxies.

d. Disclosure of Voting Record. Upon a request from a client, the Firm will furnish to such client its proxy voting record with respect to such client's securities.

e. ERISA Considerations. ERISA prohibits fiduciaries from acting on behalf of a plan in situations in which the fiduciary is subject to a conflict of interest. Thus, if the Firm determines that it has a conflict of interest with respect to the voting of proxies, the Firm must either seek the client's informed direction or retain an independent person to direct the Firm how to vote the proxy in the best interests of the ERISA account.

f. Procedures for the Fixed Income Strategy

i. Receipt of Proxy Materials. The Firm receives proxy materials from issuers, custodians or broker-dealers through the mail in hard copy form with respect to any securities held in client accounts.

ii. Voting Decisions. The Portfolio Manager(s) has (have) responsibility for reviewing proxy materials and deciding how to vote on each issue or initiative for the securities he or she trades.

iii. Recusal from Voting. Any employee who has a direct or indirect pecuniary interest in any issue presented for voting, or any relationship with the issuer, must so inform the Compliance Team and recuse him or herself from decisions on how proxies with respect to that issuer are voted.

iv. Record of Votes Cast. Each year a member of each responsible portfolio management team creates a spreadsheet showing each security with respect to which votes were cast, the number of shares voted and how they were voted on each issue. The spreadsheet is maintained and updated to show such information for each proxy received throughout the year.

v. Conflicts of Interest. The Fixed Income Proxy Coordinator will conduct a review with the Compliance Team on an annual basis comparing the list of securities for which the Firm may vote proxies to the activities of the Firm's employees and principals, including personal holdings and board positions to ensure that no material conflicts of interest exist. In addition, The Fixed Income Proxy Coordinator will review holdings and information about clients with the portfolio managers to ensure that no material conflicts of interest exist. Finally, the Fixed Income Proxy Coordinator will report any instances of attempts to influence the proxy vote to the Compliance Team for further investigation, where necessary.

These results of these periodic reviews will be maintained in a memorandum, email or other notes provided to the Compliance Team, at least annually or as conflicts arise.

vi. Client Requests for Votes. If a client requests that their proxies be voted in a specific way on a specific issue, the portfolio manager or a member of the portfolio management team will advise the client that it cannot accommodate the request.

vii. Client Requests for Voting Record. Clients may request information concerning how their proxies were voted. The portfolio manager or a member of the portfolio management team will notify the Compliance Team if he or she receives such request and will respond to such requests showing how client shares were voted on particular issues. The Compliance Team will maintain a copy of all such requests and responses.

g. Class Actions

As a fiduciary, the Firm always seeks to act in clients' best interests with good faith, loyalty, and due care. The Firm's standard advisory contract authorizes the Firm to direct client participation in class actions. The Director of Operations, or such similarly titled individual, will determine whether clients will (a) participate in a recovery achieved through class actions, or (b) opt out of the class action and separately pursue their own remedy. The Director of Operations, or such similarly titled individual, oversees the completion of Proof of Claim forms and any associated documentation, the submission of such documents to the claim administrator, and the receipt of any recovered monies. The Director of Operations, or such similarly titled individual, will maintain documentation associated with clients' participation in class actions.

The Firm generally does not serve as the lead plaintiff in class actions because the costs of such participation typically exceed any extra benefits that accrue to lead plaintiffs.

h. Proxy Voting for Registered Fund clients

The Firm is required to vote proxies for investments in the Registered Funds.

Designated individuals are assigned the duties of receiving and reviewing proxies.

Judgmental issues are reviewed by senior investment professionals to determine if adopting the proposal is in the best interest of investors. An assessment is made to determine the extent to which there may be a material conflict between the adviser's interests and those of the investors. If conflicts arise, the Firm will vote in accordance with its pre-determined policies.

As part of recordkeeping the following documents are maintained: (a) a copy of the policies and procedures; (b) proxy statements received regarding Fund securities; (c) a record of each vote cast; (d) a copy of any document created by the Firm that was material to making a decision how to vote proxies on behalf of Fund investors or that memorializes the basis for that decision; and (e) each written investor request for proxy voting records and the Firm's written response to any (written or oral) investor request for such records. These records are maintained for a period of five (5) years.

Categories of Issues

It is the policy of the Firm to generally vote with management on routine matters affecting the future of the corporation. If we frequently disagree with management, we will generally sell the stock. Occasionally, however, when merger proposals or other corporate restructuring are involved, we vote shares we manage based on our best judgment as to what will produce the highest return relative to risk.

Following are examples of agenda items that the Firm generally *approves*:

- Election of Directors: Unless the Firm has reason to object to a given director, each director on management's slate is approved.
- Approval of Auditors: the Firm generally defers to management in picking a CPA firm and votes for management's choice.
- Directors' Liability and Indemnification: Since this is a legitimate cost of doing business and important to attracting competent directors, the Firm generally approves.
- Updating the Corporate Charter: Management periodically asks shareholders to vote for housekeeping updates to its charter and the Firm generally approves.
- Increase in the Common Share Authorization: As long as the increase is reasonable, the Firm generally approves.
- Stock Purchase Plans: The Firm believes that equity participation plans positively motivate management, directors and employees. Therefore, the Firm generally approves stock purchase plans unless we have reason to object.
- Stock Option Plans and Stock Participation Plans: If in the Firm's judgment and provided that they are not excessive, these plans are generally approved since they motivate management to enhance shareholder value.

Following are examples of issues presented for shareholder vote that are generally *opposed* because their approval is judged not to be in the best interest of the client.

- Elimination of Pre-Emptive Rights: Pre-emptive rights have value to the stockholder. They can be sold outright or used to buy additional shares, usually at a significant discount to the stock's market price.

To approve their elimination would mean giving away something of potential value to the client. Elimination of pre-emptive rights also potentially dilutes the shareholders' proportionate share of current holdings and diminishes shareholder rights or control over management. Therefore, the Firm generally opposes their elimination.

- Poison Pills: These are usually referred to as Shareholder Rights Plans and are used by management to prevent an unfriendly takeover. Generally, management asks the shareholders to approve a huge increase in authorized common shares often accompanied by the approval of a new issue of preferred stock, the terms of which can be set later by management at the onset of an uninvited bid for the company. The Firm generally opposes these and other devices

utilized by corporate management to elude acquirers, raiders or other legitimate offers unless it views such devices as likely to increase shareholder value in the future and not just entrench management.

- Proposals to Establish Staggered Boards: Since staggered election dates of board members impede hostile acquisitions and serve to entrench current management, they are not in the best interest of the shareholder and are generally opposed. It is the Firm's judgment that uninvited bids for the company's stock should not be discouraged. They are usually at a substantial premium over the existing market price, so they can be very profitable to the shareholder. It is better that management have a threat of an unwanted bid to give them the incentive to manage the company for the enhancement of shareholder value.
- New Classes of Shares Having Different Voting Rights: These are not in the clients' best interest because they are contrary to the principle of "one share one vote" and could dilute the current stockholders' control.
- Shareholders Proposals That Offer No Specific Economic Benefit to the client: When social issues are proposed by one or more shareholders, the Firm evaluates them to determine if their approval will be of economic benefit to the client or whether their adoption will result in additional cost to the company and/or impede its ability to do business. If the proposal offers no economic benefit, it is generally opposed.

D. Fund of Hedge Funds Strategy

With respect to the Fund of Hedge Funds strategy, the Firm generally provides investment advisory services to private hedge funds, and invests the assets of these private investment funds in underlying private fund vehicles ("Underlying Funds"). The Firm generally has no occasion to vote proxies.

The Underlying Fund managers invest the Underlying Funds' assets in investments (including securities) pursuant to their particular investment strategy. The Underlying Fund managers may or may not be delegated the right to vote proxies on behalf of the Underlying Funds depending on terms of the applicable management agreement between the Underlying Fund and the Underlying Fund managers.

Any authority to vote proxies on behalf of the Underlying Funds related to securities invested in by the Underlying Fund resides with the Underlying Fund managers.

The Firm does not receive any proxies from issuers in which the Underlying Funds invests and has no responsibility to vote proxies.

From time to time, the Firm may be asked to vote on the amendment of the Underlying Funds' governing documents or provide investor consents to the Underlying Funds. In such instances, the request for such vote will go to the relevant investment committee.

Attachment A-- Proxy Voting Guidelines Summary (Thematic Equity Strategy)

- Auditors. Vote for proposals to ratify auditors, unless any of the following apply:
 1. An auditor has a financial interest in or association with the Firm, and is therefore not independent,
 2. Fees for non-audit services are excessive, or
 3. There is reason to believe that the independent auditor has rendered an opinion which is neither accurate nor indicative of the Firm's financial position.
- Board of Directors
 1. Voting on Director Nominees in Uncontested Elections - Votes on director nominees are determined on a case-by-case basis.
 2. Classification/Declassification of the Board - Vote against proposals to classify the board. Vote for proposals to repeal classified boards and to elect all directors annually.
 3. Independent Chairman (Separate Chairman/ the Vice Chairman) - Vote on a case-by-case basis on shareholder proposals requiring that the positions of chairman and the Vice Chairman be held separately.
 4. Majority of Independent Directors/Establishment of Committees – (i) Vote for shareholder proposals asking that a majority or more of directors be independent unless the board composition already meets the proposed threshold by Broadridge's definition of independence. (ii) Vote for shareholder proposals asking that board audit, compensation, and/or nominating committees be composed exclusively of independent directors if they currently do not meet that standard.
- Shareholder Rights
 1. Shareholder Ability to Act by Written Consent – (i) Vote against proposals to restrict or prohibit shareholder ability to take action by written consent. (ii) Vote for proposals to allow or make easier shareholder action by written consent.
 2. Supermajority Vote Requirements – (i) Vote against proposals to require a supermajority shareholder vote. (ii) Vote for proposals to lower supermajority vote requirements.
 3. Cumulative Voting – (i) Vote against proposals to eliminate cumulative voting. (ii) Vote for proposals to restore or permit cumulative voting on a case-by-case basis relative to the Firm's other governance provisions.
 4. Confidential Voting - Vote for management proposals to adopt confidential voting.

- Proxy Contests. Voting for Director Nominees in Contested Elections - Votes in a contested election of directors are determined on a case-by-case basis.

- Poison Pills. Vote for shareholder proposals that ask a company to submit its poison pill for shareholder ratification. Review on a case-by-case basis shareholder proposals to redeem a company's poison pill and management proposals to ratify a poison pill.

- Mergers and Corporate Restructurings. Vote case-by-case on mergers and corporate restructurings based on such features as the fairness opinion, pricing, strategic rationale, and the negotiating process.

- Capital Structure

1. Common Stock Authorization – (i) Votes on proposals to increase the number of shares of common stock authorized for issuance are determined on a case-by-case basis. (ii) Vote against proposals at companies with dual-class capital structures to increase the number of authorized shares of the class of stock that has superior voting rights. (iii) Vote for proposals to approve increases beyond the allowable increase when a company's shares are in danger of being delisted or if a company's ability to continue to operate as a going concern is uncertain.

2. Dual-class Stock – (i) Vote against proposals to create a new class of common stock with superior voting rights. (ii) Vote for proposals to create a new class of nonvoting or sub voting common stock if: It is intended for financing purposes with minimal or no dilution to current shareholders. It is not designed to preserve the voting power of an insider or significant shareholder.

3. Executive and Director Compensation – (i) Votes with respect to compensation plans are determined on a case-by-case basis. Our methodology for reviewing compensation plans primarily focuses on the transfer of shareholder wealth (the dollar cost of pay plans to shareholders instead of simply focusing on voting power dilution). An estimated dollar cost for the proposed plan and all continuing plans will be calculated. This cost, dilution to shareholders' equity, will also be expressed as a percentage figure for the transfer of shareholder wealth, and will be considered along with dilution to voting power. Once the estimated cost of the plan is determined, it is compared to a company-specific dilution cap. (ii) Vote against equity plans that explicitly permit re-pricing or where the Firm has a history of re-pricing without shareholder approval.

4. Management Proposals Seeking Approval to Re-price Options - Votes on management proposals seeking approval to re-price options are evaluated on a case-by-case basis.

5. Employee Stock Purchase Plans - Votes on employee stock purchase plans are determined on a case-by-case basis.

6. Shareholder Proposals on Compensation - Vote on a case-by-case basis on all other shareholder proposals regarding executive and director pay.
- Social and Environmental Issues. These issues cover a wide range of topics, including consumer and public safety, environment and energy, general corporate issues, labor standards and human rights, military business, and workplace diversity. In general, vote case-by-case.

EXHIBIT C

ACADIAN ASSET MANAGEMENT LLC Proxy Voting Policies and Procedures (as of September 2014)

Policy

Whether Acadian will have proxy voting responsibility on behalf of a separate account client is subject to negotiation as part of the overall investment management agreement executed with each client. Should a client desire that Acadian vote proxies on their behalf, Acadian will accept such authority and agree with the client whether votes should be cast in accordance with Acadian's proxy voting policy or in accordance with a client specific proxy voting policy. Should the client wish to retain voting responsibility themselves, Acadian would have no further involvement in the voting process but would remain available to provide reasonable assistance to the client as needed.

Acadian has adopted a proxy voting policy reasonably designed to ensure that it votes proxies in the best interest of clients. Acadian utilizes the services of Institutional Shareholder Services ("ISS"), an unaffiliated proxy firm, to help manage the proxy voting process and to research and vote proxies on behalf of Acadian's clients who have instructed Acadian to vote proxies on their behalf. Unless a client provides a client specific voting criteria to be followed when voting proxies on behalf of holdings in their portfolio, each vote is made according to predetermined guidelines agreed to between the proxy service firm and Acadian. Acadian believes that utilizing this proxy service firm helps Acadian vote in the best interest of clients and insulates Acadian's voting decisions from any potential conflicts of interest.

When voting proxies on behalf of our clients, Acadian assumes a fiduciary responsibility to vote in our clients' best interests. In addition, with respect to benefit plans under the Employee Retirement Income Securities Act (ERISA), Acadian acknowledges its responsibility as a fiduciary to vote proxies prudently and solely in the best interest of plan participants and beneficiaries. So that it may fulfill these fiduciary responsibilities to clients, Acadian has adopted and implemented these written policies and procedures reasonably designed to ensure that it votes proxies in the best interest of clients.

Procedures

Proxy Voting Guidelines

Acadian acknowledges it has a duty of care to its clients that requires it to monitor corporate events and vote client proxies when instructed by the client to do so. To assist in this effort, Acadian has retained ISS to research and vote its proxies. ISS provides proxy-voting analysis and votes proxies in accordance with predetermined guidelines. Relying on ISS to vote proxies is intended to help ensure that Acadian votes in the best interest of its clients and insulates Acadian's voting decisions from any potential conflicts of interest. Acadian will also accept specific written proxy voting instructions from a client and communicate those instructions to ISS to implement when voting proxies involving that client's portfolio.

In specific instances where ISS will not vote a proxy, will not provide a voting recommendation, or other instances where there is an unusual cost or requirement related to a proxy vote, Acadian's Proxy Coordinator will conduct an analysis to determine whether the costs related to the vote outweigh the

potential benefit to our client. If we determine, in our discretion, that it is in the best of interest of our client not to participate in the vote Acadian will not participate in the vote on behalf of our client. If we determine that a vote would be in the best interest of our client, the Proxy Coordinator will seek a voting recommendation from an authorized member of our investment team and ensure the vote is cast as they instruct.

Unless contrary instructions are received from a client, Acadian has instructed ISS to not vote proxies in so-called “share blocking” markets. Share-blocking markets are markets where proxy voters have their securities blocked from trading during the period of the annual meeting. The period of blocking typically lasts from a few days to two weeks. During the period, any portfolio holdings in these markets cannot be sold without a formal recall. The recall process can take time, and in some cases, cannot be accomplished at all. This makes a client’s portfolio vulnerable to a scenario where a stock is dropping in attractiveness but cannot be sold because it has been blocked. Shareholders who do not vote are not subject to the blocking procedure.

Acadian also reserves the right to override ISS vote recommendations under certain circumstances. Acadian will only do so if they believe that voting contrary to the ISS recommendation is in the best interest of clients. All overrides will be approved by an Officer of Acadian and will be documented with the reasons for voting against the ISS recommendation.

Conflicts of Interest

Occasions may arise during the voting process in which the best interest of clients conflicts with Acadian’s interests. In these situations ISS will continue to follow the same predetermined guidelines as formally agreed upon between Acadian and ISS before such conflict of interest existed. Conflicts of interest generally include (i) business relationships where Acadian has a substantial business relationship with, or is actively soliciting business from, a company soliciting proxies, or (ii) personal or family relationships whereby an employee of Acadian has a family member or other personal relationship that is affiliated with a company soliciting proxies, such as a spouse who serves as a director of a public company. A conflict could also exist if a substantial business relationship exists with a proponent or opponent of a particular initiative.

If Acadian learns that a conflict of interest exists, its Proxy Coordinator will prepare a report for review with a compliance officer, and senior management if needed, that identifies (i) the details of the conflict of interest, (ii) whether or not the conflict is material, and (iii) procedures to ensure that Acadian makes proxy voting decisions based on the best interests of clients. If Acadian determines that a material conflict exists, it will defer to ISS to vote the proxy in accordance with the predetermined voting policy.

Voting Policies

Acadian has adopted the proxy voting policies developed by ISS, summaries of which can be found at <http://www.issgovernance.com/policy> and which are deemed to be incorporated herein. The policies have been developed based on ISS’ independent, objective analysis of leading corporate governance practices and their support of long-term shareholder value. Acadian may change its proxy voting policy from time to time without providing notice of changes to clients.

Voting Process

Acadian has appointed the Head of Operations to act as Proxy Coordinator. The Proxy Coordinator acts as coordinator with ISS including ensuring proxies Acadian is responsible to vote are forwarded to ISS, overseeing that ISS is voting assigned client accounts and maintaining appropriate authorization and voting records.

After ISS is notified by the custodian of a proxy that requires voting and/or after ISS cross references their database with a routine download of Acadian holdings and determines a proxy requires voting, ISS will review the proxy and make a voting proposal based on the recommendations provided by their research group. Any electronic proxy votes will be communicated to the proxy solicitor by ISS Global Proxy Distribution Service and Broadridge's Proxy Edge Distribution Service, while non-electronic ballots, or paper ballots, will be faxed, telephoned or sent via Internet. ISS assumes responsibility for the proxies to be transmitted for voting in a timely fashion and maintains a record of the vote, which is provided to Acadian on a monthly basis. Proxy voting records specific to a client's account are available to each client upon request.

Proxy Voting Record

Acadian's Proxy Coordinator will maintain a record containing the following information regarding the voting of proxies: (i) the name of the issuer, (ii) the exchange ticker symbol, (iii) the CUSIP number, (iv) the shareholder meeting date, (v) a brief description of the matter brought to vote; (vi) whether the proposal was submitted by management or a shareholder, (vii) how Acadian/ ISS voted the proxy (for, against, abstained) and (viii) whether the proxy was voted for or against management.

Obtaining a Voting Proxy Report

Clients may request a copy of these policies and procedures and/or a report on how their individual securities were voted by contacting Acadian at 617-850-3500 or by email at compliance-reporting@acadian-asset.com.
